ADMINISTRATIVE APPLICATION CHECKLIST

THIS CHECKLIST IS MANDATORY FOR ALL ADMINISTRATIVE APPLICATIONS FOR EXCEPTIONS TO DIVISION RULES AND REGULATIONS WHICH REQUIRE PROCESSING AT THE DIVISION LEVEL IN SANTA FE

Application Acronyms:

[NSL-Non-Standard Location] [NSP-Non-Standard Proration Unit] [SD-Simultaneous Dedication]
 [DHC-Downhole Commingling] [CTB-Lease Commingling] [PLC-Pool/Lease Commingling]
 [PC-Pool Commingling] [OLS - Off-Lease Storage] [OLM-Off-Lease Measurement]
 [WFX-Waterflood Expansion] [PMX-Pressure Maintenance Expansion]
 [SWD-Salt Water Disposal] [IPI-Injection Pressure Increase]
 [EOR-Qualified Enhanced Oil Recovery Certification] [PPR-Positive Production Response]

[1] **TYPE OF APPLICATION** - Check Those Which Apply for [A]

- [A] Location - Spacing Unit - Simultaneous Dedication
 NSL NSP SD

Check One Only for [B] or [C]

- [B] Commingling - Storage - Measurement
 DHC CTB PLC PC OLS OLM

- [C] Injection - Disposal - Pressure Increase - Enhanced Oil Recovery
 WFX PMX SWD IPI EOR PPR

- [D] Other: Specify _____

[2] **NOTIFICATION REQUIRED TO:** - Check Those Which Apply, or Does Not Apply

- [A] Working, Royalty or Overriding Royalty Interest Owners
- [B] Offset Operators, Leaseholders or Surface Owner
- [C] Application is One Which Requires Published Legal Notice
- [D] Notification and/or Concurrent Approval by BLM or SLO
U.S. Bureau of Land Management - Commissioner of Public Lands, State Land Office
- [E] For all of the above, Proof of Notification or Publication is Attached, and/or,
- [F] Waivers are Attached

[3] **SUBMIT ACCURATE AND COMPLETE INFORMATION REQUIRED TO PROCESS THE TYPE OF APPLICATION INDICATED ABOVE.**

[4] **CERTIFICATION:** I hereby certify that the information submitted with this application for administrative approval is **accurate and complete** to the best of my knowledge. I also understand that **no action** will be taken on this application until the required information and notifications are submitted to the Division.

Note: Statement must be completed by an individual with managerial and/or supervisory capacity.

Michael E. Stogner
Oil Conservation Division
1220 South St. Francis Drive
Santa Fe, New Mexico 87505

Dear Mr. Stogner:

Pursuant to Division Rule 104.F(2), Apache Corporation applies for administrative approval of an unorthodox oil well location for the following well:

Well: State C Tract 12 Well No. 15
Location: 1240 feet FNL & 1400 feet FWL
Well Units: NE $\frac{1}{4}$ NW $\frac{1}{4}$ (oil) and NW $\frac{1}{4}$ (gas) of Section 16,
Township 21 South, Range 37 East, N.M.P.M.,
Lea County, New Mexico

The well will be drilled to test the Grayburg formation (Penrose Skelly (Grayburg) Pool) and the deeper San Andres formation (Undesignated Hare-San Andres Gas Pool). The Penrose Skelly (Grayburg) Pool is an oil pool spaced on 40 acres, and the Hare-San Andres Gas Pool is spaced on 160 acres. The location is unorthodox in the Grayburg, but orthodox in the San Andres.

The NE $\frac{1}{4}$ NW $\frac{1}{4}$ of Section 16 will be **simultaneously dedicated** in the Grayburg formation to the proposed well and to the State C Tract 12 Well Nos. 9 and 13, and applicant requests approval of the simultaneous dedication. (The proposed well is the first San Andres well in the quarter section.)

The application is based on geologic and engineering reasons. A complete discussion, with appropriate exhibits, is attached as Exhibit A.¹ There are several existing Grayburg wells in the NW $\frac{1}{4}$ of Section 16, and the proposed well will be located in the

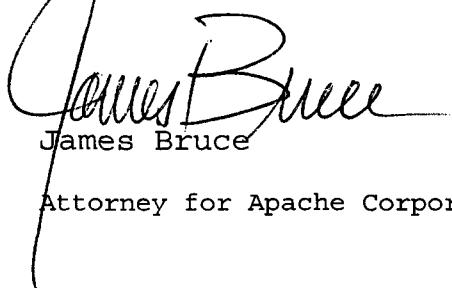

¹Exhibit 1 to the attachment, the Form C-102, is missing, and will be supplied later.

approximate center of those wells. Based on drainage calculations and the variable permeability in the reservoir, applicant believes that drilling the infill well will recover reserves which will not be recovered by the existing Grayburg wells. Applicant desires to complete in both the Grayburg and the San Andres to enhance project economics.

Attached as Exhibit B is a land plat, highlighting the proposed well's location. The NW $\frac{1}{4}$ of Section 16 is covered by a single lease (State Lease B-1557-1), which has **common royalty, overriding royalty, and working interest ownership**. Therefore, there are no offset interest owners or adversely affected parties to notify of this application.

Please call me if you need any further information on this matter.

Very truly yours,

James Bruce
Attorney for Apache Corporation

Application of Apache Corporation for administrative approval of an unorthodox well location:

40 acres – 1240' FNL & 1400' FWL
Section 16, Township 21 South, Range 37 East, NMPM
Lea County, New Mexico

PRIMARY OBJECTIVE: SAN ANDRES

SECONDARY OBJECTIVE: GRAYBURG

In support:

1. Apache Corporation (Apache) is the operator of the proposed **State C Tract 12 #15** well (**Exhibit 1**). The proposed total depth is 4725' in the San Andres formation.
2. The location is a standard location as to the San Andres (Hare; San Andres Gas Pool). However, it encroaches toward the following Penrose Skelly; Grayburg Oil wells (**Exhibit 2**).

OPER	WELL	LOC	RESERVOIR	CUM O/G/W	DAILY O/G/W
Apache	State C Tract 12 #8	16-D	Grayburg	20/154/44	24/205/34
Apache	State C Tract 12 #9	16-C	Grayburg	9/93/96	14/192/186
Apache	State C Tract 12 #13	16-C	Grayburg	4/13/12	76/221/209
Apache	State C Tract 12 #10	16-F	Grayburg	16/74/52	22/133/65
Apache	State C Tract 12 #1	16-E	Grayburg	22/181/9	0/0/0
Apache	State C Tract 12 #11	16-E	Grayburg	23/205/38	36/294/38

Oil in MBO
Gas in MMCFG
Water in MBW BOPD

 BWPD

3. The proposed **State C Tract 12 #15** unorthodox Grayburg location of 1240' from north line and 1400' from west line is based on drainage considerations:
 - a) **Grayburg Reservoir**

The Grayburg is a series of alternating subtidal and supratidal dolomites, with the subtidal rock having porosity and hydrocarbons and the supratidal rock being tight. The Grayburg environments varied rapidly so that porous and tight intervals do not necessarily correlate well-to-well. Tight dolomite and/or anhydrite intervals within the Grayburg additionally create vertical hydraulic barriers between different zones of porosity. Average porosity of the Grayburg is less than 10%, and average permeability is less than 1 millidarcy. Grayburg wells are thus not typically capable of draining the 40 Acre proration unit.

The reservoir was analyzed by mapping Hydrocarbon Pore Volume (HCPV) (**Exhibit 3**). HCPV is the product of feet of pay (h) times average porosity (PhiA) times oil saturation (So). The map is the arithmetic product of grids interpreted from those values. The values were obtained as follows:

1. Net Pay was read either from modern neutron-density logs or estimated from a map developed from gross pay (clean dolomite) times net to gross ratio.
2. Average Porosity was calculated from modern well logs using a minimum of 6% crossplot porosity and a maximum of 20%.
3. Oil Saturation was calculated from a fractional flow curve using recent water cut values.

The following table provides drainage areas calculated from the HCPV map and reserves of the offsetting wells.

OPER	WELL	LOC	AREA A	EUR MBO	EUR MMCFIG
Apache	State C Tract 12 #8	16-D	23	81	891
Apache	State C Tract 12 #9	16-C	20	46	505
Apache	State C Tract 12 #13	16-C	61	67	632
Apache	State C Tract 12 #10	16-F	15	39	310
Apache	State C Tract 12 #1	16-E	6	22	181
Apache	State C Tract 12 #11	16-E	19	95	1364

Reserves for the proposed location are calculated by planimetering the undrained area of the HCPV isopach which lies under a drainage circle (the size of which is the average of the direct offset drainage areas) centered on the proposed location. Any competitive drainage is shared between the proposed well and the existing offset wells. The results are as follows:

WELL	LOC	HCPV	AREA A	EUR MBO	EUR MMCFG
State C Tract 12 #15	16-C	3.02	16.5	61	732

4. Notice
 - a. Apache is the operator of the Grayburg wells toward which the proposed well will encroach. There are no other working interest owners in any of the proration units.
5. Approval of this application will afford the interest owners in this spacing unit an opportunity to recover oil and gas which would not otherwise be recovered.

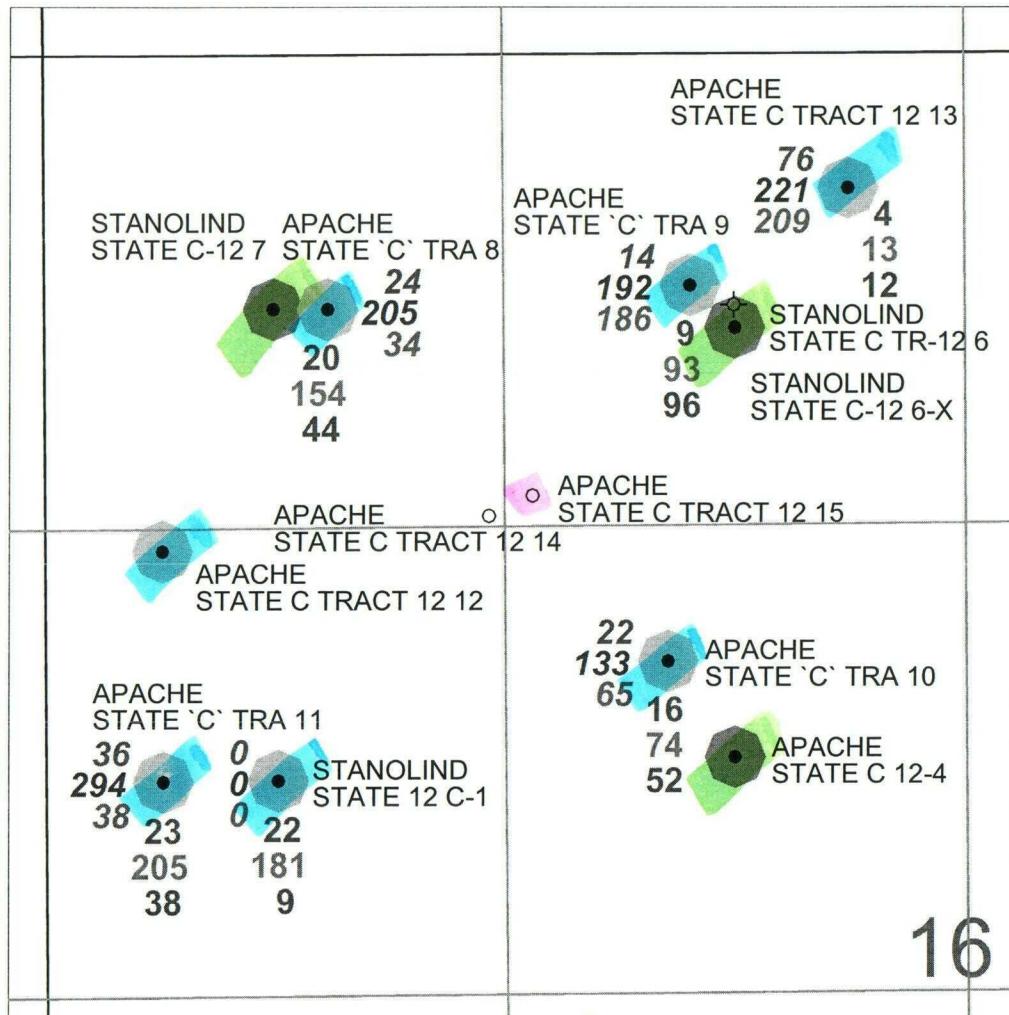

NOTIFICATION LIST

Application of Apache Corporation for Administrative
Approval of an unorthodox well location:

State C Tract 12 # 15 Well
