Dear Mr. LeMay:

On behalf of Teakoma Oil and Gas Corporation, I am enclosing two copies of an application for a non-standard location. Please call me if you have any questions.

Sincerely,

REQUEST FOR ADMINISTRATIVE APPROVAL FOR UNORTHODOX LOCATION FOR
THE NAVAJO 30 #1 COAL GAS WELL TO BE DRILLED AT
520' FNL & 520' FEL SEC. 30, T. 25 N., R. 13 W., SAN JUAN COUNTY, NM
BY TEXAKOMA OIL AND GAS CORPORATION

I. The well is on Navajo Tribal Trust surface in the Navajo Indian Irrigation Project (NIIP). Minerals are Federal (BLM). An onsite was held July 13, 1994. Onsite participants included Linda Taylor (BIA), Jackie Neckels (BLM), Vicki Lee (Navajo Land Administration), and Bob Vogel (Permits West). Application for Permit to Drill is attached.

II. A C-102 showing the well location, proration unit (320 acres), and lease (E2 Sec. 30 = 320 ac.) is attached.

III. According to NM Oil Conservation Records reviewed on July 11, 1994, there are no offset wells producing from the Fruitland. Indeed, there are no producing wells of any kind within a mile radius. There is one proposed Fruitland well (Texakoma's Mustang #2 in NESW 20-25n-13w) within a mile radius. A map and affidavit are attached showing the proposed well (large dot), leases (solid lines), and spacing units (dashed lines). Leases, offset operators, and working interest owners are:

BLM: Open to leasing. Not currently leased.

NM-53936: E. F. Hixon, W. S. Chumney, W. T. Chumney, R. P. Brewer, M. I. Brewer,
B. B. Chumney, Giant, Cyprus

NM-57453: Myco

NM-65534: Billie Robinson

NM-70137: Chorney

NM-87299: Dugan

NM-87300: Texakoma, Speerex

NM-87306: Abo, Myco, Yates Drilling, & Yates Petroleum

NM-87307, Bradco, Texakoma

NM-87308: Dugan

NM-89840: Applied for by Giant in 1992. Not yet issued pending mineral exchange.

IV. A composite copy of the Alamo Mesa, Bisti Trading Post, Moncisco Wash, and The Pillar 7.5' USGS maps is attached. The proposed Navajo 30 #1 wellsite is marked by a large dot. Proration units are marked by dashed lines. Leases are marked by solid lines. Closest existing wellpad is a P&A

well 150' southeast in NENE 30-25n-13w. Closest proposed well is Texakoma's Mustang 2 in the NESW 20-25n-13w.

V. Request for an exception is based on a proposed center pivot irrigation plot (see attached topo). All orthodox locations would be within center pivot irrigation plots. NIIP plans two center pivot irrigation plots for east half of Section 30. Each center pivot will have \approx quarter mile radius. Staked location moves well northeast out of orthodox drilling window and out of irrigation plot.

VI. No archaeology sites were found.

VII. Location was moved out of orthodox drilling window due to proposed NIIP center pivot irrigation plot. Orthodox drilling window is all within center pivot irrigation plot. NIIP plans two center pivot irrigation plots for east half of Section 30. Each pivot will have \approx quarter mile radius.

VIII. Directional drilling is not feasible because it is not cost effective to attempt a directional hole.

IX. I hereby certify that notice (return receipts are attached) has been sent to the following lessees, lessors, surface management agencies, operators of spacing units, or owners of undrilled leases which adjoin the applicant's spacing unit on one or more of the two sides or the single closest corner to the proposed well and that the information is current and correct:

Dear Steve,

As required by NM Oil Conservation Division Rules I am notifying you of the following well, a non-standard location. This letter is a notice only. No action need be taken unless you have questions or objections. Proposed surface use (center pivot irrigation system) forces the proposed well to be moved to less than the standard 790' from a drilling window line. The well is \approx 520' from the closest lease line and over a mile from the closest producing well.

Well Name: Navajo 30 #1 oil well, proposed TD of \approx 1,200'

Legal Location: 520' FNL & 520' FEL Sec. 30, T. 25 N., R. 13 W., San Juan County, New Mexico (see attached map) on Federal lease NM-87307
