Dear Mr. LeMay:

Merrion requests administrative approval for an unorthodox Basin Fruitland Coal well in the SE/4, Sec. 35, T30N, R12W of San Juan County, New Mexico. The well is at a standard footage location (990' FSL & 990' FEL), but it is considered non-standard due to the NE-SW dedicated pattern established by the Basin Fruitland Coal Pool. We plan to recomplete the Carnahan #1, an existing Mesaverde well, into the Basin Fruitland Coal Pool and the Fulcher Kutz PC Pool. A separate application is being submitted for approval to downhole commingle these zones. Enclosed are the following in support of our application for the unorthodox Fruitland location.

- 1.) C-102 Plat;
- 2.) Plat showing offset owners/operators;
- 3.) Affidavit of notification of offset operators. Copies of the certified return receipts will be submitted when received.
