Previously (3/24/08) BP stated that the above well would be based on a fixed percent allocation. After further research of the well we have found that allocating on a subtraction method using the projected future decline for production in the Blanco Mesaverde as well as the Pictured Cliffs will more accurately represent production in each formation. The production from the Mesaverde and Pictured Cliffs shall serve as a base for production subtracted from the total production of the commingled well. The balance of the production will be attributed to the Otero Chacra. Attached is the future production decline for the Blanco Mesaverde & the Pictured Cliffs.

The BLM has been notified of the allocation change via form 3160-5 for lease SF - 078046 & SF - 078390

I hereby certify that the information above is true and complete to the best of my knowledge and belief. I further certify that any pit or below-grade tank has been/will be constructed or closed according to NMOCD guidelines ☐, a general permit ☐ or an (attached) alternative OCD-approved plan ☐.
