NATURE OF RELEASE

Type of Release PRODUCED WATER	Volume of Release 1240 BBLS	Volume Recovered 390 BBLS
Source of Release TRANSFER PUMP	Date and Hour of Occurrence unknown	Date and Hour of Discovery 7-12-08 @ 10:15am
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Larry Johnson NMOCD and Jim Amos BLM	
By Whom? Kelton Beaird Oxy HES	Date and Hour 7-12-08 11:05am	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*
Swedge broke on the transfer pump. All fluids were vacuumed up. Area inside the berm is about 80' long by 20' wide. The spill ran across the location, puddled up in an area approx. 20' X 10'. The spill also ran west of the location into the pasture approx. 10' long by 3' wide. The chloride concentration of the produced water out of the pump is 150,000ppm.

Describe Area Affected and Cleanup Action Taken.* A plat map, field analytical and lab confirmation are attached. Due to ongoing production only 2' of impacted soil was excavated inside the battery, then 2' of clean soil was backfilled and the battery was lined with a 20 mil poly liner. Outside of the battery the impacted soil was excavated to below 250 ppm of chlorides. The impacted soil was hauled to CRI Disposal. The location was rebuilt with clean caliche.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
