**Cc:** mbroussard@knightoiltools.com; 'Ricky Calais'  
**Subject:** RE: Hobbs Public Notice Affidavit  
**Attachments:** Returned Pub Not Letters.pdf

Mr. Lowe,

I've attached the envelopes we go back on the Hobbs mail outs, I apologize for not getting the Return Receipts as I misunderstood, thinking the transaction receipts would suffice. I will send Farmington's Public Notices w/ Return Receipts Requested.

Sorry for all the delays, still waiting on San Juan County's response on the TDS background. I'll try again.

Thanks for your patience,  
Clay Courville

**Subject:** RE: Hobbs Public Notice Affidavit

Some of them came back as undeliverable in Hobbs. Please let me know who to contact with the St. Engineers office so I may get an answer on the background TDS in Farmington. No luck with them so far.

Thanks,  
Clay

I just need the certified mail receipts once you have received them.

What is the status of TDS of the Farmington facility?

## LEGAL NOTICE DECEMBER 6, 2008

Knight Fishing Services, Inc., 1718 S. Dal Paso, Hobbs, New Mexico 88240, has submitted an application to the New Mexico Energy, Minerals and Natural Resources Department, Oil Conservation Division for a new discharge plan permit (GW-381) for their fishing tool rental and service yard located in the SE/4 SE/4 of Section 02, Township 19 South, Range 38 East in Lea County, New Mexico. The physical address of the facility is 1718 S. Dal Paso, New Mexico, 88240.

The facility provides oil and gas well down hole, fishing tools, rentals and services. Materials generated or used at the facility include diesel fuel, hydraulic oil, down hole cleaning soaps (Unichem 9120), misc. low voc paint products, used oil, lead free joint compound, new and used cleaning solvent (Safety Kleen Gold) and sump wastewater. All liquids utilized at the facility are stored in dedicated above ground storage tanks prior to offsite disposal or recycling at an OCD approval site. Sump wastewater is soted within an in-ground 4 by 4 by 3 ft. steel / concrete reinforced sump. All storage tanks are within prperly engineered and OCD approved secondary containments. Approximately 150 gallons per month of sump wastewater, 90 gallons per month used cleaning solvent and 5 gallons per month used oil is generated at the facility for disposal. The aquifier most likely to be affected is 53 feet in depth, and the total dissolved solids concentration of this aquifier is approximately 420 mg/l.

Any interested person or persons may obtain information, submit comments or request to be placed on a facility-specific mailing list for future notices by contacting Leonard Lowe at the New Mexico OCD at 1220 South St. Francis Drive, Santa Fe, New Mexico 87505, Telephone (505) 476-3492. The OCD will accept comments and statements of interest regarding the renewal and will create a facility-specific mailing list for persons who wish to receive future notices.

## LEGAL NOTICE DECEMBER 6, 2008

Knight Fishing Services, Inc., 1718 S. Dal Paso, Hobbs,  
New Mexico 88240, lemitido una aplicacion al departa-  
mento New Mexico Energy, Minerals and Natural Resource  
Department, Oil Conservation Division para un permiso  
(GW-381) plan de descarga Nuevo, para su propiedad para  
rentar herramienta fishing tool y su yarda de servicio ubi-  
cada en SE/4 SE/4 Section 02, Township 19 South, Range  
38 East en el condado de Lea, New Mexico. La direccion  
actual es 1718 S. Dal Paso, New Mexico, 88240.

La ubicacion provee servicios y herramienta fishing tool  
de renta para norias de aceite y gas. Materiales generados  
o usados en la ubicacion incluyen carburante de diesel,  
aceite hydraulic, jabon para limpiar las norias (Unichem  
9120), miscelaneo, productos de pintura low voc, aceite  
usado, compuesto de junta sin plomo, solvente nuevo y  
usado para limpiar (Safety Klean Gold) y agua residuales  
de sump. Todos los liquidos utilizados en la ubicacion o  
reciclar en un sitio aprobado por el OCD. Aguas residuales de  
sump estan almacenados dentro de un recipiente se-  
cundario apropiadamente disenado y aprobado por el  
OCD. Aproximadamente 150 galones de agua residuales  
de sump, 90 galones por mes de solvente de limpieza y 5  
galones por mes de aceite usado son generados en la ubi-  
cacion para desechar. El acifero que seria afectado esta  
a 53 piez de profundo, y un total de concentracion de liqui-  
dos disueltos de este acifero son 420 mg/l.

Cualquier persona o personas interesadas pueden obtener  
informacion, entregar su comentarios o solicitar ser puesto  
en una lista de correo especifica de facilidad para noticias  
en el futuro al comunicarse con Leonard Lowe al New Mex-  
ico OCD en 1220 South St. Francis Drive, Santa Fe, New  
Mexico 87505, telefono (505) 476-3492. En OCD aceptar  
commentaries y declaraciones de interes referente a la re-  
novacion y crear una lista de correo especifica de faci-  
lidad para personas que desean recibir noticias e el futuro.

(GW-384) Capitan Chemical LLC, 3206 N. Enterprise Drive, Hobbs N.M. 88241 has submitted an application for a new discharge plan for their Oil and Gas Service Company, located in unit letter L of Section 21, Township 18 South, Range 38 East, NMPM, Lea County, New Mexico. The facility blends proprietary formulations from various raw materials and intermediate products supplied by various sources for the oil and gas industry. The facility procures and maintains approximately 8 - 10 containers of acids and caustics, 700 gallons of detergents, 1600 gallons of solvents and 3500 gallons of paraffin/emulsion breakers. Liquids other than water shall be maintained in a status as to prevent contamination to surface and ground water quality, including vadose zones. Groundwater most likely to be affected by a spill, leak or accidental discharge is at a depth of approximately 100 feet, with a total dissolved solids concentration of approximately 60 mg/L. The discharge plan addresses how oilfield products and waste will be properly handled, stored, and disposed of, including how spills, leaks, and other accidental discharges to the surface will be managed in order to protect fresh water.

(GW-276) Hydrostatic Pipe Service, Inc. 3030 West Marland, Hobbs, N.M. 88240 has submitted a renewal discharge plan application for their previously expired permit for their Oil and Gas Service Company, located in SE/4 SW/4 of Section 32, Township 18 South, Range 38 East, NMPM, Lea County, New Mexico. The facility stores and maintains trucks used to test tubing in oil and gas wells. Approximately 1200 gallons/year of wash down water, 360 gallons/year of used motor oil, 7000 gallons of diesel and 5000 gallons/year of brine water are used, generated and stored on site. Groundwater most likely to be affected by a spill, leak or accidental discharge is at a depth of approximately 34 feet, with a total dissolved solids concentration of approximately 1310 mg/L. The discharge plan addresses how oilfield products and waste will be properly handled, stored, and disposed of, including how spills, leaks, and other accidental discharges to the surface will be managed in order to protect fresh water.

(GW-377) Southern Union Gas Services, Ltd. , 301 Commerce Street, Suite 700, Fort Worth Texas 76102, has submitted an application for a new discharge plan for their Adobe compressor station, operating at 330 HP, located in unit letter K of Section 23, Township 20 South, Range 38 East, NMPM, Lea County, New Mexico, approximately 8 miles northeast of Eunice. The facility provides natural gas compression, removal of excess liquids, the measuring and transport of gas to pipelines. Approximately 100 - 200 gallons/month of used oil, 78-200 gallons/month of wash/storm water and 50 - 100 bbl/month of gas liquids will be generated on site along with other solid wastes. The discharge plan summarizes the specifics of generated waste at this facility. Groundwater most likely to be affected by a spill, leak or accidental discharge is at a depth of approximately 20 - 75 feet, with a total dissolved solids concentration of 375 - 630 mg/L. The discharge plan addresses how oilfield products and waste will be properly handled, stored, and disposed of, including how spills, leaks, and other accidental discharges to the surface will be managed in order to protect fresh water.

\* (GW-381) Knight Fishing Services, 1718 S. Dal Paso, Hobbs New Mexico, 88240 has submitted an application for a new discharge plan for their Oil and Gas Service Company, located in Unit Letter M in Section 2, Township 19 South, Range 12 West, NMPM, Lea County, New Mexico. The facility is a fishing tool string supplier to the oil and gas service industry. Approximately 1000 gallons of diesel, 300 gallons of hydraulic oil, and 500 gallons of Unichem 9120 are to be stored onsite and to be maintained within bermed areas with secondary containment and not to be discharged on to the ground. Groundwater most likely to be affected by a spill, leak or accidental discharge is at a depth of approximately 35 feet, with a total dissolved

Notice is hereby given that pursuant to New Mexico Water Quality Control Commission Regulations (20.6.2.3106 NMAC), the following discharge permit application(s) has been submitted to the Director of the New Mexico Oil Conservation Division ("NMOCD"), 1220 S. Saint Francis Drive, Santa Fe, New Mexico 87505, Telephone (505) 476-3440:

(GW-384) Capitan Chemical LLC, 3206 N. Enterprise Drive, Hobbs N.M. 88241 has submitted an application for a new discharge plan for their Oil and Gas Service Company, located in unit letter L of Section 21, Township 18 South, Range 38 East, NMPM, Lea County, New Mexico. The facility blends proprietary formulations from various raw materials and intermediate products supplied by various sources for the oil and gas industry. The facility procures and maintains approximately 8 - 10 containers of acids and caustics, 700 gallons of detergents, 1600 gallons of solvents and 3500 gallons of paraffin/emulsion breakers. Liquids other than water shall be maintained in a status as to prevent contamination to surface and ground water quality, including vadose zones. Groundwater most likely to be affected by a spill, leak or accidental discharge is at a depth of approximately 100 feet, with a total dissolved solids concentration of approximately 60 mg/L. The discharge plan addresses how

Commission Expires: May 31, 2011

oilfield products and waste will be properly handled, stored, and disposed of, including how spills, leaks, and other accidental discharges to the surface will be managed in order to protect fresh water.

(GW-276) Hydrostatic Pipe Service, Inc. 3030 West Marland, Hobbs, N.M. 88240 has submitted a renewal discharge plan application for their previously expired permit for their Oil and Gas Service Company, located in SE/4 SW/4 of Section 32, Township 18 South, Range 38 East, NMPM, Lea County, New Mexico. The facility stores and maintains trucks used to test tubing in oil and gas wells. Approximately 1200 gallons/year of wash down water, 360 gallons/year of used motor oil, 7000 gallons of diesel and 5000 gallons/year of brine water are used, generated and stored on site. Groundwater most likely to be affected by a spill, leak

or accidental discharge is at a depth of approximately 34 feet with a total dissolved solids concentration of approximately 1310 mg/L. The discharge plan addresses how oilfield products and waste will be properly handled, stored, and disposed of, including how spills, leaks, and other accidental discharges to the surface will be managed in order to protect fresh water.

(GW-377) Southern Union Gas Services, Ltd. 301 Commerce Street, Suite 700, Fort Worth Texas 76102, has submitted an application for a new discharge plan for their Adobe compressor station, operating at 330 HP, located in unit letter K of Section 23, Township 20 South, Range 38 East, NMPM, Lea County, New Mexico, approximately 8 miles north-east of Eunice. The facility provides natural gas compression, removal of excess liquids, the measuring and transport of gas to pipelines. Approximately 100 - 200 gallons/month of used oil, 78-200 gallons/month of wash/storm water and 50 - 100 bbl/month of gas liquids will be generated on site along with other solid wastes. The discharge plan summarizes the specifics of generated waste at this facility. Groundwater most likely to be affected by a spill, leak or acci-

dental discharge is at a depth of approximately 20 - 75 feet, with a total dissolved solids concentration of 375 - 630 mg/L. The discharge plan addresses how oilfield products and waste will be properly handled, stored, and disposed of, including how spills, leaks, and other accidental discharges to the surface will be managed in order to protect fresh water.

(GW-381) Knight Fishing Services, 1718 S. Dal Paso, Hobbs New Mexico, 88240 has submitted an application for a new discharge plan for their Oil and Gas Service Company, located in Unit Letter M in Section 2, Township 19 South, Range 12 West, NMPM, Lea County, New Mexico. The facility is a fishing tool string supplier to the oil and gas service industry. Approximately 1000 gallons of diesel, 300 gallons of hydraulic oil, and 500 gallons of Unichem 9120 are to be stored onsite and to be maintained within bermed areas with secondary containment and not to be discharged on to the ground. Groundwater most likely to be affected by a spill, leak or accidental discharge is at a depth of approximately 35 feet with a total dissolved solids concentration of approximately 1000 mg/L. The discharge plan addresses how oilfield products and

waste will be properly handled, stored, and disposed of, including how spills, leaks, and other accidental discharges to the surface will be managed in order to protect fresh water.

The NMOCD has determined that the application is administratively complete and has prepared a draft permit. The NMOCD will accept comments and statements of interest regarding this application and will create a facility-specific mailing list for persons who wish to receive future notices. Persons interested in obtaining further information, submitting comments or requesting to be on a facility-specific mailing list for future notices may contact the Environmental Bureau Chief of the Oil Conservation Division at the address given above. The administrative completeness determination and draft permit may be

address between 8:00 a.m. and 4:00 p.m., Monday through Friday, or may also be viewed at the NMOCD web site <http://www.emnrd.state.nm.us/ocd/>. Persons interested in obtaining a copy of the application and draft permit may contact the NMOCD at the address given above. Prior to ruling on any proposed discharge permit or major modification, the Director shall allow a period of at least thirty (30) days after the date of publication of this notice, during which interested persons may submit comments or request that NMOCD hold a public hearing. Requests for a public hearing shall set forth the reasons why a hearing should be held. A hearing will be held if the Director determines that there is significant public interest.

If no public hearing is held, the Director will approve or disapprove the proposed permit based on information available, including all comments received. If a public hearing is held, the director will approve or disapprove the proposed permit based on information in the permit application and information submitted at the hearing.

Mr. Lowe,

The attached represents the relevant addresses found by the Lea County Assessor's office. Copies of the Public Notice are being mailed to each today. The Hobbs Sun News did confirm the notice did run and should be forwarding the proof of publication by tomorrow.

Do you need copies of the "Green Cards" when I get them back?

Thanks,  
Clay

**Public Notice**  
The State of Texas, Department of Transportation, District 10, is currently conducting a study to determine the feasibility of constructing a new toll road from the intersection of State Highway 101 and State Highway 102 to the intersection of State Highway 101 and State Highway 103. The proposed toll road would be approximately 10 miles long and would provide a direct route between the two highways. The proposed toll road would be constructed in two phases. The first phase would be from the intersection of State Highway 101 and State Highway 102 to the intersection of State Highway 101 and State Highway 103. The second phase would be from the intersection of State Highway 101 and State Highway 103 to the intersection of State Highway 101 and State Highway 104. The proposed toll road would be a toll road and would be subject to the Texas Toll Road Act. The proposed toll road would be subject to the Texas Toll Road Act. The proposed toll road would be subject to the Texas Toll Road Act. The proposed toll road would be subject to the Texas Toll Road Act.

**AVISO AL PÚBLICO**  
El Estado de Texas, Departamento de Transportación, Distrito 10, está actualmente realizando un estudio para determinar la viabilidad de construir una nueva carretera de peaje que conecte la intersección de la Carretera Estatal 101 y la Carretera Estatal 102 con la intersección de la Carretera Estatal 101 y la Carretera Estatal 103. La carretera de peaje propuesta tendría una longitud de aproximadamente 10 millas y proporcionaría una ruta directa entre las dos carreteras. La carretera de peaje propuesta se construiría en dos fases. La primera fase sería desde la intersección de la Carretera Estatal 101 y la Carretera Estatal 102 hasta la intersección de la Carretera Estatal 101 y la Carretera Estatal 103. La segunda fase sería desde la intersección de la Carretera Estatal 101 y la Carretera Estatal 103 hasta la intersección de la Carretera Estatal 101 y la Carretera Estatal 104. La carretera de peaje propuesta sería una carretera de peaje y estaría sujeta a la Ley de Carreteras de Peaje de Texas. La carretera de peaje propuesta estaría sujeta a la Ley de Carreteras de Peaje de Texas. La carretera de peaje propuesta estaría sujeta a la Ley de Carreteras de Peaje de Texas. La carretera de peaje propuesta estaría sujeta a la Ley de Carreteras de Peaje de Texas.

Mr. Lowe,

Yes sir, we will supply the containment plans for review prior to installation, it will encompass all three AST's as well as drum waste. I am not certain as of yet when exactly it is due to be constructed. Prior to removal the remainder of the former containment area will be remediated. The attached pictures show the partial remediation performed in this area.

I have more pictures of the area of excavation and will attach to another email. The materials stockpiled on and under cover. We will complete the disposal profile and include the remainder of soils to be removed upon modification of the containment area.

A 2' by 3' foot sign with the Public Notice in English and Spanish will be posted on the front entrance to the facility.

Thanks,  
Clay

**To:** Clayton Courville  
**Subject:** GW-381 Application Questions

Mr. Clay Courville,

A few questions on the submitted application for the Knight Fishing Service discharge plan:

1. # 8 AST areas: it is stated in the application that an addendum will be submitted to the OCD when the containments are installed. What sort of containments are you putting in? Is the new containment for all three identified AST's? When do you intend on getting these installed? Note: It would be wise to have OCD review of any modifications pertaining to the site prior to installing.
2. Can you submit a copy of the latest inspection log?
3. These photos were taken behind (on the east side) of the "wash rack" building, I'm assuming the WWTS area per Figure 2 of the application. Has this area been cleaned up?

Thank you for your attention.

llowe

Mr. Dean Cole  
Knight Oil Tools, Inc.  
2727 S.E. Evangeline Thrwy.  
Lafayette, LA 70508

**Re: Knight Oil Tools – Hobbs, NM Facility**  
Remedial Activities – AST Containment Area  
Drum / AST Consolidation  
Former Suspect UST

Dear Mr. Cole:

EDI Environmental Services, Inc. (EDI) is pleased to provide the following information concerning EDI's site visit on July 11<sup>th</sup>, 2007 and the completion of recommendations noted in the reviewed June 2007 Phase I Site Assessment performed by AEI.

During the initial site visit (July 2007) EDI noted visual hydrocarbon staining present around the AST containment area and recommended a remediation be performed to limit the migration of the hydrocarbon fluids. As the majority of the stained area laid above asphalt, EDI recommended removing the accessible soils and spreading a loose absorbent material ("Floor Sweep") over the remaining areas to be removed and disposed once saturated. EDI then recommended applying a bio-enhancer product to the affected area to expedite the natural degradation of any remaining contamination.

**Remedial Activity Summary: (AST Area Tract C)**

As per the attached Photo – 1, Knight Oil tools has removed the accessible soils and applied "Floor Sweep" over the remaining affected areas. The removed material is currently being profiled for disposal by Controlled Recovery, Inc. (CRI) located in Hobbs, NM. Once saturate, the remaining material will also be containerized in 55 gallon steel drums and disposed by CRI.

EDI is currently comprising an SPCC plan within the Storm Water Pollution Prevention Plan (SWPP) for this facility. As per the New Mexico Oil Conservation District (OCD) an SWPP should be kept on-site and renewed every 5 years.

**Drum / AST Consolidation: (Future Construction on acquired property)**

It is understood by EDI that a new containment area is to be constructed upon acquiring the adjacent property. EDI will re-evaluate the containment area when completed and prepare the appropriate SWPP / SPCC plan updates. EDI also understands all AST's and drums will be consolidated within the new containment area.

Any remaining hydrocarbon contamination around the former AST and/or drum storage area will be remediated upon the consolidation of the containers.

**Suspect Underground Storage Tank: (Tract C)**

The suspect UST was exempt from NMED UST Regulations as per NMED Title 20 Ch. 5 Part I.C. (1) (2) (4) and (7). The UST in question was formerly used as part of a "Flow-thru Process System" by Baker Atlas Wireline, a previous tenant.

The UST was removed to eliminate any future subsurface liabilities.

EDI appreciates the opportunity to provide Knight Oil Tools with this service. If you have any questions or require clarification, please contact our office at (337) 264-9810.

Sincerely,  
**EDI Environmental Services, Inc.**

  
Clayton Courville, RSO  
President

**Attachments:** New & Mod WQCC PN Rules.pdf

Your indicated locations for notices is denied.

The signs (2' x 3') will need to be posted outside on the facility parameter (i.e. fence) and one other in a conspicuous place within the community, please submit to the OCD the other location. These signs shall be posted for at least 30 days, minimum. Submit to the OCD photos of these signs when placed with a date.

Your approved notice shall be translated in to Spanish and posted as well.

Notices shall also be sent to all residences/landowners within 1/3 mile radius of the discharger's location AND to the land owner of the discharger, if not the applicant.

Your published noticed, in Spanish and in English shall be published ONCE. Once published a proof of publication affidavit shall be sent to the OCD office.

I have attached the WQCC rules and regs pertaining to NEW applications. Please review.

**Subject:** RE: Sumps/Below Grade Tanks for GW-381

Mr. Lowe,

Sump identification (Wash bay Sump)

Approximate location via a facility schematic (Sump is located in back shop, as depicted on submitted facility diagram)

Usual fluids the sump contains (waste water)

Does it contain fluids indefinitely (periodic sump clean out is performed for solids/oily buildup)

Volumetric capacity (approx. 300 gallons)

Do the sumps have a secondary containment with leak detection (tank within a tank, visual or sensor detection)? No. concrete reinforced, part of flow through process system.

The "Public Notice" is to be posted in the front office reception area, and "Right-To-Know" Station.

10/17/2008

## How Long do we have to run the "Public Notice" in the local paper?

Thanks,  
Clay

**Importance:** High

Mr. Courville,

Re: GW-381 new permit application.

Does this facility have any sumps or below grade tanks? If so could you please submit to me the following information on them?

Sump identification (name)  
Approximate location via a facility schematic  
Usual fluids the sump contains (waste water, etc.)  
Does it contain fluids indefinitely (yes/no)  
Volumetric capacity (gals)  
Do the sumps have a secondary containment with leak detection (tank within a tank, visual or sensor detection)?

Also,

Where do you intend to post your signs?

Thank you,

2<sup>nd</sup> Attempt.

PUBLIC NOTICE

✓ need to correct  
S 1/4 to SE 1/4

① ✓  
Knight Fishing Services, Inc., 1718 S. Dal Paso, Hobbs, New Mexico 88240, has submitted an application to the New Mexico Energy, Minerals and Natural Resources Department, Oil Conservation Division for a new discharge plan permit (GW-381) for their fishing too rental and service yard located in the S 1/4, S 1/4 of Section 02, Township 19 South, Range 38 East in Lea County, New Mexico. The physical address of the facility is 1718 S. Dal Paso, New Mexico, 88240. . ② ✓

③ ✓  
The facility provides oil and gas well down hole fishing tool rentals and services. Materials generated or used at the facility include diesel fuel, hydraulic oil, down hole cleaning soaps (Unichem 9120), misc. low voc paint products, used oil, lead free joint compound, new and used cleaning solvent (Safety Kleen Gold) and sump wastewater. All liquids utilized at the facility are stored in dedicated above ground storage tanks prior to offsite disposal or recycling at an OCD approved site. Sump wastewater is stored within an in-ground 4 by 4 by 3 ft. steel / concrete reinforced sump. All storage tanks are within properly engineered and OCD approved secondary containments. Approximately 150 gallons per month of sump wastewater, 90 gallons per month used cleaning solvent and 5 gallons per month used oil is generated at the facility for disposal. The aquifer most likely to be affected is 53 feet in depth, and the total dissolved solids concentration of this aquifer is approximately 420 mg/l. ④ ✓

Any interested person or persons may obtain information; submit comments or request to be placed on a facility-specific mailing list for future notices by contacting Leonard Lowe at the New Mexico OCD at 1220 South St. Francis Drive, Santa Fe, New Mexico 87505, Telephone (505) 476-3492. The OCD will accept comments and statements of interest regarding the renewal and will create a facility-specific mailing list for persons who wish to receive future notices. ⑤ ✓

APPROVED 9.30.08

**Re:** Knight Fishing Services  
Hobbs, NM  
Discharge Permit GW-381  
Proposed Public Notice

Dear Mr. Lowe:

EDI Environmental Services, Inc. (EDI) on behalf of Knight Fishing Services is pleased to provide the attached "Proposed Public Notice" for review. Please note the "Proposed Public Notice" would be published in the "Hobbs News Sun".

If you have any questions or require amendments, please contact our office at (337) 264-9810.

Sincerely,  
**EDI Environmental Services, Inc.**

Clayton Courville, RSO  
President

att: "Proposed Public Notice"

cc: Mr. Eric Taylor, Knight Fishing – Hobbs, NM  
Mr. Keith Alexander, Knight Fishing – Regional Manager  
Mr. Mickey Broussard, Knight Oil Tools – Sn. Vice President Operations

**Public Notice**

**\*As per Subsection F of 20.6.2.3108 NMAC**

**Proposed Potential Discharger:**

Knight Fishing Services, Inc. ①  
1718 South Dal Paso  
Hobbs, New Mexico

**Location of Potential Discharge:**

Fuel / Oil Containment Area adjacent to Main Shop at above noted address. *Legal missing.*

**Site Activity Description:**

The subject facility is occupied by Knight Fishing Services, Inc., which is an oil and gas service company supplying rental tools for “down-hole” projects which arise during the drilling or work over of oil and gas wells. Rental tools are received at the yard, cleaned and inspected prior to placement back on the tool line. ③ No ④

The facility possesses a “Closed-Loop” washing system which utilizes recycled water to wash the subject equipment resulting in “No Discharge” of wash water from the facility. The potential to release regulated materials (i.e. fuel/oil) is present within the above ground storage tank (AST) containment area should secondary containment pans fail. A Spill Prevention Contingency and Countermeasure (SPCC) plan has been developed for this facility. Misc. drips and spills are immediately addressed preventing subsurface contamination concerns.

Depth to groundwater near this facility is approximately 53 ft. below land surface. *Missing TDS!*

**Comment Submittals:**

Any comments pertaining to this notice should be directed to the following:

Mr. Eric Taylor  
Knight Fishing Services, Inc.  
1718 S. Dal Paso  
Hobbs, New Mexico 88240
