Re: Proposed NSP-190

P
Dear Sir:

Reference is made to your letter of September 30, 1955
pertaining to the above-captioned proposed non-standard gas proration
unit.

Y
Please be advised that this office has withdrawn your
application for a non-standard unit for your Pech-State Well No. 1
in view of the fact that it now appears to be an oil well.

Very truly yours,

Warren W. Mankin
District Engineer

Re: Proposed NSP-190

Dear Mr. Mankin:

Please excuse our delay in answering your letter relative to application for non-standard gas proration unit for Pech-State well #1.

This well has been on test for the last several weeks. It now appears that it will be an oil well rather than a gas well. It is now producing about 75 barrels oil per day on a 16/64th inch choke with a gas-oil ratio of 785:1.

We probably will drill a second well on this tract within the next several months and attempt to complete it as a gas well from the upper part of the Yates. When this well is commenced we will make a new application for a non-standard gas proration unit comprising the SW/4 of Section 32, Twp. 21S, Rge. 36E. At that time we will be careful to make all of the requirements in the application.

Yours very truly,

J. H. Moore

Re: Proposed NSP-190

Dear Sir:

We are still awaiting an answer to our letter of September 6, 1955.

Did you notify Cities Service Oil Company of your application for a non-standard gas proration unit for your Pech-State Well No. 1, located in the NW/4 SW/4 of Section 32, Township 21 South, Range 36 East, Lea County, New Mexico, in the Jalmat Gas Pool? Have you applied for or received permission for communitization of this above-described state acreage for a gas unit?

Your application will be held up until such time as you comply with our requests and will not be granted on September 29, 1955 as previously indicated.

Very truly yours,

Warren W. Mankin
District Engineer
