ANUNCIO DE LA PUBLICACION
ESTADO DE NUEVO MEXICO
DEPTO. DEL ENERGIA, MINERALES Y RECURSOS NATURALES DE
DEPTO. CONSERVACION DEL PETROLEO
Presente es da noticia de que en virtud de la New Mexico Control de Calidad del Agua Reglamentos de la Comision (20.6.2.3106 NMAC) la siguiente solicitud de permiso de descarga se ha presentado al Director de la New Mexico Oil Conservation Division ("NMOCD"), 1220 S. Saint Francis Drive, Santa Fe, New Mexico 87505, Telefono 505-476-3461 (Contacto: Dorothy Phillips):
(GW-376) Champion Technologies, # 40 County Road 3145, Aztec, New Mexico 87410, ha presentado una solicitud de un nuevo plan de gestion para el permiso de su azteca campo de petroleo y gas de servicio, ubicado en el NW / 4 NE / 4, de Seccion 2, el municipio de 29 Norte, Range 12 Oeste, NMPM, San Juan County, New Mexico, en el area industrial en zonas 1/4 millas al este de la interseccion del Highway 350 y Country Road 3145. Campesin Campesin de Tecnologias de Azteca instalacion es un centro de distribucion masiva (farmaceno y distribuye) Campesin de Tecnologias de base de agua con base de aceite y los productos quimicos utilizados para el tratamiento dentro del pozo de petroleo y gas en los pozos de New Mexico y alrededores. Alrededor de 20000 galones de petroleo y 67000 galones de dentro del pozo de tratamiento de productos quimicos se almacenaran en el sitio portatiles y contenedores sobre el suelo dentro de tanques de almacenamiento de hormigon de con-tencion secundaria. Las aguas subterranas mas probabilidades de verse afectados por un der-rame, fuga o descarga accidental es a una profundidad de aproximadamente 150 pies. Las aguas subterranas en este fondo cuenta con un total de solidos disueltos concentracion de aproximadamente 1000 - 4000 mg / l. El plan de gestion se ocupa de como los productos y residuos de campos petroleros sera debidamente manipulados, almacenados, y eliminados, incluyendo como los derrames, filtraciones, vertidos accidentales y otros a la superficie sera gestionada con el fin de proteger el agua dulce.
El NMOCD ha determinado que la solicitud esta administrativamente completa y ha preparado un proyecto de permiso. El NMOCD aceptara comentarios y declaraciones de interes con respecto a esta solicitud y se creara un servicio de lista de correo especifica para las personas que deseen recibir futuras notificaciones. Cualquier persona o personas interesadas pueden obtener informacion, presen-tar observaciones o solicitud de ser incluidos en una instalacion especifica de la lista de correo para futuras notificaciones poniendose en contacto con Leonard Lowe en el New Mexico OCD, en 1220 South St. Francis Drive, Santa Fe, Nuevo Mexico 87505, Telefono (505) 476-3492. La OCD se acep-tara comentarios y declaraciones de interes con respecto a la autorizacion y se creara un servicio de lista de correo especifica para las personas que deseen recibir futuras notificaciones. La determi-nacion administrativa integrada y el proyecto de permiso podra ser consultado en la direccion antes mencionada entre las 8:00 am y las 4:00 pm, de lunes a viernes, o tambien puede ser consultado en el NMOCD sitio web http://www.emmrd.state.nm.us / OCD / Las personas interesadas en obtener una copia de la solicitud y el proyecto pueden ponerse en contacto con el permiso de NMOCD en la direccion que figura mas arriba.
Antes de pronunciarse sobre cualquier propuesta de permiso de descarga o una importante modifi-cacion, el Director debera permitir un periodo de al menos treinta (30) dias despues de la fecha de publicacion del presente anuncio, durante el cual las personas interesadas podran presentar observa-ciones o solicitar que NMOCD celebre una audiencia publica. Las solicitudes de audiencia publica se expondran las razones por las que una audiencia se celebre. Una audiencia se llevara a cabo si el Director determina que existe un gran interes publico.
En caso de que no se celebre audiencia publica, el Director aprobará o rechazará el proyecto de per-miso con base en la informacion disponible, incluyendo todos los comentarios recibidos. Si una audi-encia publica se celebró, el Director aprobará o rechazará el proyecto de permiso con base en la infor-macion en la solicitud de permiso y la informacion presentada en la audiencia.

NOTICE OF PUBLICATION
STATE OF NEW MEXICO
ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT
OIL CONSERVATION DIVISION
Notice is hereby given that pursuant to New Mexico Water Quality Control Commission Regulations (20.6.2.3106 NMAC), the following discharge permit application(s) has been submitted to the Director of the New Mexico Oil Conservation Division ("NMOCD"), 1220 S. Saint Francis Drive, Santa Fe, New Mexico 87505, Telephone (505) 476-3440:
(GW-376) Champion Technologies, # 40 County Road 3145, Aztec, New Mexico 87410, has submitted a request for a new discharge plan permit for their Aztec oil and gas field service facility, located in the NW/4 NE/4 of Section 2, Township 29 North, Range 12 West, NMPM, San Juan County, New Mexico, within the industrial zoned area 1/4 miles east of the interse-ction of Highway 350 and Country Road 3145. Champion Technologies Champion Technologies Aztec facility is a bulk distribution center (stores and distributes) for Champion Technologies water-based and oil-based chemicals used for down-hole treatment of oil and gas wells in New Mexico and surrounding area. Approximately 20,000 gallons of oil and 67,000 gallons of down-hole treatment chemicals will be stored onsite in portable containers and above ground storage tanks within concrete secondary containment. Groundwater most likely to be affected by a spill, leak or accidental discharge is at a depth of approximately 150 feet, with a total dissolved solids concentration of approximately 1,000 - 4,000 mg/l. The dis-charge plan addresses how oilfield products and waste will be properly handled, stored, and disposed of, including how spills, leaks, and other accidental discharges to the surface will be managed in order to protect fresh water.
The NMOCD has determined that the application is administratively complete and has prepared a draft permit. The NMOCD will accept comments and statements of interest regarding this application and will create a facility-specific mailing list for persons who wish to receive future notices. Any interested person or persons may obtain information, submit comments or request to be placed on a facility-specific mailing list for future notices by contacting Leonard Lowe at the New Mexico OCD at 1220 South St. Francis Drive, Santa Fe, New Mexico 87505, Telephone (505) 476-3492. The OCD will accept comments and statements of interest regarding the permit and will create a facility-spe-cific mailing list for persons who wish to receive future notices. The administrative completeness determination and draft permit may be viewed at the above address between 8:00 a.m. and 4:00 p.m., Monday through Friday, or may also be viewed at the NMOCD web site http://www.emmrd.state.nm.us/oecd/. Persons interested in obtaining a copy of the application and draft permit may contact the NMOCD at the address given above.
Prior to ruling on any proposed discharge permit or major modification, the Director shall allow a period of at least thirty (30) days after the date of publication of this notice, during which interested persons may submit comments or request that NMOCD hold a public hearing. Requests for a public hearing shall set forth the reasons why a hearing should be held. A hearing will be held if the Director determines that there is significant public interest.
If no public hearing is held, the Director will approve or disapprove the proposed permit based on information available, including all comments received. If a public hearing is held, the director will approve or disapprove the proposed permit based on information in the permit application and infor-mation submitted at the hearing.

COPY OF PUBLICATION

NOTICE OF PUBLICATION

STATE OF NEW MEXICO
ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT
OIL CONSERVATION DIVISION

Notice is hereby given that pursuant to New Mexico Water Quality Control Commission Regulations (20.6.2.3106 NMAC), the following discharge permit application(s) has been submitted to the Director of the New Mexico Oil Conservation Division ("NMOCD"), 1220 S. Saint Francis Drive, Santa Fe, New Mexico 87505, Telephone (505) 476-3440.

(GW-092) El Paso Natural Gas Company's Richard Duarte, Senior Environmental Engineer, 3801 Atrisco Blvd. NW, Albuquerque, NM 87120, has submitted a renewal discharge plan application for their Rio Vista compressor station, located in the SE/4 SW/4 of Section 27, Township 29 North, Range 11 West, NMPM, San Juan County, New Mexico. The facility is located south of Bloomfield, N.M., approximately 0.38 miles south of the San Juan River and 1/2 mile east of highway 550. The facility provides compression of pipeline quality natural gas via the San Juan cross-over pipeline. Approximately 8000 gallons of used lube oil, 1000 gallons of oil/waste water and 400 gallons of new oil will be stored onsite in above storage tanks (AST). These containers shall be placed upon cemented, bermed areas. Groundwater most likely to be affected by a spill, leak or accidental discharge is at a depth of approximately 30 feet, with a total dissolved solids concentration of approximately 1,200 - 4,775 mg/l. The discharge plan addresses how oilfield products and waste will be properly handled, stored, and disposed of, including how spills, leaks, and other accidental discharges to the surface will be managed in order to protect fresh water.

(GW-306) Williams Four Corners, Mr. David Bays, Senior Environmental Specialist, 188 County Road 4900, Bloomfield, N.M. 87413, has submitted a renewal application for the previously approved discharge plan for their Trunk N Compressor Station, located in the NW/4 NE/4 of Section 17, Township 32 North, Range 7 West, NMPM, San Juan County, New Mexico, approximately 15 miles northeast of Archuleta, New Mexico. The station provides metering, compression, and dehydration services to various producers for the gathering of natural gas for treatment and delivery. Approximately 2000-8000 bbl/year of produced water/natural gas condensate, 100-5000 gal/year/unit of waste water and 500-2000 gal/year/engine of used engine oil are generated and stored in OCD approved containers onsite within a bermed area prior to disposal at an NMOCD approved facility. Groundwater most likely to be affected by a spill, leak or accidental discharge is at a depth of approximately 200-500 feet, with a total dissolved solids concentration of approximately 200 - 2000 mg/l. The discharge plan addresses how oilfield products and waste will be properly handled, stored, and disposed of, including how spills, leaks, and other accidental discharges to the surface will be managed in order to protect fresh water.

(GW-376) Champion Technologies, # 40 County Road 3145, Aztec, New Mexico 87410, has submitted a request for a new discharge plan permit for their Aztec oil and gas field service facility, located in the NW/4 NE/4 of Section 2, Township 29 North, Range 12 West, NMPM, San Juan County, New Mexico, approximately half mile east of county road 3500, 2 miles southeast of the Animas River and 5.2 miles north of the San Juan river. Approximately 20,000 gallons of oil and 67,000 gallons of down-hole treatment chemicals will be stored onsite in tote drums and above ground storage tanks. These holding tanks shall be located on cemented bermed containment areas. Groundwater most likely to be affected by a spill, leak or accidental discharge is at a depth of approximately 150 feet, with a total dissolved solids concentration of approximately 1,000 - 4,000 mg/l. The discharge plan addresses how oilfield products and waste will be properly handled, stored, and disposed of, including how spills, leaks, and other accidental discharges to the surface will be managed in order to protect fresh water.

The NMOCD has determined that the application is administratively complete and has prepared a draft permit. The NMOCD will accept comments and statements of interest regarding this application and will create a facility-specific mailing list for persons who wish to receive future notices. Persons interested in obtaining further information

Monday through Friday, or may also be viewed at the NMOCD web site: <http://www.emnrd.state.nm.us/ocd/>. Persons interested in obtaining a copy of the application and draft permit may contact the NMOCD at the address given above. Prior to ruling on any proposed discharge permit or major modification, the Director shall allow a period of at least thirty (30) days after the date of publication of this notice, during which interested persons may submit comments or request that NMOCD hold a public hearing. Requests for a public hearing shall set forth the reasons why a hearing should be held. A hearing will be held if the Director determines that there is significant public interest.

If no public hearing is held, the Director will approve or disapprove the proposed permit based on information available, including all comments received. If a public hearing is held, the director will approve or disapprove the proposed permit based on information in the permit application and information submitted at the hearing.

NOTICE OF PUBLICATION

STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

Notice is hereby given that pursuant to New Mexico Water Quality Control Commission Regulations (20.6.2.3106 NMAC), the following discharge permit application(s) has been submitted to the Director of the New Mexico Oil Conservation Division ("NMOCD"), 1220 S. Saint Francis Drive, Santa Fe, New Mexico 87505, Telephone (505) 476-3440:

(GW-294) Plains Marketing, L.P. Wayne E. Roberts, 432-686-1767, 3705 E. Hwy 158, Midland, Texas 79706, has submitted discharge permit renewal applications for the Townsend Remediation Site located in the SW/4 SW/4 of Section 11, Township 16 South, Range 35 East, NMPM, Lea County, New Mexico. Groundwater most likely to be affected in the event of an accidental discharge is at a depth exceeding 50 feet with a total dissolved solids concentration of approximately 500-2000 mg/l. The Townsend site is a crude oil release site from previous operations. The discharge permit addresses how the impacted groundwater will be cleaned up, re-injected, and how recovered crude oil including contaminated groundwater and associated operations will be properly handled, stored, and disposed of, including how spills, leaks, and other acci-

dental discharges to the surface will be managed in order to protect fresh water.

Plains Marketing, L.P. Wayne E. Roberts, 432-686-1767, 3705 E. Hwy 158, Midland, Texas 79706, has submitted discharge permit renewal applications for the following Crude Oil Pump stations. The station(s) receives, store, and transfers crude oil from various leases in Eddy and Lea Counties, New Mexico. Crude oil products, waste oil and water may be stored in above ground tanks prior to being transported off-site to OCD approved facilities. The discharge permit addresses how oilfield products and waste will be properly handled, stored, and disposed of, including how spills, leaks, and other accidental discharges to the surface will be managed in order to protect fresh water.

(GW-289) Loco Hills Crude Oil Pump Station located in the NW/4 of Section 28, Township 20 South, Range 37 East, NMPM, Lea County, New Mexico. Groundwater most likely to be affected in the event of an accidental discharge is at a depth exceeding 400 feet with a total dissolved solids concentration of approximately 3000 mg/l.

(GW-351) Lea Crude Oil Pump Station located in the SW/4 NW/4 of Section 23, Township 17 South, Range 31 East, NMPM, Lea County, New Mexico. Groundwater most likely to be affected in the event of an accidental discharge is at a depth of 30 feet with a total dissolved solids concentration of approximately 1600 mg/l.

(GW-114) Schlumberger Technology Corporation, Darwin Thompson, Facility Manager, PO Box 300 Artesia NM, 88211, has submitted a renewal application for the previously approved discharge permit (GW-114) for their Artesia Facility, located in the S of the SW of Section 4 Township 17S Range 26E, Eddy County, New Mexico, approximately 2 miles north-east of Artesia, New Mexico. Approximately 500,000 gallons of truck wash water, 180 gallons of parts cleaning solvent, 5500 gallons of used oil, 3000 pounds of used oil filters and absorbent pads, 18 cubic feet of cement testing residue, and 360 cubic feet of wash bay sludge are generated on site annually, which are collected and temporarily stored in containment vessels prior to transport and disposal at an NMOCD approved facility. Groundwater most likely to be affected by a spill, leak or accidental discharge is at a depth of approximately 9 to 17 feet, with a total dissolved solids concentration of approximately 2700 to 7500 mg/L. The discharge permit addresses how oilfield products and waste will be properly handled, stored, and disposed of, including how spills, leaks, and other accidental discharges to the surface will be managed in order to protect fresh water. The discharge permit requires that groundwater contamination at the site will be remediated according to an NMOCD-approved plan.

(GW-306) Williams Four Corners, Mr.

David Bays, Senior Environmental Specialist, 188 County Road 4900, Bloomfield, N.M. 87413, has submitted a renewal application for the previously approved discharge plan for their Trunk N Compressor Station, located in the NW/4 NE/4 of Section 17, Township 32 North, Range 7 West, NMPM, San Juan County, New Mexico, approximately 15 miles north-east of Archuleta, New Mexico. The station provides metering, compression, and dehydration services to various producers for the gathering of natural gas for treatment and delivery. Approximately 2000-8000 bbl/year of produced water/natural gas condensate; 100-5000 gal/year/unit of waste water and 500-2000 gal/year/engine of used engine oil are generated and stored in OCD approved containers on-site within a bermed area prior to disposal at an NMOCD approved facility. Groundwater most likely to be affected by a spill, leak or accidental discharge is at a depth of approximately 200-500 feet, with a total dissolved solids concentration of approximately 200-2000 mg/l. The discharge plan addresses how oilfield products and waste will be properly handled, stored, and disposed of, including how spills, leaks, and other accidental discharges to the surface will be managed in order to protect fresh water.

(GW-092) El Paso Natural Gas Company's Richard Duarte, Senior Environmental Engineer, 3801 Atrisco Blvd. NW, Albuquerque, NM 87120 has submitted a re-

newal discharge plan application for their Rio Vista compressor station, located in the SE/4 SW/4 of Section 27, Township 29 North, Range 11 West, NMPM, San Juan County, New Mexico. The facility is located south of Bloomfield, N.M., approximately 0.38 miles south of the San Juan River and one mile east of highway 550. The facility provides compression of pipeline quality natural gas via the San Juan cross-over pipeline. Approximately 8000 gallons of used lube oil, 1000 gallons of oil/waste water and 400 gallons of new oil will be stored onsite in above storage tanks (AST). These containers shall be placed upon cemented, bermed areas. Groundwater most likely to be affected by a spill, leak or accidental discharge is at a depth of approximately 30 feet, with a total dissolved solids concentration of approximately 1,200 - 4,775 mg/l. The discharge plan addresses how oilfield products and waste will be properly handled, stored, and disposed of, including how spills, leaks, and other accidental discharges to the surface will be managed in order to protect fresh water.

(GW-231) El Paso Natural Gas Company's Richard Duarte, Senior Environmental Engineer, 3801 Atrisco Blvd. NW, Albuquerque, NM 87120 has submitted a renewal discharge plan application for their Lincoln "B" compressor station, located in the E/2 SE/4 of Section 22, Township 2 South, Range 12 East, NMPM, Lincoln County, New Mexico. The facility is located 1 mile east of US 54 on

county road A32. The facility provides compression of pipeline quality natural gas via the San Juan cross-over pipeline. Approximately 1700 gallons of lube oil and 1000 gallons of oil/waste will be stored in above storage tanks (AST). These containers shall be placed upon cemented, bermed areas. Groundwater most likely to be affected by a spill, leak or accidental discharge is at a depth of approximately 30 feet, with a total dissolved solids concentration of approximately 1,200 mg/l. The discharge plan addresses how oilfield products and waste will be properly handled, stored, and disposed of, including how spills, leaks, and other accidental discharges to the surface will be managed in order to protect fresh water.

(GW-376) Champion Technologies, # 40 County Road 3145, Aztec, New Mexico 87410, has submitted a request for a new discharge plan permit for their Aztec oil and gas field service facility, located in the NW/4 NE/4 of Section 2, Township 29 North, Range 12 West, NMPM, San Juan County, New Mexico, approximately half mile east of county road 3500, 2 miles southeast of the Animas River and 5.2 miles north of the San Juan river. Approximately 20,000 gallons of oil and 67,000 gallons of down-hole treatment chemicals will be stored onsite in tote drums and above ground storage tanks. These holding tanks shall be located on cemented bermed containment areas. Groundwater most likely to be affected by a spill, leak or acci-

dental discharge is at a depth of approximately 150 feet, with a total dissolved solids concentration of approximately 1,000 - 4,000 mg/l. The discharge plan addresses how oilfield products and waste will be properly handled, stored, and disposed of, including how spills, leaks, and other accidental discharges to the surface will be managed in order to protect fresh water

The NMOCD has determined that the application is administratively complete and has prepared a draft permit. The NMOCD will accept comments and statements of interest regarding this application and will create a facility-specific mailing list for persons who wish to receive future notices. Persons interested in obtaining further information, submitting comments or requesting to be on a facility-specific mailing list for future notices may contact the Environmental Bureau Chief of the Oil Conservation Division at the address given above. The administrative completeness determination and draft permit may be viewed at the above address between 8:00 a.m. and 4:00 p.m., Monday through Friday, or may also be viewed at the NMOCD web site <http://www.emnrd.state.nm.us/ocd/>. Persons interested in obtaining a copy of the application and draft permit may contact the NMOCD at the address given above. Prior to ruling on any proposed discharge permit or major modification, the Director shall allow a period of at least thirty (30) days after the date of publication of this no-

tice, during which interested persons may submit comments or request that NMOCD hold a public hearing. Requests for a public hearing shall set forth the reasons why a hearing should be held. A hearing will be held if the Director determines that there is significant public interest.

If no public hearing is held, the Director will approve or disapprove the proposed permit based on information available, including all comments received. If a public hearing is held, the director will approve or disapprove the proposed permit based on information in the permit application and information submitted at the hearing.

Attachments: New & Mod WQCC PN Rules.pdf

Ms. Stacee Schweigert,

The NMOCD has reviewed your latest submittal public notice for the letter and sign. They are **approved** for posting and distributing.

I have reviewed your intended location for posting. See my revision below:

As per the WQCC public notice requirements are excerpted below in red along with my comments. These notices shall be posted for 30 days! The WQCC rules and regs for public notice are attached to this e-mail for your review.

- Post approved notice in English and Spanish on a 2' x 3' sign **on your facility location**. Take a photograph of sign at the time of posting and at the end of 30 days. Ensure that sign will withstand the elements for at least 30 days. "(1) for each 640 contiguous acres or less of a discharge site, prominently posting a synopsis of the public notice at least 2 feet by 3 feet in size, in English and in Spanish, at a place conspicuous to the public, approved by the department, at or near the proposed facility for 30 days"
- Post approved notice in English and Spanish on a letter sized paper (each Spanish and English) at the **convenience store** you mentioned. If they will not allow, post a 2' x 3' sign at the intersection of **County Road 3500 and County Road 3145 West of the facility**. Take a photograph of sign at the time of posting and at the end of 30 days "one additional notice, in a form approved by and may be provided by the department, shall be posted at a place located off the discharge site, at a place conspicuous to the public and approved by the department; the department may require a second posting location for more than 640 contiguous acres or when the discharge site is not located on contiguous properties"
- Mail approved PN letter(s) (Once all certified mail return receipts are received please forward them to our office.) per "(2) providing written notice of the discharge by mail, to owners of record of all properties within a 1/3 mile distance from the boundary of the property where the discharge site is located; if there are no properties other than properties owned by the discharger within a 1/3 mile distance from the boundary of property where the discharge site is located, the applicant shall provide notice to owners of record of the next nearest adjacent properties not owned by the discharger; (3) providing notice by certified mail, return receipt requested, to the owner of the discharge site if the applicant is not the owner; and"
- You should have already submitted Publications to the Farmington Daily Times per our last conversation "(4) publishing a synopsis of the notice in English and in Spanish, in a display ad at least three inches by four inches not in the classified or legal advertisements section, in a newspaper of general circulation in the location of the proposed discharge."

If you have any questions please call me.

Subject: RE: Public Notice revision

Leonard,

Attached is the revised public notice sign and letter for your review/comment. We would like to propose to display the sign at the intersection of CR 3145 and CR3100 (approximately 1/4 mile east of the Aztec facility). It is my understanding that you would also like us to place the notice in a public place, such as a convenience store. There is a convenience store approximately 3 miles south on State Road 350 that we may be able to post the notice at. If we cannot make arrangements with the convenience store, is there another location you would like us to try?

Thanks,

Stacee Schweigert

Subject: Public Notice revision

Stacee,

The NMOCD has reviewed your submitted applicant public notice. It is **not approved** per the WQCC requirements for publishing.

Please resubmit your version of the public notice. See edit reviews below (*).

I have attached a document of what an applicant public notice should read and the WQCC requirements for public notice of NEW discharge plans. Please refer to for your notice.

Review of your submitted notices (*):

1. Public Notice Signs: (I.) you are missing number 3 of the WQCC requirements of "A brief description of the activities that produce the discharge described in the application". (II.) You need to have my name, phone number and contact information for the person to reach here at the NMOCD in reference to this discharge plan permit.
2. Public Notice doc: All the required information is there except for the fact that *this* notice is the notice that we, the Department, publishes. You can not use our version of the public notice as yours.
3. Public Notice letter: the same as 1 & 2.

- Please resubmit to me ONE version of your public notice for approval. Once the ONE notice is approved please reflect it to the others, letter and facility posting.

- You must also submit to me the location where you intend to post the facility notice and conspicuous location notice for approval. The NMOCD must approve the notice locations prior to placement. A photograph must be taken of the 2' x 3' sign once placed, for both locations depending on your facility. Ensure that the sign can withstand the elements for at least 30 days.

3/27/2008

- All letters sent within a 1/3 mile radius of the facility shall be sent via certified mail. All receipts of letters shall be sent to the NMOCD once the letters are received as part of the process.
- Please request a proof of publication affidavit from the Newspaper for both version of the notice. Once received please send to the NMOCD office.
- All public notices shall also be in Spanish.

Please submit your public notice for approval.

If you have any questions please feel free to contact me.

Dear [Recipient Name]:

This letter is to inform you that Champion Technologies has submitted a request for a new discharge plan from the New Mexico Oil Conservation District to permit their Aztec oil and gas field service facility. New Mexico Administrative Code 20.6.2.3108 Public Notice and Participation, requires facilities that request a new discharge plan provide written notice to owners of record of all properties within 1/3 mile of the property boundary. The purpose of the discharge plan is to set forth in detail the methods or techniques that will be employed at the facility to ensure compliance with WQCC regulations and the Oil and Gas Act. It does not indicate or imply that a release has occurred.

(2) (1) The facility is located at (1) (# 40 County Road 3145, Aztec, New Mexico 87410) within the industrial zoned area 1/4 miles east of the intersection of Highway 350 and Country Road 3145. (3) Champion Technologies' Aztec facility is a bulk distribution center (stores and distributes) for Champion Technologies water-based and oil-based chemicals used for down-hole treatment of oil and gas wells in New Mexico and surrounding area. (4) Approximately 20,000 gallons of oil and 67,000 gallons of down-hole treatment chemicals will be stored onsite in portable containers and above ground storage tanks within concrete secondary containment areas. In the unlikely event a release occurred that escaped concrete secondary containment, groundwater most likely to be affected is at a depth of approximately 150 feet, with a total dissolved solids concentration of approximately 1,000 - 4,000 mg/l. (5)

Any interested person or persons may obtain information, submit comments or request to be placed on a facility-specific mailing list for future notices by contacting Leonard Lowe at the New Mexico OCD at 1220 South St. Francis Drive, Santa Fe, New Mexico 87505, Telephone (505) 476-3492. Approved.

APPROVED!

**NOTICE OF PUBLICATION
STATE OF NEW MEXICO
ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT
OIL CONSERVATION DIVISION**

Notice is hereby given that pursuant to New Mexico Water Quality Control Commission Regulations (20.6.2.3106 NMAC), the following discharge permit application(s) has been submitted to the Director of the New Mexico Oil Conservation Division ("NMOCD"), 1220 S. Saint Francis Drive, Santa Fe, New Mexico 87505, Telephone (505) 476-3440:

(GW-376) Champion Technologies, # 40 County Road 3145, Aztec, New Mexico 87410, has submitted a request for a new discharge plan permit for their Aztec oil and gas field service facility, located in the NW/4 NE/4 of Section 2, Township 29 North, Range 12 West, NMPM, San Juan County, New Mexico, within the industrial zoned area ¼ miles east of the intersection of Highway 350 and Country Road 3145. Champion Technologies' Aztec facility is a bulk distribution center (stores and distributes) for Champion Technologies water-based and oil-based chemicals used for down-hole treatment of oil and gas wells in New Mexico and surrounding area. Approximately 20,000 gallons of oil and 67,000 gallons of down-hole treatment chemicals will be stored onsite in portable containers and above ground storage tanks within concrete secondary containment. Groundwater most likely to be affected by a spill, leak or accidental discharge is at a depth of approximately 150 feet, with a total dissolved solids concentration of approximately 1,000 – 4,000 mg/l. The discharge plan addresses how oilfield products and waste will be properly handled, stored, and disposed of, including how spills, leaks, and other accidental discharges to the surface will be managed in order to protect fresh water.

The NMOCD has determined that the application is administratively complete and has prepared a draft permit. The NMOCD will accept comments and statements of interest regarding this application and will create a facility-specific mailing list for persons who wish to receive future notices. Any interested person or persons may obtain information, submit comments or request to be placed on a facility-specific mailing list for future notices by contacting Leonard Lowe at the New Mexico OCD at 1220 South St. Francis Drive, Santa Fe, New Mexico 87505, Telephone (505) 476-3492. The OCD will accept comments and statements of interest regarding the permit and will create a facility-specific mailing list for persons who wish to receive future notices. The administrative completeness determination and draft permit may be viewed at the above address between 8:00 a.m. and 4:00 p.m., Monday through Friday, or may also be viewed at the NMOCD web site <http://www.emnrd.state.nm.us/ocd/>. Persons interested in obtaining a copy of the application and draft permit may contact the NMOCD at the address given above.

Prior to ruling on any proposed discharge permit or major modification, the Director shall allow a period of at least thirty (30) days after the date of publication of this notice, during which interested persons may submit comments or request that NMOCD hold a public hearing. Requests for a public hearing shall set forth the reasons why a hearing should be held. A hearing will be held if the Director determines that there is significant public interest.

If no public hearing is held, the Director will approve or disapprove the proposed permit based on information available, including all comments received. If a public hearing is held, the director will approve or disapprove the proposed permit based on information in the permit application and information submitted at the hearing.

Stacee,

Your submitted revised public notice received by the NMOCD at 1:18, March 24, 2008 is approved for publishing and posting. Use this approved notice in your signs and letters.

Please request a proof of publication affidavit (English and Spanish) from the newspaper of this approved notice once printed. Then send to the NMOCD. If the incorrect notice is received then the NMOCD will request to have the correct notice published.

NOTE: Next time please publish only the NMOCD approved notice only. You could have saved more money on this notice if you had submitted the NMOCD approved noticed. You have more information then needed. In this case more is better then not enough.

Please send to me the information on the location of posting the sign notices.

If you have any questions please contact me at the information below.

Stacey,

The NMOCD has reviewed your submitted applicant public notice. It is **not approved** per the WQCC requirements for publishing.

Please resubmit your version of the public notice. See edit reviews below (*).

I have attached a document of what an applicant public notice should read and the WQCC requirements for public notice of NEW discharge plans. Please refer to for your notice.

Review of your submitted notices (*):

1. Public Notice Signs: (I.) you are missing number 3 of the WQCC requirements of "A brief description of the activities that produce the discharge described in the application". (II.) You need to have my name, phone number and contact information for the person to reach here at the NMOCD in reference to this discharge plan permit.
2. Public Notice doc: All the required information is there except for the fact that *this* notice is the notice that we, the Department, publishes. You can not use our version of the public notice as yours.
3. Public Notice letter: the same as 1 & 2.

- Please resubmit to me ONE version of your public notice for approval. Once the ONE notice is approved please reflect it to the others, letter and facility posting.

- You must also submit to me the location where you intend to post the facility notice and conspicuous location notice for approval. The NMOCD must approve the notice locations prior to placement. A photograph must be taken of the 2' x 3' sign once placed, for both locations depending on your facility. Ensure that the sign can withstand the elements for at least 30 days.

- All letters sent within a 1/3 mile radius of the facility shall be sent via certified mail. All receipts of letters shall be sent to the NMOCD once the letters are received as part of the process.

- Please request a proof of publication affidavit from the Newspaper for both version of the notice. Once received please send to the NMOCD office.

- All public notices shall also be in Spanish.

Please submit your public notice for approval.

If you have any questions please feel free to contact me.

**NOTICE OF PUBLICATION
STATE OF NEW MEXICO
ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT
OIL CONSERVATION DIVISION**

Notice is hereby given that pursuant to New Mexico Water Quality Control Commission Regulations (20.6.2.3106 NMAC), the following discharge permit application(s) has been submitted to the Director of the New Mexico Oil Conservation Division ("NMOCD"), 1220 S. Saint Francis Drive, Santa Fe, New Mexico 87505, Telephone (505) 476-3440:

(GW-376) Champion Technologies, # 40 County Road 3145, Aztec, New Mexico 87410, has submitted a request for a new discharge plan permit for their Aztec oil and gas field service facility, located in the NW/4 NE/4 of Section 2, Township 29 North, Range 12 West, NMPM, San Juan County, New Mexico, within the industrial zoned area ¼ miles east of the intersection of Highway 350 and Country Road 3145. Champion Technologies' Aztec facility is a bulk distribution center (stores and distributes) for Champion Technologies water-based and oil-based chemicals used for down-hole treatment of oil and gas wells in New Mexico and surrounding area.

Approximately 20,000 gallons of oil and 67,000 gallons of down-hole treatment chemicals will be stored onsite in portable containers and above ground storage tanks within concrete secondary containment. Groundwater most likely to be affected by a spill, leak or accidental discharge is at a depth of approximately 150 feet, with a total dissolved solids concentration of approximately 1,000 – 4,000 mg/l. The discharge plan addresses how oilfield products and waste will be properly handled, stored, and disposed of, including how spills, leaks, and other accidental discharges to the surface will be managed in order to protect fresh water.

The NMOCD has determined that the application is administratively complete and has prepared a draft permit. The NMOCD will accept comments and statements of interest regarding this application and will create a facility-specific mailing list for persons who wish to receive future notices. Any interested person or persons may obtain information, submit comments or request to be placed on a facility-specific mailing list for future notices by contacting Leonard Lowe at the New Mexico OCD at 1220 South St. Francis Drive, Santa Fe, New Mexico 87505, Telephone (505) 476-3492. The OCD will accept comments and statements of interest regarding the permit and will create a facility-specific mailing list for persons who wish to receive future notices. The administrative completeness determination and draft permit may be viewed at the above address between 8:00 a.m. and 4:00 p.m., Monday through Friday, or may also be viewed at the NMOCD web site <http://www.emnrd.state.nm.us/ocd/>. Persons interested in obtaining a copy of the application and draft permit may contact the NMOCD at the address given above. (6)

Prior to ruling on any proposed discharge permit or major modification, the Director shall allow a period of at least thirty (30) days after the date of publication of this notice, during which interested persons may submit comments or request that NMOCD hold a public hearing. Requests for a public hearing shall set forth the reasons why a hearing should be held. A hearing will be held if the Director determines that there is significant public interest.

If no public hearing is held, the Director will approve or disapprove the proposed permit based on information available, including all comments received. If a public hearing is held, the director will approve or disapprove the proposed permit based on information in the permit application and information submitted at the hearing.

Not approved, 3/24/08

**NOTICE OF PUBLICATION
STATE OF NEW MEXICO
ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT
OIL CONSERVATION DIVISION**

Notice is hereby given that pursuant to New Mexico Water Quality Control Commission Regulations (20.6.2.3106 NMAC), the following discharge permit application(s) has been submitted to the Director of the New Mexico Oil Conservation Division ("NMOCD"), 1220 S. Saint Francis Drive, Santa Fe, New Mexico 87505, Telephone (505) 476-

3440:

(GW-376) Champion Technologies, # 40 County Road 3145, Aztec, New Mexico 87410, has submitted a request for a new discharge plan permit for their Aztec oil and gas field service facility, located in the NW/4 NE/4 of Section 2, Township 29 North, Range 12 West, NMPM, San Juan County, New Mexico, within the industrial zoned area 1/4 miles east of the intersection of Highway 350 and County Road 3145. Approximately 20,000 gallons of oil and 67,000 gallons of down-hole treatment chemicals will be stored onsite in portable containers and above ground storage tanks within concrete secondary containment. Groundwater most likely to be affected by a spill, leak or accidental discharge is at a depth of approximately 150 feet, with a total dissolved solids concentration of approximately 1,000 – 4,000 mg/l. The discharge plan addresses how oilfield products and waste will be properly handled, stored, and disposed of, including how spills, leaks, and other accidental discharges to the surface will be managed in order to protect fresh water.

Deleted: approximately half mile east of county road 3500, 2 miles southeast of the Animas River and 5.2 miles north of the San Juan river

Deleted: tote drums

Deleted: These holding tanks shall be located on cemented bermed containment areas.

The NMOCD has determined that the application is administratively complete and has prepared a draft permit. The NMOCD will accept comments and statements of interest regarding this application and will create a facility-specific mailing list for persons who wish to receive future notices. Persons interested in obtaining further information, submitting comments or requesting to be on a facility-specific mailing list for future notices may contact the Environmental Bureau Chief of the Oil Conservation Division at the address given above. The administrative completeness determination and draft permit may be viewed at the above address between 8:00 a.m. and 4:00 p.m., Monday through Friday, or may also be viewed at the NMOCD web site <http://www.emnrd.state.nm.us/ocd/>. Persons interested in obtaining a copy of the application and draft permit may contact the NMOCD at the address given above. Prior to ruling on any proposed discharge permit or major modification, the Director shall allow a period of at least thirty (30) days after the date of publication of this notice, during which interested persons may submit comments or request that NMOCD hold a public hearing. Requests for a public hearing shall set forth the reasons why a hearing should be held. A hearing will be held if the Director determines that there is significant public interest.

If no public hearing is held, the Director will approve or disapprove the proposed permit based on information available, including all comments received. If a public hearing is held, the director will approve or disapprove the proposed permit based on information in the permit application and information submitted at the hearing.

The facility is located at # 40 County Road 3145, Aztec, New Mexico 87410 within the industrial zoned area ¼ miles east of the intersection of Highway 350 and Country Road 3145. Approximately 20,000 gallons of oil and 67,000 gallons of down-hole treatment chemicals will be stored onsite in portable containers and above ground storage tanks within concrete secondary containment areas. In the unlikely event a release occurred that escaped concrete secondary containment, groundwater most likely to be affected is at a depth of approximately 150 feet, with a total dissolved solids concentration of approximately 1,000 – 4,000 mg/l.

Persons interested in obtaining further information, submitting comments or requesting to be on a facility-specific mailing list for future notices may contact the Environmental Bureau Chief of the Oil Conservation Division at 1220 S. Saint Francis Drive, Santa Fe, New Mexico 87505, Telephone (505) 476-3440. Reference # GW-376.

Sincerely,

Vaughn Campbell
Sales Representative/Safety Coordinator

**NOTICE OF PUBLICATION
STATE OF NEW MEXICO
ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT
OIL CONSERVATION DIVISION (OCD)**

① (Champion Technologies) has submitted a request for a new discharge plan from the NM OCD permit for their Aztec oil and gas field service facility. The facility is located at # 40 County Road 3145, Aztec, New Mexico 87410 within the industrial zoned area ¼ miles east of the intersection of Highway 350 and Country Road 3145. Approximately 20,000 gallons of oil and 67,000 gallons of down-hole treatment chemicals will be stored onsite in portable containers and above ground storage tanks within concrete secondary containment areas. In the unlikely event a release occurred that escaped concrete secondary containment, groundwater most likely to be affected is at a depth of approximately 150 feet, with a total dissolved solids concentration of approximately 1,000 – 4,000 mg/l. ④

Persons interested in obtaining further information, submitting comments or requesting to be on a facility-specific mailing list for future notices may contact the Environmental Bureau Chief of the Oil Conservation Division at 1220 S. Saint Francis Drive, Santa Fe, New Mexico 87505, Telephone (505) 476-3440. Reference # GW-376

Subject: GW-376: Public Notice submission

Mr. Vaughn Campbell,

GW-376 was deemed administratively complete on March 5th, 2008.

The NMOCD is still waiting to review your version of the public notice.

When do we expect to have a submission of the notice?

Mr. Vaughn Campbell,

The submitted discharge plan application for the Champion Technologies Aztec facility has been determined to be **administratively complete**.

I have attached the **administratively complete Letter, Draft Permit, and OCD Public Notice** for your records.

Please submit to the NMOCD your version of the required public notice for NMOCD approval and the newspaper you intend on using for publishing notice. Note: applicant public notices shall be approved prior to the applicant publishing/posting them to the public.

It is required that for facilities applying for a NEW discharge permit perform additional duties for public noticing. I have attached the WQCC requirements for additional noticing, note all fonts in red as they pertain to NEW plans, (New & Mod WQCC PN Rules.pdf) please review and submit to the NMOCD the intended locations for the additional noticing.

If you have any questions please feel free to contact me.

Thank you for your attention.

llowe
