Attention: William F. Carr

Administrative Order NSL-3700

Dear Mr. Carr:

Reference is made to your application on behalf of the operator, Amoco Production Company, dated July 30, 1996, for approval to drill its proposed Evelyn "35" State Com Well No. 1 at an unorthodox gas well location to test the Undesignated South Empire-Morrow Gas Pool 1730 feet from the North line and 660 feet from the East line (Unit H) of Section 35, Township 17 South, Range 28 East, NMPM, Eddy County, New Mexico. The N/2 of said Section 35 shall be dedicated to the well to form a standard 320-acre gas spacing and proration unit for said pool.

The geologic interpretation submitted with this application indicates that a well drilled at the proposed unorthodox gas well location will be at a more favorable geologic position within the Morrow formation than a well drilled at a location considered to be standard.

The application has been duly filed under the provisions of Rule 104.F of the General Rules and Regulations of the New Mexico Oil Conservation Division ("Division"), revised by Division Order No. R-10533, issued by the Oil Conservation Commission in Case 11,351 on January 18, 1996.

By the authority granted me under the provisions of Division General Rule 104.F(2), the above-described unorthodox gas well location is hereby approved.

Sincerely,

A handwritten signature in black ink, appearing to read "William J. LeMay", written over a large, stylized flourish that extends across the signature area and down towards the bottom of the page.

William J. LeMay
