Re: Application of Exxon Corporation for Administrative
Approval of an Unorthodox Gas Well Location and
Simultaneous Dedication

Dear Mr. Stogner:

Enclosed, in triplicate, is an application by Exxon Corporation for an unorthodox gas well location and simultaneous dedication. You may have already received a copy of this application in the mail. However, we are submitting additional copies to you so that it is submitted in triplicate as required by Division rules, and we are also providing evidence of notice given to offset lessees or operators.

As stated in the attached letter, Exxon requests approval of an unorthodox location for its U.L. Greenwood No. 9 Well, located 2,080 feet from the East line and 1,980 feet from the South line of Section 9, Township 22 South, Range 37 East, in Lea County. The well was originally completed in the Tubb formation as an oil well. Recently, the well has been completed uphole in the Blinebry as a gas well (Blinebry Oil and Gas (prorated) Pool). Under the pool rules, the No. 9 Well is 100 feet too close to the western boundary of the well unit (SE $\frac{1}{4}$ of Section 9).

Michael E. Stogner
January 8, 1993
Page Two

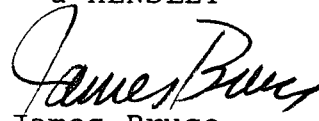

Exxon also desires to simultaneously dedicate the SE $\frac{1}{4}$ of Section 9 to its Nos. 9 and 11 Wells. The No. 11 Well is located at a standard location.

Attached hereto is our Affidavit of Notice.

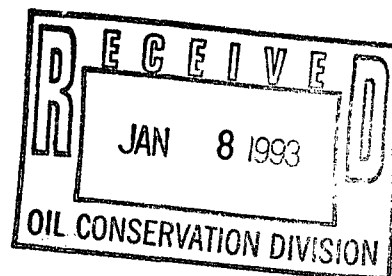

Please call me if you have any questions.

Very truly yours,

HINKLE, COX, EATON, COFFIELD
& HENSLEY

James Bruce

Re: Exxon Corporation J.L. Greenwood No. 9 Well,
2,080 feet FEL and 1,980 feet FSL (Unit J)
of Section 9, Township 22 South, Range 37
East, N.M.P.M., Lea County, New Mexico

Dear Sirs:

The above well was originally completed as an oil well in the Tubb formation. It was recently recompleted uphole in the Blinebry formation as a gas well (Blinebry Oil and Gas (prorated) Pool). The SE $\frac{1}{4}$ of Section 9 is dedicated to the well.

Exxon has applied to the New Mexico Oil Conservation Division for approval of an unorthodox gas well location. The No. 9 Well is located 100 feet nearer the western boundary of the well unit than allowed by the pool rules for the Blinebry Oil and Gas Pool.

Exxon also has requested approval of simultaneous dedication. The No. 9 Well and Exxon's existing J.L. Greenwood No. 11 Well, located at a standard location in unit I, will be dedicated to the SE $\frac{1}{4}$ of Section 9. Because the Pool is prorated, the wells will share an allowable.

Re: Exxon Corporation J.L. Greenwood No. 9 Well,
2,080 feet FEL and 1,980 feet FSL (Unit J)
of Section 9, Township 22 South, Range 37
East, N.M.P.M., Lea County, New Mexico

Dear Sirs:

The above well was originally completed as an oil well in the Tubb formation. It was recently recompleted uphole in the Blinebry formation as a gas well (Blinebry Oil and Gas (prorated) Pool). The SE $\frac{1}{4}$ of Section 9 is dedicated to the well.

Exxon has applied to the New Mexico Oil Conservation Division for approval of an unorthodox gas well location. The No. 9 Well is located 100 feet nearer the western boundary of the well unit than allowed by the pool rules for the Blinebry Oil and Gas Pool.

Exxon also has requested approval of simultaneous dedication. The No. 9 Well and Exxon's existing J.L. Greenwood No. 11 Well, located at a standard location in unit I, will be dedicated to the SE $\frac{1}{4}$ of Section 9. Because the Pool is prorated, the wells will share an allowable.

Re: Exxon Corporation J.L. Greenwood No. 9 Well,
2,080 feet FEL and 1,980 feet FSL (Unit J)
of Section 9, Township 22 South, Range 37
East, N.M.P.M., Lea County, New Mexico

Dear Sirs:

The above well was originally completed as an oil well in the Tubb formation. It was recently recompleted uphole in the Blinebry formation as a gas well (Blinebry Oil and Gas (prorated) Pool). The SE $\frac{1}{4}$ of Section 9 is dedicated to the well.

Exxon has applied to the New Mexico Oil Conservation Division for approval of an unorthodox gas well location. The No. 9 Well is located 100 feet nearer the western boundary of the well unit than allowed by the pool rules for the Blinebry Oil and Gas Pool.

Exxon also has requested approval of simultaneous dedication. The No. 9 Well and Exxon's existing J.L. Greenwood No. 11 Well, located at a standard location in unit I, will be dedicated to the SE $\frac{1}{4}$ of Section 9. Because the Pool is prorated, the wells will share an allowable.

Unorthodox Location
Simultaneous Dedication
J.L. Greenwood Well #9
Unit Letter: J
Section 9, T22S - R37E
Lea County, NM
Blinebry Oil and Gas Pool

Mr. Michael E. Stogner
New Mexico Oil Conservation Division
P.O. Box 2088
Santa Fe, New Mexico 87504-2088

Dear Mr. Stogner:

Exxon Corporation requests administrative approval of an unorthodox location for the J.L. Greenwood well #9. Forms C-102, C-104 and C-105 are attached. This well is located in Unit Letter J, Section 9, T22S - R37E and has been recompleted in the Blinebry Oil and Gas Pool as a gas well. The well was previously completed in the Tubb as an oil well. The request for administrative approval is based on Rule 104-F-1 "the recompletion of a well previously drilled to a deeper horizon, provided said well was drilled at an orthodox or approved unorthodox location for such original horizon".

Administrative approval is also requested for Simultaneous Dedication. The J.L. Greenwood well # 11 is located in Unit Letter I, NE4SE4, of Section 9 as shown on the attached proration schedule. Offset operators will not be notified since the Blinebry Oil and Gas Pool is prorated.

From October 14 through December 14, 1992 this well has produced approximately 70,923,000 cu. ft. of gas. Since December 14 an estimated 35,797,000 cu. ft. of gas has been produced for a total of 106,720,000 cu. ft. This is an average daily production rate of 1,301,000 cu. ft./day.

Mr. Michael E. Stogner
January 6, 1993
Page 2

From October 14 through January 4, 1993 well #11 has produced approximately 9,986,000 cu. ft. of gas. The total production from the SE4, 160 acs. is 116,616,000 cu. ft. The average daily production during the 82 day period is 1,422,000 cu. ft. and the allowable would be 1,270,000 cu ft. The total overproduction is 12,464,000 cu. ft. which is approximately 10 days of allowable.

If you have any questions please call me at 915-688-6782.

Sincerely,

Alex M. Correa
