NATURE OF RELEASE

Type of Release Hydrocarbon & Produced Water	Volume of Release 20 bbls Hydrocarbon 18 bbls PW	Volume Recovered 10 bbls Hydrocarbon 5 bbls Produced water
Source of Release Flow line leak	Date and Hour of Occurrence 1/29/2009 9:30am	Date and Hour of Discovery same
Was Immediate Notice Given? Yes X No Not Required	If YES, To Whom? NMOCD/Mike Bratcher	
By Whom? Mike Stubblefield	Date and Hour 1/29/2009 10:55am	
Was a Watercourse Reached? <input type="checkbox"/> Yes X No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*
The flow line ruptured, the well was shut-in and a vacuum truck was called to the location.
The flow line was repaired. Free standing fluids were recovered.

Describe Area Affected and Cleanup Action Taken.
The impacted area was located 10' north of the wellhead on location, the release flowed across the location and pooled in a material supply pit located next to the location. The weather at the time of the release was clear & dry. The soil in the area of the release is sandy loam overlaying caliches. The visibly impacted soil was excavated and then hauled to an NMOCD Solid waste disposal facility. Less impacted soil was excavated and then placed on a liner set on the location. Soil samples will be taken for analytical from the excavated area on location and the stockpiled soils. The soil samples taken will be submitted to a second party Lab. The soil samples will be analyzed for TPH using EPA method 8015M & B-TEX using EPA method 8020B.
When analytical results for a soil sample taken from the excavated area and the stockpiled soil reflect the TPH & B-TEX to be under the RRAL for the site, A final C-141 form will be submitted to NMOCD requesting closure for the release that occurred on 2/29/2009.
Depth to ground water - > 50', Wellhead protection area - > 1000', Distance to surface water body - > 1000' Site ranking score 0 points.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
