Re: Exception for Unorthodox Location and Field Rules
San Juan 32-7 Unit #37A Well

Gentlemen:

Phillips Petroleum Company ("Phillips"), as Operator of the San Juan 32-7 Unit, requests approval for an exception from the infill well location requirements of the Blanco Mesaverde Field Rules.

The San Juan 32-7 Unit #37 well was drilled in 1962 as a dual Blanco Mesaverde/Basin Dakota well. The well was drilled on a non-standard gas proration unit containing 298.33 acres (re-surveyed at 303.66 acres) as shown on the attached C-102s. This non-standard gas proration unit (approved per Order R-1066) is composed of Lots 1, 2, SE/4 Section 8; Lot 4, W/2 SW/4 Section 9-T32N-R7W, and is located on the state line between New Mexico and Colorado.

Phillips now proposes to drill an infill Blanco Mesaverde well in this non-standard gas proration unit. At our proposed location of 2131' FSL and 2018' FEL of Section 8-T32N-R7W, the location is less than 790' from the north outer boundary of SE/4 Section 8. This location is necessary due to archeological and topographical reasons which are summarized on the attached letter from La Plata Archeological Consultants. Also enclosed is a copy of a recent survey of Section 8.

There are no affected offset Blanco Mesaverde spacing units which require notice of this application. The proposed location only encroaches towards the north, and the State of Colorado contains all northern Mesaverde offsets.

Please advise if additional information is needed.

Very truly yours,

RE: Archaeological problems related to SJ 32-7 No. 37A well pad and access

Dear Mr. Hasely:

In November, 1991, La Plata Archaeological Consultants conducted a preliminary archaeological survey of Phillips' original SJ 32-7 No. 37A well location and access road. At that time, three archaeological sites were identified within the vicinity of the project. Although the well pad could be situated to avoid sites, we were unable to find a suitable access route that did not affect cultural resources. One large site was bisected by the access route and we worked with Phillips personnel (Richard Allred) to attempt to find an alternate route that would not have any effects on cultural resources. Despite considerable effort, no alternate route could be found that would allow access to the standard well location.

As shown on the attached map, site LA88646 could not be avoided due to the size of the site and the confining topography. Sites LA89213 and LA89214 were avoidable.

We then made the recommendation in 1991 that the well be moved or canceled as there would not be any way to feasibly access the staked pad without incurring costly ar\\ mitigation of adverse effects to site LA88646.

If you have any questions, please let me know.

Sincerely,

Steven L. Fuller

Re: Exception for Unorthodox Location and Field Rules
San Juan 32-7 Unit #37A

Gentlemen:

By letter dated March 8 (copy attached) approval was requested for an exception from the infill well location requirements of the Blanco Mesaverde Field Rules.

Per request from Ernie Busch of the NMOCD's Aztec office, I am forwarding a revised C-102 for our proposed San Juan 32-7 Unit #37A well. The previous C-102 did not accurately describe the re-surveyed proration unit. Also, the well location was not based upon cardinal measurements.

The correct description of the location of this proposed infill well is 2071 feet FSL and 1938 feet FEL of Section 8-T32N-R7W. As with my previous letter, this proposed location only encroaches towards the north. Inasmuch as the State of Colorado contains all northern Mesaverde offsets, there are no affected offset Blanco Mesaverde spacing units which require notice of this application.

Dear Mr. Noah:

Reference is made to the subject application dated March 8, 1996, as amended by letter dated April 1, 1996, please submit a survey plat of this well that shows the distance from the northern boundary of its dedicated acreage (New Mexico/Colorado state line) and identify the appropriate parties owning mineral interests in the affected acreage to the north in the state of Colorado. Further, please provide proper notice to any affected off-setting party. A well that encroaches upon a state line does not necessarily preclude an applicant from notifying those mineral interest owners. Should a well be drilled a few feet from the line in Colorado wouldn't Phillips want to be notified. It is in the best interest that all states continue to work cooperatively with each other in administering its statutory obligations in the conservation of oil and gas.

Thank you for your cooperation in this matter.

(3) That said non-standard proration units are necessitated by irregular sections resulting from survey corrections in the United States Public Lands Survey.

(4) That the acreage contained in each individual proration unit should be based on the latest official surveys and resurveys accepted by the Federal Bureau of Land Management.

IT IS THEREFORE ORDERED:

(1) That the following-described non-standard gas proration units in the Basin-Dakota Gas Pool, San Juan County, New Mexico, are hereby established:

NO. R-2046, RIO ARRIBA COUNTY,
NEW MEXICO.

ORDER OF THE DIVISION

BY THE DIVISION:

This cause came on for hearing at 9 a.m. on February 17, 1982, at Santa Fe, New Mexico, before Examiner Richard L. Stamets.

NOW, on this 2nd day of March, 1982, the Division Director, having considered the testimony, the record, and the recommendations of the Examiner, and being fully advised in the premises,

FINDS:

(1) That due public notice having been given as required by law, the Division has jurisdiction of this cause and the subject matter thereof.

(2) That Division Order No. R-2046 established a large number of non-standard proration units for the Basin-Dakota Gas Pool in Rio Arriba County, New Mexico, including the following:

TOWNSHIP 30 NORTH, RANGE 6 WEST, NMPM

| <u>Tract</u> | <u>Acreage</u> | <u>Section</u> |
|--------------|----------------|---|
| A | 339.46 | 1 E/2 (This unit also contains the SE/4 of Section 36, Township 31 North, Range 6 West) |
| B | 319.69 | 1 W/2 |

TOWNSHIP 31 NORTH, RANGE 6 WEST, NMPM

| <u>Tract</u> | <u>Acreage</u> | <u>Section</u> |
|--------------|----------------|---|
| I | 337.04 | 25 E/2 36 NE/4 |
| J | 339.46 | 36 A portion of this unit contains acreage in Township 30 North, Range 6 West, described under that township. |

(3) That the applicant, Northwest Pipeline Corporation, seeks the amendment of Division Order No. R-2046, to delete the four non-standard gas proration units described in Finding No. (2) above and to create six new non-standard proration units for wells to be drilled in the Basin-Dakota Pool at standard locations.

(4) That the six new proposed non-standard units consist of the following described acreage:

TOWNSHIP 30 NORTH, RANGE 6 WEST, NMPM

| <u>Tract</u> | <u>Acreage</u> | <u>Section</u> |
|--------------|----------------|----------------|
| 1 | 272.81 | 1 N/2 |

| 4 | 272.32 | 25 S/2 |
| 5 | 272.56 | 36 N/2 |
| 6 | 272.88 | 36 S/2 |

(5) That the non-standard proration units may reasonably be presumed productive of gas from the Basin-Dakota Gas Pool and that all of the non-standard gas proration units can be efficiently and economically drained and developed by the aforesaid wells.

(6) That approval of the subject application will afford the applicant the opportunity to produce his just and equitable share of the gas in the Basin-Dakota Pool, will prevent the economic loss caused by the drilling of unnecessary wells, avoid the augmentation of risk arising from the drilling of an

excessive number of wells, and will otherwise prevent waste and protect correlative rights.

IT IS THEREFORE ORDERED:

(1) That Division Order No. R-2046 is hereby amended by deletion therefrom of the four non-standard proration units described in Finding No. (2) of this order.
