Attention: Mr. W. B. Macey, Secretary-Director

Gentlemen:

The Mapenza Oil Company herewith applies for formation of a non-standard gas proration unit in the Eumont Gas Pool, Lea County, New Mexico, consisting of 160 acres being W $\frac{1}{2}$ SE $\frac{1}{2}$ of Section 27, T20S, R37E. The Mapenza Oil Company #1 Phillips-Hooper well was drilled and completed in the vertical and horizontal limits of the Eumont Gas Pool; exact location is 1980' FEL and 660' FSL, Section 27, T20S, R37E. All rules and regulations of the Commission were followed in the drilling and completion of the well and applicable forms were filed, received, and approved by the Hobbs district office.

A plat is attached showing the acreage to be dedicated outlined in yellow. This plat also shows the well location, with distances from the section line and the offset ownership.

The Operator respectfully requests that the Commission grant his application for a non-standard proration unit in the Eumont Gas Pool, consisting of the above described 160 acres, for the following reasons:

1. The well is located in the Eumont Gas Pool and completed in the vertical and horizontal limits of the Eumont Gas Pool.
2. The acreage covered by this application, in the opinion of the Operator, will be adequately drained by the well in its geographical location.
3. Existing rules and regulations of the Commission have been followed insofar as drilling and completion, geographic spacing, and information requested by the Commission.
