Re: Laguna Salado 22 Federal #6H
Section 22-T23S-R29E
Eddy County, New Mexico

Gentlemen:

Devon Energy Production Company, L.P. (Devon), as Operator, intends to drill the referenced horizontal Delaware well to a TVD of approximately 6,707' with a TMD of approximately 11,478'. Devon initially attempted to stake and permit this well at an orthodox location. However, due to the proximity of the location to apparent commercial Potash resources, the Bureau of Land Management (BLM) has required Devon to move the location. The closest drillable location as approved by the BLM is located at a SHL 1,172' FNL & 2,510' FWL with a BHL of 330' PSL & 660' FEL which is an unorthodox surface location pursuant to the statewide pool rules as Devon will be penetrating the top of the Delaware Mountain group in the vertical portion of the wellbore at a depth of approximately 3,065'.

Inasmuch as this well will be producing from an unorthodox surface location from that permitted by the statewide pool rules, Devon respectfully requests that the Commission administratively approve this application for an unorthodox location in accordance with Division Rule 104(F)(3). Devon's records reflect that in addition to Devon, Chesapeake Exploration, LLC, Oxy USA, Inc. and Liberty Energy Corporation are the owners of the operating rights under NMNM-66425 covering all of said Section 22, are the only parties affected by this application and have been given notice of this application. Additionally, Devon requests Commission approval to designate a 120 acre project area consisting of three (3) standard oil spacing units comprised of the SE/4 NE/4 and the E/2 SE/4 (unit letters H, I & P) of said section 22.

Attached you will find a Lower Brushy Canyon B structure map, a State of New Mexico form C-102, a land plat reflecting the affected parties and a CUDD Drilling & Measurement Services Directional Planning Report.

If there are any questions or if additional information is required feel free to call me at (405) 552-4633.

Yours very truly,

DEVON ENERGY PRODUCTION COMPANY, L.P.

Gentlemen:

Attached you will find Devon Energy Production Company, L.P.'s ("Devon") administrative application for approval of an unorthodox well location covering the referenced Delaware test well. As operator under the governing Joint Operating Agreement, Devon's records indicate that your company is the owner of operating rights in an offset spacing unit and are entitled to notice of this application in accordance with Division Rule 104 (f). Objections to this application should be submitted to the NMOCD. If you have no objection to this application, please so indicate by signing and returning one copy of this letter to the undersigned.

If there are any questions or if additional information is required, feel to call me at (405) 552-4633.

Yours very truly,

DEVON ENERGY PRODUCTION COMPANY, L.P.

Dear Mr. Gray

It seems that the notices to other owners attached to this application do not comply with Rule 15.13.D in that they do not contain the required admonition that the application may be granted if objection is not received by the Division within 20 days. Accordingly, new notices will be necessary unless you can furnish signed waivers, or operating rights ownership is uniform throughout the section, in which latter case, notices are not required.

In addition, to approve the requested unit, we need to know in what quarter-quarter sections the perforated portions of the lateral will be located.

Sincerely

Subject: Laguna Salado 22 Fed #6H; NSL Application

Dear Mr. Gray

It seems that the notices to other owners attached to this application do not comply with Rule 15.13.D in that they do not contain the required admonition that the application may be granted if objection is not received by the Division within 20 days. Accordingly, new notices will be necessary unless you can furnish signed waivers, or operating rights ownership is uniform throughout the section, in which latter case, notices are not required.

In addition, to approve the requested unit, we need to know in what quarter-quarter sections the perforated portions of the lateral will be located.

Sincerely

David K. Brooks
