**GENERAL  
CORRESPONDENCE**

**YEAR(S): 2008 - 2011**

**Lowe, Leonard, EMNRD**

---

**From:** Shane Estep [shane@etechenv.com]  
**Sent:** Friday, September 23, 2011 3:40 PM  
**To:** Lowe, Leonard, EMNRD  
**Cc:** 'Goodwin, Jason S'  
**Subject:** Leak Discovery GW-375

Mr. Lowe

I talked to Carl Chavez and he instructed that I should contact you. I could not reach you by phone so I am sending this email as the initial notification.

As part of an annual sump and line testing at the BJ Services facility in Hobbs, NM a leak was discovered on one of the facilities drain lines.

This leak was discovered on September 22, 2011 and was found in a long drain line that leads from a lift station within the BJ Services facility across vacant land to the City of Hobbs sewer system.

BJ Services has repaired the leak and we are in the process of conducting soil and water testing on the release.

A letter report will be send to you within the next 10 days detailing more information on the release and the findings of the laboratory analytical results.

Please let me know if you need additional information.

Thanks

RE: Discharge Plan Application Public Notice Confirmation  
BJ Services Company, U.S.A.  
11211 FM 2920  
Tomball, TX 77375

Dear Mr. Lowe:

Enclosed with this letter are four attachments that confirm BJ Services Company, U.S.A. has appropriately completed the required public notice process for the Discharge Plan Application associated with our new facility located at 3111 Bloomfield Highway, Farmington, NM.

Attachment 1 is Public Notice Confirmation Pictures of the signs and postings that were posted for 30-days. As seen in Photo E, the signs on the facility's perimeter fence were destroyed by wind over the March 22, 2008 weekend. Personnel on-site have confirmed that these signs were intact on March 20, 2008 and were found destroyed on March 24, 2008.

Attachment 2 is Property Owner Notification Confirmation. This has a copy of the certified letter receipt as well as a copy of the letter provided the property owner.

Attachment 3 is Adjacent Property Owner Notification Confirmation. This has copies of the certified letter receipts as well as a copy of the letter provided the adjacent property owners. There is one letter that was returned as unclaimed, all other letters were delivered.

Attachment 4 is Affidavit of Publication from the Farmington Daily Times.

If there are any questions or comments, please contact me at (281) 357-2573.

Thank You.

## PUBLIC NOTICE

BJ Services Company, U.S.A. 11211 FM 2920, Tomball, TX 77382, has submitted an application to the New Mexico Energy, Minerals and Natural Resources Department, Oil Conservation Division for a new discharge plan permit discharge plan (GW-375) for their Farmington Dyna-Coil & PPS District located in the NE  $\frac{1}{4}$ , NE  $\frac{1}{4}$  of Section 23, Township 29 North, Range 13 West in San Juan County, New Mexico. The physical address of the facility is 3111 Bloomfield Highway, Farmington, NM 87401. The facility is located approximately 2 miles southeast of downtown Farmington, approximately 0.5 miles north of the San Juan River and approximately 1 mile south of the Animas River.

The facility provides services for oil and gas wells and pipelines. Approximately 5-gallons of methanol may be generated as waste in any given month. The aquifer most likely to be affected is approximately 30 feet in depth, and the total dissolved solids concentration of this aquifer is approximately 1,500 to 2,500 mg/l.

Any interested person or persons may obtain information, submit comments or request to be placed on a facility-specific mailing list for future notices by contacting Leonard Lowe at the New Mexico OCD at 1220 South St. Francis Drive, Santa Fe, New Mexico 87505, Telephone (505) 476-3492. The OCD will accept comments and statements of interest regarding the renewal and will create a facility-specific mailing list for persons who wish to receive future notices.

**COPY OF PUBLICATION**

**PUBLIC NOTICE**

BJ Services Company, U.S.A. 11211 FM 2920, Tomball, TX 77382, has submitted an application to the New Mexico Energy, Minerals and Natural Resources Department, Oil Conservation Division for a new discharge plan permit discharge plan (GW-375) for their Farmington Dyna-Coil & PPS District located in the NE 1/4, NE 1/4 of Section 23, Township 29 North, Range 13 West in San Juan County, New Mexico. The physical address of the facility is 3111 Bloomfield Highway, Farmington, NM 87401. The facility is located approximately 2 miles southeast of downtown Farmington, approximately 0.5 miles north of the San Juan River and approximately 1 mile south of the Animas River.

The facility provides services for oil and gas wells and pipelines. Approximately 5-gallons of methanol may be generated as waste in any given month. The aquifer most likely to be affected is approximately 30 feet in depth, and the total dissolved solids concentration of this aquifer is approximately 1,500 to 2,500 mg/l.

Any interested person or persons may obtain information, submit comments or request to be placed on a facility-specific mailing list for future notices by contacting Leonard Lowe at the New Mexico OCD at 1220 South St. Francis Drive, Santa Fe, New Mexico 87505, Telephone (505) 476-3492. The OCD will accept comments and statements of interest regarding the renewal and will create a facility-specific mailing list for persons who wish to receive future notices.

Mr. Morrisette,

The NMOCD is still waiting on your proof of publication from the Farmington Daily Times and the photos for placement of facility notice and local area notice. Also the certified letter notices to residence within a 1/3 mile radius of the facility. See the attached WQCC rules and regs for discharge plans for NEW facilities.

Please inform the NMOCD on when you will be submitting these.

Thank you for your attention.

Subject RE: GW-375, Administratively Complete (3111 Bloomfield Highway, Farmington N.M.)

Mr. Josh Morrisette,

The Public Notice that I sent to you along with the **Admin complete letter** and **Draft permit** is what **WE** the **NMOCD** will publish as part of the renewal process. The

information stated there is much like what you, the applicant, will be stating, except that it is from US to the public. We have to send it out to the applicant as part of the notification of Administratively Complete process. It can be confusing, but we have to do it. I would prefer not to though, but what do I know.

Your SCENERIO 2 is correct. Your attached version of the **public notice is acceptable** and is therefore **approved by the NMOCD for publication**. Please translate it in to Spanish and publish along side English version.

Use your approved Public Notice for all Notices required (1 – 5). Your postings shall be in English and in Spanish as well.

Prior to actually posting in areas, 1 & 2, please submit to the NMOCD information of the location of these two places prior to posting.

For Proof please submit a photograph of the Location postings and date when they were posted. Ensure that these postings can endure the elements for a minimum of 30 days. At the end of the 30 day period another photograph shall be taken prior to removal.

If you have any questions please feel free to call me.

**Subject:** Re: GW-375, Administratively Complete (3111 Bloomfield Highway, Farmington N.M.)

Leonard - Thanks for all the information. However, I am a little confused on the public notice aspect of this. This is how I understand it:

Within 30-days we must:

1. Post 2' by 3' signs at the property in English and Spanish
2. Post another notice in a place conspicuous to the public (Library, Chamber of Commerce, or Town Hall?)
3. Provide written notice by mail to all property owners within 1/3 of a mile (if none then mail to the next adjacent)

- 4. Provide certified mail notice to the owner of the subject property, if not the applicant
- 5. Publish in general circulation newspaper a public notice at least 3" by 4" not in the classified or legal section.

Within 15-days of completing the above we must:

- 1. Submit all proof of items 1-4 above to the OCD

The main thing I am confused about is the actual public notice verbage that should be used. In your e-mail you sent me a completed Notice of Publication and one that is a template.

Scenario 1

Use the completed one because it meets all the content requirements for the public notice. I would have this whole thing published in the newspaper, placed in the area conspicuous to the public, provided to the adjacent property owners and to the property owner of our facility. I would use the bold text for our signs.

Scenario 2

Use the template provided, make it specific to our facility and translate that whole thing into Spanish for the newspaper. This verbage would also be used for our sign, the conspicuous public place notification, the adjacent property owner and the property owner of our facility letters.

I have attached the site specific template if we are to follow Scenario 2. Please let me know if I am way off base here and if it is okay to follow public notice Scenario 1. Thanks.

02/05/2008 10:56 AM

Mr. Josh Morrissette,

The submitted Discharge Plan Application for the BJ Services Dyna-Coil Services and Process Pipeline Services Division has been determined **Administratively Complete**.

Attached is the **Admin. Complete Letter, DRAFT Permit, and OCD Public Notice** for your records.

I have also attached the **New & Mod WQCC PN Rules, New & Mod PN Flow Chart** and an **Applicant Public Notice Example**. The PN rules indicate procedures and requirements needed for your Public Notice (fonts in red relate to NEW Discharge Permits). The flow chart shows the process and procedure of a new Discharge Plan application. The Example, just replace all items highlighted in yellow to reflect your facility.

6/6

Please note that your Public Notice shall be approved by the NMOCD prior to publication to the public. I shall be waiting on your submission soon for review.

If you have any questions please feel free to contact me at my information below.

Thank you for your attention.

NOTICE OF PUBLICATION

STATE OF NEW MEXICO  
ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT  
OIL CONSERVATION DIVISION

Notice is hereby given that pursuant to New Mexico Water Quality Control Commission Regulations (20.6.2.3106 NMAC), the following discharge permit application(s) has been submitted to the Director of the New Mexico Oil Conservation Division ("NMOCD"), 1220 S. Saint Francis Drive, Santa Fe, New Mexico 87505, Telephone (505) 476-3440:

(GW-040) Mr. Bill Robertson, Remediation Project Manager, Giant Industries, Inc., 111 County Road 4990, Bloomfield, NM 87413, has submitted a renewal application for the previously approved discharge plan for its Former Bloomfield Refinery, located in the NW/4 of Section 27 and the SW/4 of Section 22, Township 29 North, Range 12 West, NMPM, San Juan County, New Mexico, located approximately five miles west of Bloomfield, New Mexico. During 2006, approximately 4,600,000 gallons of contaminated ground water was processed in a ground water remediation system. Groundwater most likely to be affected by a spill, leak or accidental discharge is at a depth of approximately 5 to 10 feet, with a total dissolved solids concentration of approximately 1,700 to 3,100 mg/l. The discharge plan addresses how contaminated ground water will be remediated and disposed of and how spills, leaks, and other accidental discharges to the surface will be managed in order to protect fresh water.

(GW-126) Weatherford U.S. Limited Partnership, CB Jacobson, Environmental Project Manager, 735 E. 1400 N., Mapleton, UT 84664, has submitted a renewal application for the previously approved discharge plan for their Oil and Gas Service Company, 5432 Highway 64, Farmington N.M., located in the SW/4 NW/4 of Section 19, Township 29 North, Range 12 West, NMPM, San Juan County, New Mexico, approximately 7/10 mile from the intersection of Highway 64 and Browning Parkway in Farmington, New Mexico. Approximately 16,000 gallons of drilling chemicals, 576 gallons/year of used chemicals, 1000 gallons/year of used oil, and 300 gallons/day of wash water are generated and stored onsite prior to disposal at an NMOCD approved facility. Groundwater most likely to be affected by a spill, leak or accidental discharge is at a depth of approximately 50 feet, with a total dissolved solids concentration of approximately less than 1000 mg/l. The discharge plan addresses how oilfield products and waste will be properly handled, stored, and disposed of, including how spills, leaks, and other accidental discharges to the surface will be managed in order to protect fresh water.

(GW-375) BJ Services Company USA, Mr. Josh Morrisette, HSE Specialist, 11211 FM 2920, Tomball, TX 77375, has submitted an application for a new discharge plan permit for their Oil and Gas Service Company, 3111 Bloomfield Highway, Farmington N.M. 87401, located in the NE/4 NE/4 of Section 23, Township 29 North, Range 13 West, NMPM, San Juan County, New Mexico. Approximately 5000 gallons of Diammonium EDTA, 2000 gallons of Tetra Ammonium EDTA and 110 gallons of PCI-20 are stored at this facility and are used for its oil and gas related business. Its waste streams consist of approximately 5 gallons of methanol and varying amount of general office waste. Groundwater most likely to be affected by a spill, leak or accidental discharge is at a depth of approximately 30 feet, with a total dissolved solids concentration of approximately 1,500 - 2,500 mg/l. The discharge plan addresses how oilfield products and waste will be properly handled, stored, and disposed of, including how spills, leaks, and other accidental discharges to the surface will be managed in order to

(GW-307) Williams Four Corners, Mr. David Bays, Senior Environmental Specialist, 188 County Road 4900, Bloomfield, N.M. 87413, has submitted a renewal application for the previously approved discharge plan for their Laguna Seca Compressor Station, located in the SE/4 SW/4 of Section 19, Township 31 North, Range 5 West, NMPM, Rio Arriba County, New Mexico, approximately 35 miles east of Aztec, New Mexico. The station provides metering, compression, and dehydration services to various producers for the gathering of natural gas for treatment and delivery. Approximately 2000-8000 bbl/year of produced water/natural gas condensate; 100-5000 gal/year/unit of waste water and 500-2000 gal/year/engine of used engine oil are generated and stored in OCD approved containers onsite within a bermed area prior to disposal at an NMOCD approved facility. Groundwater most likely to be affected by a spill, leak or accidental discharge is at a depth of approximately 250 feet, with a total dissolved solids concentration of approximately 200 - 2000 mg/l. The discharge plan addresses how oilfield products and waste will be properly handled, stored, and disposed of, including how spills, leaks, and other accidental discharges to the surface will be managed in order to protect fresh water.

The NMOCD has determined that the application is administratively complete and has prepared a draft permit. The NMOCD will accept comments and statements of interest regarding this application and will create a facility-specific mailing list for persons who wish to receive future notices. Persons interested in obtaining further information, submitting comments or requesting to be on a facility-specific mailing list for future notices may contact the Environmental Bureau Chief of the Oil Conservation Division at the address given above. The administrative completeness determination and draft permit may be viewed at the above address between 8:00 a.m. and 4:00 p.m., Monday through Friday, or may also be viewed at the NMOCD web site <http://www.emnrd.state.nm.us/ocd/>. Persons interested in obtaining a copy of the application and draft permit may contact the NMOCD at the address given above. Prior to ruling on any proposed discharge permit or major modification, the Director shall allow a period of at least thirty (30) days after the date of publication of this notice, during which interested persons may submit comments or request that NMOCD hold a public hearing. Requests for a public hearing shall set forth the reasons why a hearing should be held. A hearing will be held if the Director determines that there is significant public interest.

If no public hearing is held, the Director will approve or disapprove the proposed permit based on information available, including all comments received. If a public hearing is held, the director will approve or disapprove the proposed permit based on information in the permit application and information submitted at the hearing.

**NOTICE OF PUBLICATION**

**STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION**

Notice is hereby given that pursuant to New Mexico Water Quality Control Commission Regulations (20.6.2.3106 NMAC), the following discharge permit application(s) has been submitted to the Director of the New Mexico Oil Conservation Division ("NMOCD"), 1220 S. Saint Francis Drive, Santa Fe, New Mexico, 87505, Telephone (505) 476-3440:

(GW-076) Mr. Maurice Sticker, Director of Environmental Affairs Smith Services, 1000 West County Road, Hobbs, NM 88240 has submitted a renewal application for the previously approved discharge plan for its oil field services facility, located in the NW/4 of NW/4 of Section 32, Township 18 South, Range 38 East, NMPM, Lea County, New Mexico, located at 1000 West County Road, Hobbs, New Mexico. Groundwater that is most likely to be affected by a spill, leak or accidental discharge is at a depth of approximately 45 feet below ground surface, with a total dissolved solids concentration of approximately 657 mg/l. The discharge plan addresses how contaminated ground water will be remediated and disposed of and how spills, leaks, and other accidental discharges to the surface will be managed in order to protect fresh water.

(GW-072) Mr. Joshua Morrisette, BJ Services, 2708 West County Road, Hobbs, NM 88240, has submitted a renewal application for the previously approved discharge plan for its oil field services facility, located in the NW/4 of the NE/4 of Section 20, Township 18 North, Range 38 West, NMPM, Lea County, New Mexico, located at 2708 West County Road, Hobbs, New Mexico. Groundwater most likely to be affected by an accidental discharge is at a depth of approximately 52 feet below ground surface with a total dissolved solids concentration of approximately 657 mg/l. The discharge plan consists of a waste management plan and specifies how spills, leaks, and other accidental discharges to the surface will be managed in order to protect fresh water. The discharge plan also addresses how chloride contaminated ground water will be remediated and disposed of until the ground water meets standards pursuant to 20.6.2.3103 NMAC of the New Mexico Water Quality Control Commission (WQCC) Regulations.

(GW-040) Mr. Bill Robertson, Remediation Project Manager, Giant Industries, Inc., 111 County Road 4990, Bloomfield, NM 87413, has submitted a renewal application for the previously approved discharge plan for its Former Bloomfield Refinery, located in the NW/4 of Section 27 and the SW/4 of Section 22, Township 29 North, Range 12 West, NMPM, San Juan County, New Mexico, located approximately five miles west of Bloomfield, New Mexico. During 2006, approximately 4,600,000 gallons of contaminated ground water was processed in a ground water remediation system. Groundwater most likely to be affected by a spill, leak or accidental discharge is at a depth of approximately 5 to 10 feet, with a total dissolved solids concentration of approximately 1,700 to 3,100 mg/l. The discharge plan addresses how contaminated ground water will be remediated and disposed of and how spills, leaks, and other accidental discharges to the surface will be managed in order to protect fresh water.

(GW-126) Weatherford U.S. Limited Partnership, CB Jacobson, Environmental Project Manager 735 E 1400 N., Mapleton, UT 84664, has submitted a renewal application for the previously approved discharge plan for their Oil and Gas Service Company, 5432 Highway 64, Farmington N.M., located in the SW/4 NW/4 of Section 19, Township 29 North, Range 12 West, NMPM, San Juan County, New Mexico, approximately 7/10 mile from the intersection of Highway 64 and Browning Parkway in Farmington, New Mexico. Approximately 16,000 gallons of drilling chemicals, 576 gallons/year of used chemicals, 1000 gallons/year of used oil, and 300 gallons/day of wash water are generated and stored onsite prior to disposal at an NMOCD approved facility. Groundwater most likely to be affected by a spill, leak or accidental discharge is at a depth of approximately 50 feet, with a total dissolved solids concentration of approximately less than 1000 mg/l. The discharge plan addresses how oilfield products and waste will be properly handled, stored, and disposed of, including how spills, leaks, and other accidental discharges to the surface will be managed in order to protect fresh water.

(GW-375) BJ Services Company USA, Mr. Josh Morrisette, HSE Specialist, 11211 FM 2920, Tomball, TX 77375, has submitted an application for a new discharge plan permit for their Oil and Gas Service Company, 3111 Bloomfield Highway, Farmington N.M. 87401, located in

the NE/4 NE/4 of Section 23, Township 29 North, Range 13 West, NMPM, San Juan County, New Mexico. Approximately 5000 gallons of Diammonium EDTA, 2000 gallons of Tetra Ammonium EDTA and 110 gallons of PCI-20 are stored at this facility and are used for its oil and gas related business. Its waste streams consist of approximately 5 gallons of methanol and varying amount of general office waste. Groundwater most likely to be affected by a spill, leak or accidental discharge is at a depth of approximately 30 feet, with a total dissolved solids concentration of approximately 1,500 - 2,500 mg/l. The discharge plan addresses how oilfield products and waste will be properly handled, stored, and disposed of, including how spills, leaks, and other accidental discharges to the surface will be managed in order to protect fresh water.

(GW-307) Williams Four Corners, Mr. David Bays, Senior Environmental Specialist, 188 County Road 4900, Bloomfield, N.M. 87413, has submitted a renewal application for the previously approved discharge plan for their Laguna Seca Compressor Station, located in the SE/4 SW/4 of Section 19, Township 31 North, Range 5 West, NMPM, Rio Arriba County, New Mexico, approximately 35 miles east of Aztec, New Mexico. The station provides metering, compression, and dehydration services to various producers for the gathering of natural gas for treatment and delivery. Approximately 2000-8000 bbl/year of produced water/natural gas condensate, 100-5000 gal/year/unit of waste water and 500-2000 gal/year/engine of used engine oil are generated and stored in OCD approved containers onsite within a bermed area prior to disposal at an NMOCD approved facility. Groundwater most likely to be affected by a spill, leak or accidental discharge is at a depth of approximately 250 feet, with a total dissolved solids concentration of approximately 200 - 2000 mg/l. The discharge plan addresses how oilfield products and waste will be properly handled, stored, and disposed of, including how spills, leaks, and other accidental discharges to the surface will be managed in order to protect fresh water.

The NMOCD has determined that the application is administratively complete and has prepared a draft permit. The NMOCD will accept comments and statements of interest regarding this application and will create a facility-specific mailing list for persons who wish to receive future notices. Per-

sons interested in obtaining further information, submitting comments or requesting to be on a facility-specific mailing list for future notices may contact the Environmental Bureau Chief of the Oil Conservation Division at the address given above. The administrative completeness determination and draft permit may be viewed at the above address between 8:00 a.m. and 4:00 p.m., Monday through Friday, or may also be viewed at the NMOCD web site <http://www.emnrd.state.nm.us/ocd/>. Persons interested in obtaining a copy of the application and draft permit may contact the NMOCD at the address given above. Prior to ruling on any proposed discharge permit or major modification, the Director shall allow a period of at least thirty (30) days after the date of publication of this notice, during which interested persons may submit comments or request that NMOCD hold a public hearing. Requests for a public hearing shall set forth the reasons why a hearing should be held. A hearing will be held if the Director determines that there is significant public interest.

If no public hearing is held, the Director will approve or disapprove the proposed permit based on information available, including all comments received. If a public hearing is held, the director will approve or disapprove the proposed permit based on information in the permit application and information submitted at the hearing.
