FINAL ANALYTICAL RESULTS: Sample Date 6/22/2007 Sample Depth 6 ft

TPH and chloride laboratory test results completed by using an approved laboratory and testing procedures pursuant to NMOCD guidelines.

CHLORIDE FIELD TESTS

Sample Location	PID (field) ppm	GRO mg/kg	DRO mg/kg	Chloride mg/kg
HAND AUGER GRAB 6 ft below jct.	-----	<25	117	<16

LOCATION	DEPTH (ft)	ppm
background	0.5	175
below junction	6	181

General Description of Remedial Action:

This junction box was moved/upgraded as part of the pipeline replacement program.

Once the box lumber was removed from the former site, the location was inspected for chloride and hydrocarbon impact. The soils at and around the site were of a brown sand type and did not exhibit any staining or other signs of adverse impact. The surrounding surface has a healthy vegetation cover and does not appear to be stressed. Field tests on the soil samples confirmed that chloride were very low, similar to those of background.

Confirmation samples were analyzed at a certified laboratory. The 4 x 4 x 3-ft hole was backfilled and the disturbed surface area was seeded with a blend of native vegetation on 7/13//2007 and is expected to return to productive capacity at a normal rate.
