Re: Application for NSL (EPCMU #33 (P-5))

Mr. Brooks:

On July 3, 2008, a Gyroscopic Survey was run to PBTD at 2925' KB in the EPCMU #33 (P-5) at the request of the Aztec Division of NMOCD based on the deviation report from 1983. The final report of the survey shows that the bottom hole location of this well is 66.48' north and 208.13' east of the top hole location. BMG is requesting approval for a non-standard location for this well in order to complete in the Mancos formation. The well was originally drilled and cased in 1983, but never completed. It is located within the East Puerto Chiquito Mancos Unit. All adjacent quarter-quarter sections to Unit P, Section 5, T26N, R1E are within the same unit. EPCMU Working and Revenue Interest Owners have the same interest throughout the unit.

Sincerely,

Zach Stradling, Engineer
