**Re: *Injection Pressure Increase
Bowers "A" Federal Well No. 39
API: 30-025-35727
Lea County, New Mexico***

Dear Ms. Burdette:

Reference is made to your request dated February 4, 2003, to increase the surface injection pressure on the above-referenced well located within the Hobbs Upper Blinebry Cooperative Waterflood Project. This request is based on a step rate test conducted on this well on January 28, 2003. The test results have been reviewed and we feel an increase in injection pressure is justified at this time.

Without modifying the injection interval or the tubing size or type, you are authorized to inject at or below the following surface injection pressure.

Well Name & Location	Maximum Surface Injection Pressure
Bowers "A" Federal Well No. 39 API No. 30-025-35727	1,414 PSIG
Located in Unit J, Section 30, Township 18 South, Range 38 East, NMPM, Lea County, New Mexico.	

The Division Director may rescind this injection pressure increase if it becomes apparent that the injected water is not being confined to the injection zone or is endangering any fresh water aquifers.

Injection Pressure Increase
Texland Petroleum, Inc.
Bowers "A" Federal Well No. 39
