Roosevelt County, New Mexico

Pools:	Tule Pennsylvania; Gas	(upper zone)	Gas 86443

Reference is made to your recent application for an exception to Rule 12.9A. of the Division Rules and Regulations to permit the above-described well to commingle production from the subject pools in the wellbore.

It appearing that the subject well qualifies for approval for such exception pursuant to the provisions of Rule 12.11A., and that reservoir damage or waste will not result from such downhole commingling, and correlative rights will not be violated thereby, you are hereby authorized to commingle the production as described above and any Division Order which authorized the dual completion or otherwise required separation of the zones is hereby placed in abeyance.

In accordance with Division 12.11A.(6), the production attributed to any commingled pool within the well shall not exceed the allowable applicable to that pool.

Assignment of allowable and allocation of production from the well shall be as follows:

Tule Pennsylvania; Gas	Pct Gas: 70	Pct Oil: 0
Tule Montoya; Gas	Pct Gas: 30	Pct Oil: 0

It is our understanding that ownership interests are diverse between pools that will be commingled within this well, and Sovereign will log or test the well in order to arrive at a production allocation between pools. The production allocation percentages of oil and gas

between these pools shall be reported to the Divisions Santa Fe office within 60 days following completion of this workover.

REMARKS: The operator shall notify the Division's district office upon implementation of commingling operations.

Pursuant to Rule 12.11B., the commingling authority granted herein may be rescinded by the Division Director if conservation is not being best served by such commingling.
