This looks like the way to go:

“apply for an amendment to PLC 310-A and include all wells that are in the PLC 309-A and any new wells and future wells that we will include in a “defined parameter”

The “defined parameter” is up to you – we were talking about this the other day. The idea is to short circuit any additional onerous notice issues.

Richard E. will review this application when it comes in, probably.

Subject: FW: surface commingle question

Hi Will,
After some discussions with our Land and Engineering folks, looks like we want to add some wells to this. We will be spudding a couple of new wells that will go into this CDP and also into existing oil tanks. Should I apply for an addition to the PLC 310-A and include all wells that are in the PLC 309-A and any new wells and future wells that we will include in a “defined parameter”? Please let me know if this is how you would like me to proceed. Call me if you need additional and more detailed description of plans.

Thanks for you help.

Yates Petroleum Corporation respectfully request administrative approval for the addition to Surface Pool / Lease Commingle Gas Only PLC-310 approved on June 9th 2008

Please see attachment.

We are adding the Knoll AOK Federal #2H and the Knoll AOK Federal #3H (not yet drilled) wells to the Knoll AOK Federal #1 CDP which was approved by the OCD on June 9, 2008 and by the BLM on September 22, 2008.

The CDP is located 1/4 mile south of the Knoll AOK Federal #1 at the Vision Energy Company Lease called HBP3-#1. Please see attached plat and site facility diagram.

Diversified ownership by percentages. Waivers are attached. All in house subsidiaries.

Each of these wells shall be equipped with allocation meters on gas prior to commingling for sales. The gas sales point for this commingled production shall be located at the Vision Energy Inc. CDP in the S/2of Sec. 3Unit J, K, or N.

The proposed commingling of production is in the interest of conservation and will not result in reduced royalty or improper measurement of production. Estimated daily gas production for the Knoll AOK Federal #2H is 1.9 mcf, and the estimated gas production for the Knoll AOK Federal #3H is N/A mcf per day.

The purpose of the Surface Pool / Lease Commingle is to reduce operating costs for storage and treating, thereby extending the economic life of each well. Without approval for utilizing existing batteries on adjacent leases, it will become necessary to build separate facilities for each well. This will greatly increase costs and shorten the economic life of the well.

The proposed commingling is necessary for economic operation of the above referenced leases. We understand that the request approval will not constitute the granting of any right-of-way or construction rights not granted by the lease instrument. And, we will submit within 30 days an application for right-of-way approval to the BLM's Realty Section in your office if we have not already done so.

Yates Petroleum Corporation respectfully request administrative approval for the addition to Surface Pool / Lease Commingle Gas Only PLC-309 approved on June 9th 2008

Please see attachment.

We are adding the Canyon BJK State #1Y and the Tombstone BMB State #1 wells to the Jester BFJ Federal #1 CDP which was approved on June 9, 2008.

The CDP is located at the Jester BFJ Federal #1. Please see attached plat and site facility diagram.

Diversified ownership. Waivers attached. All in house subsidiaries.

Each of these wells shall be equipped with allocation meters on gas prior to commingling for sales. The gas sales point for this commingled production shall be located near the Jester BFJ Federal Well #1 in Unit N. of Sec. 12, Township 24 South, Range 29 East.

The proposed commingling of production is in the interest of conservation and will not result in reduced royalty or improper measurement of production. Estimated daily gas production for the Canyon BJK State #1 is 50 mcf, and the estimated gas production for the Tombstone BMB State #1 is 300 mcf per day.

The purpose of the Surface Pool / Lease Commingle is to reduce operating costs for storage and treating, thereby extending the economic life of each well. Without approval for utilizing existing batteries on adjacent leases, it will become necessary to built separate facilities for each well. This will greatly increase costs and shorten the economic life of the well.

The proposed commingling is necessary for economic operation of the above referenced leases.

We understand that the request approval will not constitute the granting of any right-of-way or construction rights not granted by the lease instrument. And, we will submit within 30 days an application for right-of-way approval to the BLM's Realty Section in your office if we have not already done so.

Dear Interest Owner & prospective Interest Owner:

Yates Petroleum Corporation is requesting administrative approval from the Oil Conservation Division, State Land Office, and BLM to combine application PLC-309-A to PLC-310-A. We are also requesting the following defined parameters for possible future wells to be included in this addition to PLC-310-A.

Each of these wells shall be equipped with allocation meters on gas prior to commingling for sales.

The purpose of this Surface Pool / Lease Commingle is due to capacity limitations in the LP sales meters located at the HBP3 #1 location and Sec 12-T24S-R29E. To reduce operating costs, and the environmental impact of building additional pipelines, Yates will connect the existing P/L and add (2) additional sales points.

The proposed commingling of production will not result in reduced royalty or improper measurement of production.

The proposed commingling is necessary for economic operation of the above referenced leases.

Any objection must be filed in writing with the Oil Conservation Division in Santa Fe within 20 days from the date the division received the application. Application will be sent in conjunction with notification to owners.

Re: Addition to PLC-310-A
Eddy County, New Mexico

Dear Interest Owner & prospective Interest Owner:

Yates Petroleum Corporation is requesting administrative approval from the Oil Conservation Division, State Land Office, and BLM to combine application PLC-309-A to PLC-310-A. We are also requesting the following defined parameters for possible future wells to be included in this addition to PLC-310-A.

Each of these wells shall be equipped with allocation meters on gas prior to commingling for sales.

The purpose of this Surface Pool / Lease Commingle is due to capacity limitations in the LP sales meters located at the HBP3 #1 location and Sec 12-T24S-R29E. To reduce operating costs, and the environmental impact of building additional pipelines, Yates will connect the existing P/L and add (2) additional sales points.

The proposed commingling of production will not result in reduced royalty or improper measurement of production.

The proposed commingling is necessary for economic operation of the above referenced leases.

Any objection must be filed in writing with the Oil Conservation Division in Santa Fe within 20 days from the date the division received the application. Application will be sent in conjunction with notification to owners.

If you should have any questions, please give me a call at (505) 748-4213 (direct line).
