Ms. Lori Wrotenbery Oil Conservation Division 2040 South Pacheco Street Santa Fe, NM 87505

Re: Application for Administrative Approval Exception to Well Location Rule 104.C San Juan County, New Mexico

Dear Ms. Wrotenbery:

Richardson Operating Company requests an exception to well location requirements of Section 104.C due to topographical conditions. In an effort to minimize surface disturbance, we plan to use the existing pad of a plugged and abandoned well, however, we are limited on the West by a cliff. As indicated on the attached plat, the WF Federal #29-1 well will pool the Pictured Cliffs and Fruitland Coal formations, and will be located 790 feet from the North line and 1410 feet from the East line. These footages comply with standard location rules for the Fruitland Coal formation, but as to the Pictured Cliffs, we will encroach upon an inner quarter-quarter boundary by forty feet. No offsetting operators and/or leases or mineral owners will be affected by the unorthodox location.

Enclosed for your reference are copies of the following:

- 1. Form C-102, Well Location and Acreage Dedication Plat, showing the subject spacing units and unorthodox well location.
- 2. USGS topographic map showing the topography condition.
- 3. Plat showing diagonal and adjoining wells. There are no affected parties.

Your prompt attention to our application is requested, as we have a drilling commitment requiring us to commence drilling operations by November 30, 1998.

Thank you very much for your assistance.

Sincerely,

RICHARDSON OPERATING COMPANY

Cathleen Colby Land Manager
