RE: Report of Groundwater Remediation Activities
Bell Lake Plant Remediation Site
Transwestern Pipeline Company
Lea County, New Mexico

Dear Glenn,

The enclosed Report of Groundwater Remediation Activities is submitted for your review and files. This report presents a summary of groundwater monitoring and remediation activities completed since the last report of remediation activities.

If you have any questions or comments regarding this report, please contact me at (281) 797-3420.

Sincerely,

George Robinson
President/Principal Engineer

1. Groundwater Monitoring Activities

1.1 Semi-Annual Groundwater Sampling Events

Two semi-annual groundwater sampling events have been completed since the last report of remediation activities. These events were completed in December 2006 and July 2007.

Prior to sampling, the depth to water, and the depth to hydrocarbon where phase-separated hydrocarbons (PSH) were present, was determined for each monitoring well. The measured depth to water and the corresponding water table elevation for each monitoring and SVE well is presented in Table 1.

In the course of each sample event, groundwater samples were collected from selected monitoring and SVE wells at the site. In addition, groundwater samples were collected from the on-site water well. Samples were not collected from wells with accumulated PSH in the well casing. Groundwater samples were delivered to a laboratory for analysis by EPA Method 8021 for BTEX, selected inorganic constituents by EPA Methods 6010, total dissolved solids by EPA Method 160.1, and chlorides by EPA Method 325.2. The sample analysis plan can be found in Table 6.

A summary of the laboratory results for organics and field measured groundwater quality parameters (pH, temperature, electrical conductivity and dissolved oxygen) is presented in Table 2. A summary of inorganic laboratory results is presented in Table 3. A copy of the laboratory results for each of the sampling events is included as an attachment to this report.

1.2 Results/Conclusions from Groundwater Sampling Events

1.2.1 Occurrence and Direction of Groundwater Flow

A water table elevation map based on measurements obtained in the course of the July 2007 sampling event is included as Figure 2. The apparent direction of groundwater flow is consistent with water table elevation maps previously developed for this site.

1.2.2 Lateral Extent of Phase Separated Hydrocarbon

The lateral extent of PSH is currently defined by the occurrence of PSH at the water table in wells MW-4, SVE-3, SVE-8, SVE-10, SVE-12 and SVE-13 and the absence of PSH in all other wells. The thickness of accumulated PSH in wells is presented in Table 1. A figure indicating the estimated area with PSH present at the water table is included as Figure 3.

The thickness of the PSH has substantially decreased since 1998. For example, SVE-1 contained over 3.5 feet of PSH in 1998 within the well casing. When checked in July 2007, no measurable amount of PSH was detected. The soil vapor extraction system is effectively removing volatile hydrocarbons from the subsurface based on the significant decrease in PSH measured in the well casings.

1.2.3 Condition of Affected Groundwater

The condition of affected groundwater, based on recent sampling events, has not changed significantly from previous sampling events as evidenced by the information presented in Tables

2 and 3. Figure 4 shows the distribution of BTEX constituents dissolved in groundwater. Figure 5 shows the distribution of inorganic constituents dissolved in groundwater. A concentration history plot for selected wells are included an Attachment to this report. The plots were prepared using concentration data presented in Tables 2 and 3. Elevated concentrations of benzene continue to be the primary concern at the site.

2. Status of Remediation Activities

2.1 Remediation Activities Completed through July 2007

The following remediation activities have been completed since the last report of groundwater remediation activities:

- 1) SVE system vapor samples were collected on September 18, 2006. A summary of the laboratory results is presented in Table 4.
- 2) The SVE system and PSH recovery system continue to operate.

3. Proposed Modifications

3.1 Modifications to the Routine Groundwater Sampling Plan

Sampling location, frequency and the sampling analysis plan will continue on a semi-annual basis. A summary of the sample analysis plan is presented in Table 6.

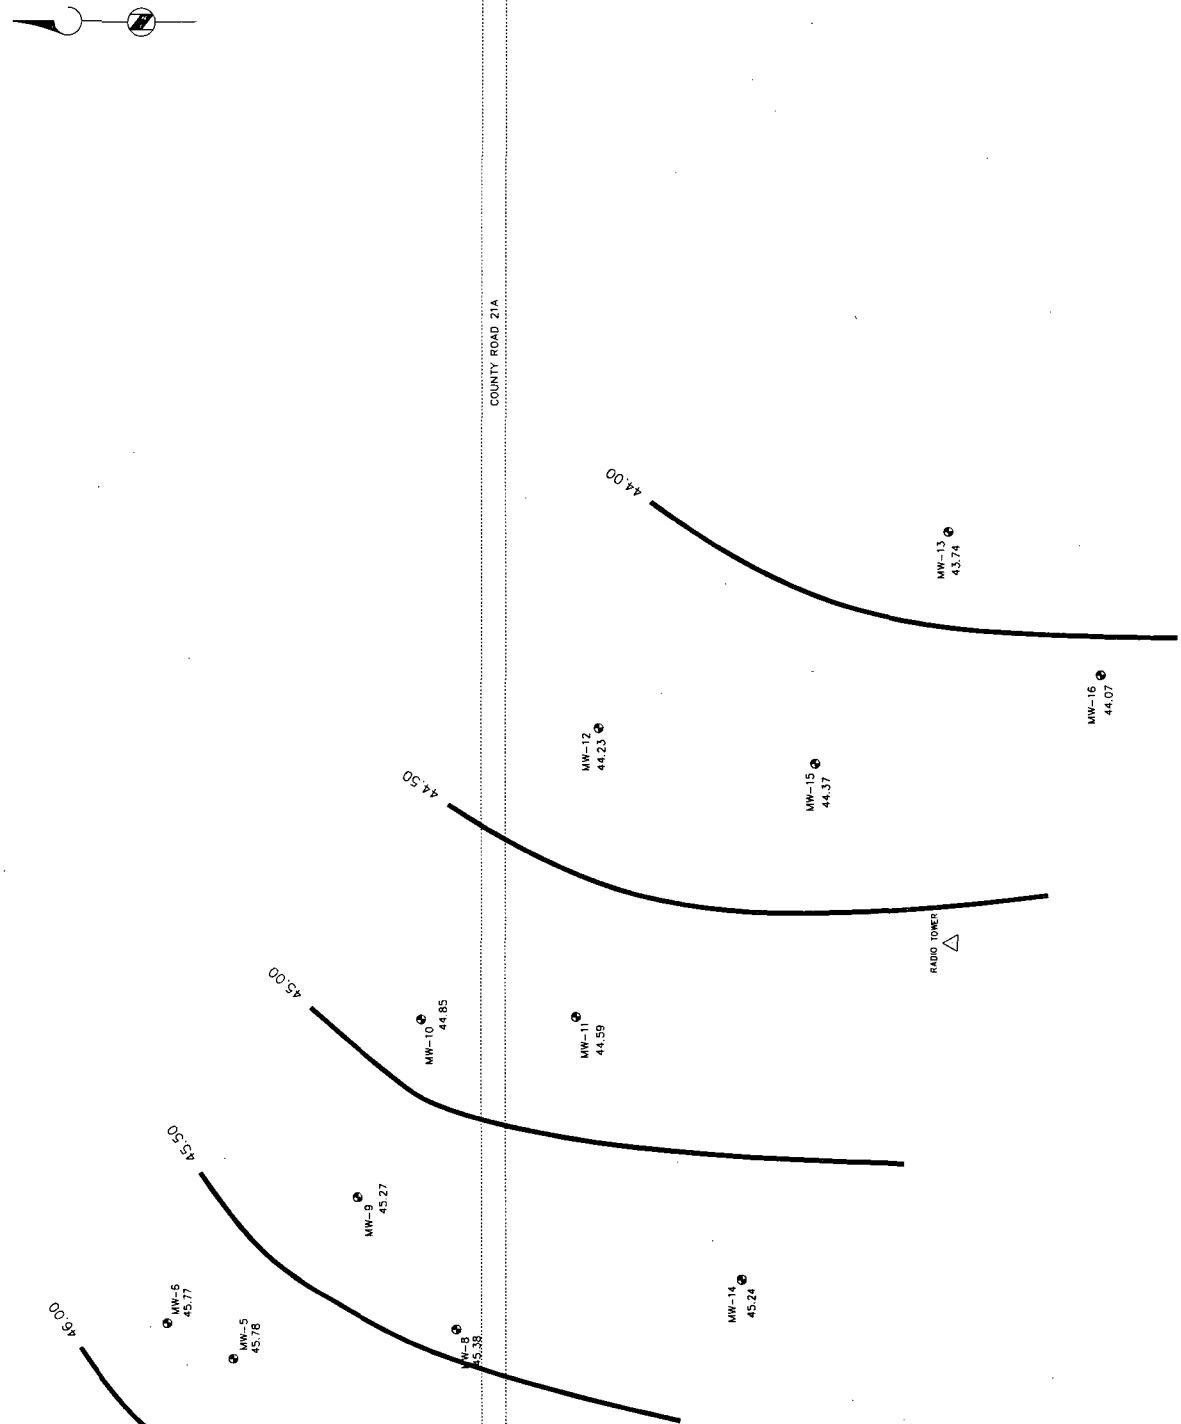

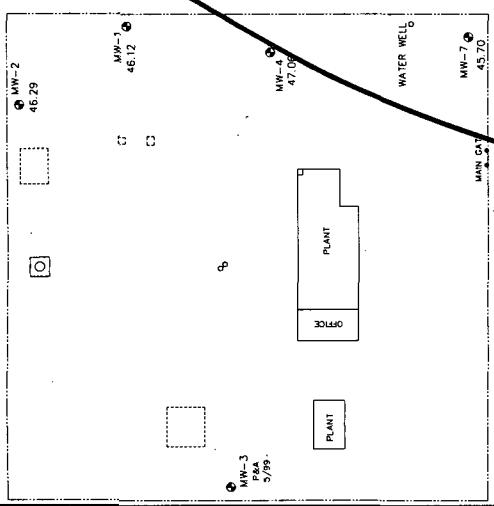

3.2 Modifications to the Remediation System

Currently, the liquid recovery system consists of five pneumatic PSH skimming pumps. In April 2004, a Discharge Plan application was submitted to the OCD for an expansion of the remediation system to include total fluids (both PSH and water) recovery from the perched aquifer. The proposed modification will replace the skimming pumps with five pneumatic total fluids pumps. The objective is to more aggressively recover PSH still present near the release area. On October 25, 2004, Discharge Plan GW-355 was issued by the OCD for this modification.

An integral part of the system expansion will be the installation of an evaporation pond for management of recovered groundwater. The evaporation pond is designed to have an effective water surface area of about one acre. Since there is not sufficient area available within the Bell Lake Plant facility for this installation, the pond is to be constructed on adjacent property. The adjacent property is owned by the State of New Mexico and administered by the State Land Office. Transwestern is in the process of obtaining a surface easement for installation of the pond and will install the system expansion upon obtaining an easement.

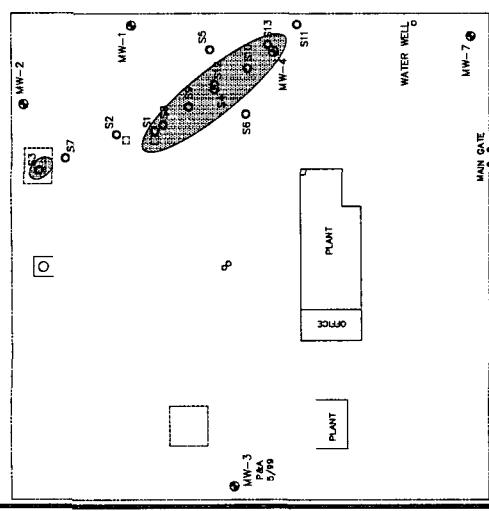

3.3 Reporting Frequency

Annual reporting will continue with the next scheduled report being submitted to the OCD by August 31, 2008.

NOTES:

- (a) Not applicable since no measurable thickness of hydrocarbon is present
- (b) Corrections to ground water surface elevation for presence of hydrocarbon is calculated assuming a specific gravity of 0.6
- (c) TOC elevation based on survey by John West Surveying Co. on 12/28/95
- (d) TOC elevation based on survey by CES (GCR) on 01/09/98
- (e) TOC elevation based on survey by CES (GCR) on 08/11/99
- (f) TOC elevation based on survey by John West Surveying Co. on 12/27/99
w/adjustments: MW-2=+0.06, MW-7 & SVE-1-13=+0.08, MW-10-13=+0.02
- (g) TOC elevation based on survey by John West Surveying Co. on 01/09/03

Notes:

- (a) Driller/Consultant
- (b) TOC elevation based on survey by John West Surveying Co. on 12/28/95
- (c) TOC elevation based on survey by CES (GCR) on 01/09/98
- (d) TOC elevation based on survey by John West Surveying Co. on 12/27/99 w/adjustments: MW-2 = +0.06, MW-7 & SVE-1-13 = +0.08, MW-10-13 = +0.02
- (e) TOC elevation based on survey by John West Surveying Co. on 01/09/03

Table 6. Monitor Well Sampling Locations, Frequency, and Sample Analysis Plan
TW Bell LakeGas Plant

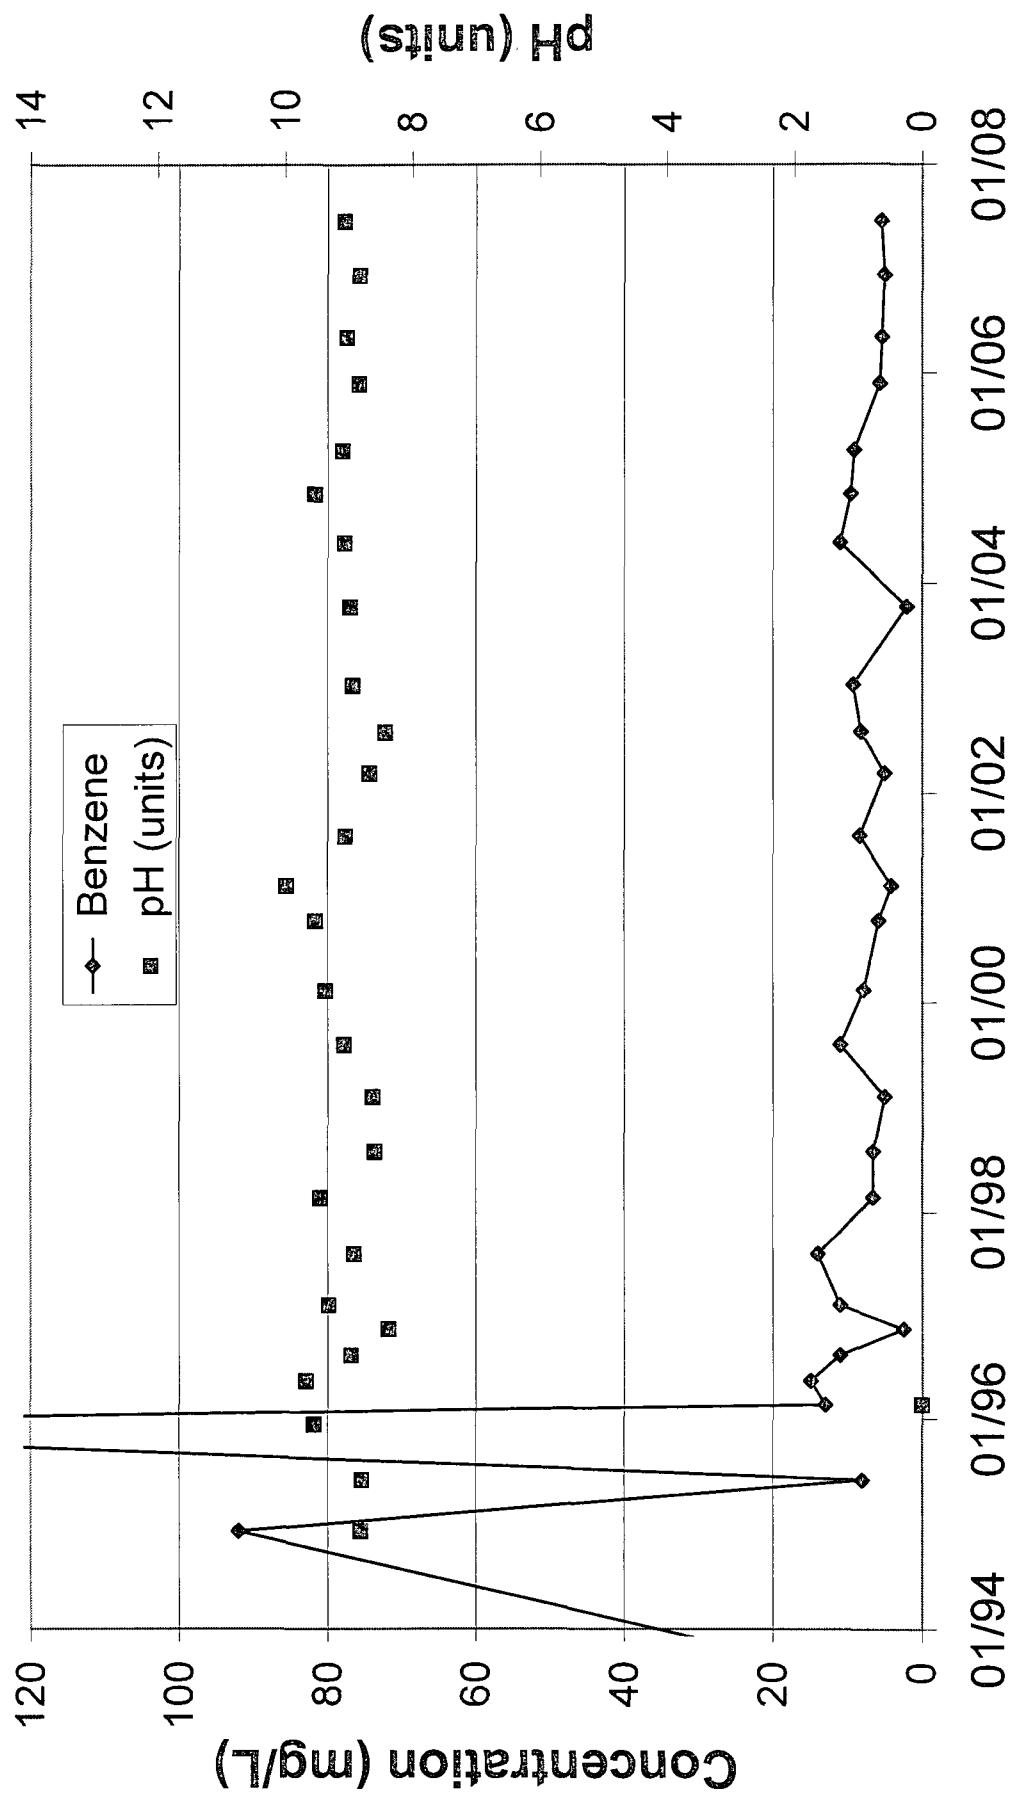

Well ID	Analytical Requirements		Benzene (ppb) Latest Result	Comments
	1st Semiannual Event	2nd Semiannual Event		
MW-1	BTEX, TDS, Cl, As, Ba & Mn	BTEX	5	
MW-2	BTEX, TDS, Cl, As, Ba & Mn	BTEX	7	
MW-3	----	----	< 5	Well has been abandoned
MW-4	BTEX, TDS, Cl, As, Ba & Mn	none	240	PSH in well
MW-5	BTEX, TDS, Cl, As, Ba & Mn	BTEX	21	
MW-6	BTEX, TDS, Cl, As, Ba & Mn	BTEX	39	
MW-7	BTEX, TDS, Cl, As, Ba & Mn	BTEX	< 1	
MW-8	BTEX, TDS, Cl, As, Ba & Mn	BTEX	160	
MW-9	BTEX, TDS, Cl, As, Ba & Mn	BTEX	410	
MW-10	BTEX, TDS, Cl, As, Ba & Mn	BTEX	34	
MW-11	BTEX, TDS, Cl, As, Ba & Mn	BTEX	630	
MW-12	BTEX, TDS, Cl, As, Ba & Mn	BTEX	3.8	
MW-13	BTEX, TDS, Cl, As, Ba & Mn	BTEX	< 1	
MW-14	BTEX, TDS, Cl, As, Ba & Mn	BTEX	< 1	
MW-15	BTEX, TDS, Cl, As, Ba & Mn	BTEX	< 1	
MW-16	BTEX, TDS, Cl, As, Ba & Mn	BTEX	< 1	
Water Well	BTEX, TDS, Cl, As, Ba & Mn	BTEX	< 1	
SVE-2	BTEX, TDS, Cl, As, Ba & Mn	BTEX	1.1	
SVE-5	BTEX, TDS, Cl, As, Ba & Mn	BTEX	250	
SVE-6	BTEX, TDS, Cl, As, Ba & Mn	BTEX	260	
SVE-7	BTEX, TDS, Cl, As, Ba & Mn	BTEX	16	
SVE-11	BTEX, TDS, Cl, As, Ba & Mn	BTEX	500	

Notes:

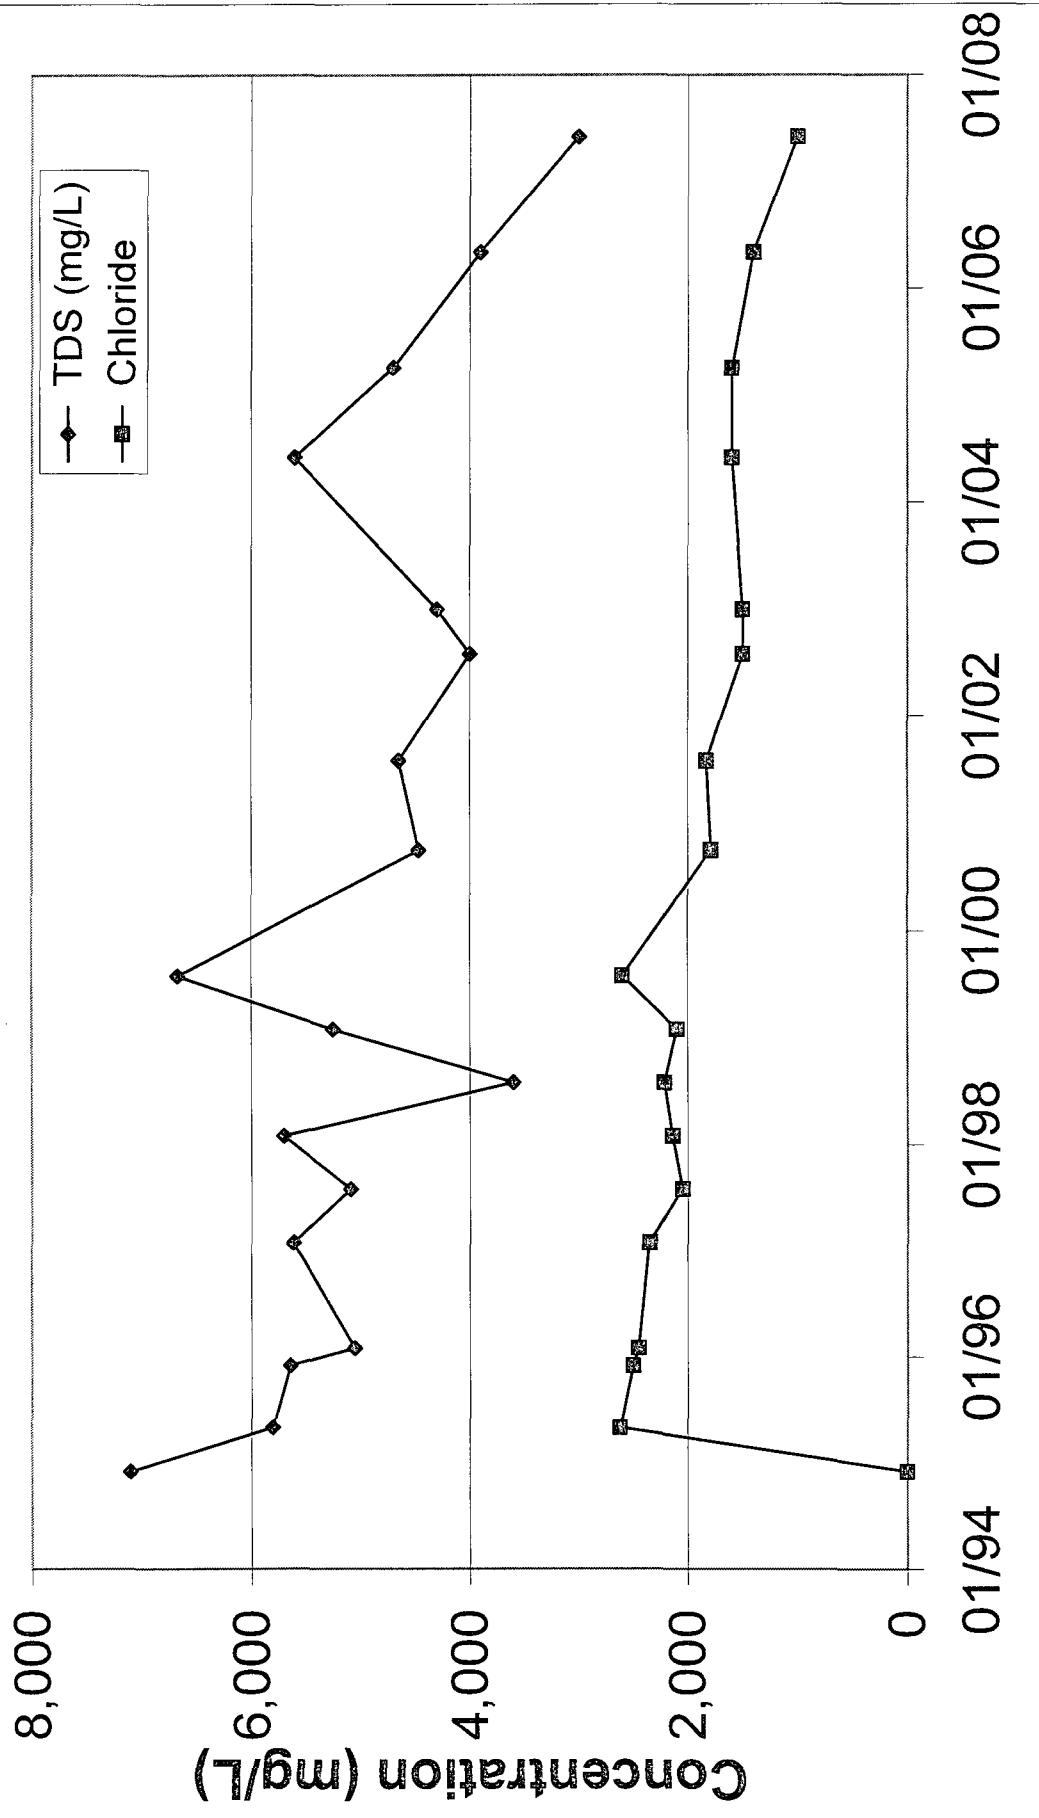

- 1) na - not available
- 2) BTEX - BTEX Compounds by EPA Method 8021B
- 3) "Comments" are provided for wells that will not be sampled during one or more events
