Re: Non-Standard Location
Northwest Pipeline Corporation
Rosa Unit #90A
2435' FSL, 2340' FEL
Section 33, T32N R6W
San Juan County, NM
Blanco Mesa Verde

Dear Mr. LeMay,

NSL-NWP.1

This is a request on behalf of Northwest Pipeline Corporation for administrative approval for a non-standard gas location in the Blanco Mesa Verde pool for the referenced well. The well has been located to avoid archaeological sites.

As you can see from the attached topographical map, most of the southeast quarter of section 33 is either in Lake Navajo or on extremely steep slopes dropping off into the lake. The rest of the quarter section is in an area of extensive archaeological activity. Cultural Resources Management Consultants, Inc. surveyed the area and found numerous sites in this quarter section. The attached map, prepared by CRMC outlines the site boundaries. The proposed location and access road will impact some of the recorded sites. The proposed location and road were chosen because the amount of archaeological excavation work that will be required at this location is relatively small.

The proposed spacing unit is the west half of Section 33, T32N, R6W, which is a standard 320 acre subdivision. As the Unit Operator of the Rosa Unit, Northwest Pipeline is the only offset operator. Attached is a plat indicating the well location and proposed spacing unit.

Thank you for your consideration and approval of this application. If you have any questions please do not hesitate to call upon me.

Sincerely,

A handwritten signature in cursive script that reads "Paul C. Thompson". The signature is fluid and matches the typed name below it.

Paul C. Thompson, P.E.
