Was Immediate Notice Given? <input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not Required	If YES, To Whom?	RECEIVED
By Whom?	Date and Hour	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse. N/A	APR 07 2008

HOBBS OCD

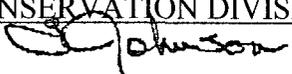

Describe Cause of Problem and Remedial Action Taken.*

On Thursday March 27, 2008 at 0720 hrs a spill was discovered at the Brine Loading Station located 0.5 miles west of the Buckeye Production Office. The spill was caused by a valve being left partially open the day before on the load line.

Describe Area Affected and Cleanup Action Taken.*

Amount spilled was 17 bbls of brine water. The spill was not contained and affected approximately 1400 sq/ft of pad and pasture. A vacuum truck was called to pick up the free liquids and 15 bbls of brine water was recovered. The area will be remediated upon abandonment of the facility due to high traffic and the danger of buried lines at this facility.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
