Dear Mr. LeMay,

This is a request on behalf of Kestrel Resources, Inc. for administrative approval for a non-standard gas location the above referenced Wildcat Entrada well.

The well is staked at the edge of a small mountain meadow that lies just above Boyer Lake. The proposed spacing unit is the SE/SE of Section 30, T32N, R2E, which is a regular 40 acres. The well would have to be moved 100' east to conform to the spacing requirements. However, moving the location 100' east would place it in the swamp above Boyer Lake and interfere with the drainage into the lake. The rest of the SE/SE of Section 30 is comprised of steep hillsides that would require excessive cuts and fills to build a location and would make winter access difficult.

Kestrel Resources, Inc. owns all of the offset drilling blocks. The proposed location is acceptable with the surface owner. Attached is a plat indicating the well location and proposed spacing unit and a topographical map of the area.

Thank you for your consideration and approval of this application. If you have any questions please do not hesitate to call upon me.

Sincerely,

Paul C. Thompson

Paul C. Thompson, P.E.
