RE: **Monitor Well Plugging and Abandonment Report
Rice Operating Company –EME SWD System
C-16(1) and C-16(2) Leaks – OCD Case Nos. 1R0476 and 1R0477
UL-C, Sec 16 T20S, R37E**

Sent via E-mail and U.S. Certified Mail Return Receipt No. 7007 0710 0003 0305 3781

Dear Mr. Hansen:

Please be advised that Harrison & Cooper, Inc. has plugged and abandoned the six (6) monitor wells for the above-referenced projects per the requirements specified in your e-mail letters of September 4th (attached). These wells were plugged using a 1% to 3% bentonite slurry and a 3 foot cap of concrete at the surface. Given below are photographs of the plugging event which occurred on September 24th of this year, and enclosed are Plugging Reports for each of the six monitor wells from Harrison & Cooper.

ROC is the service provider (agent) for the EME Salt Water Disposal System and has no ownership of any portion of pipeline, well, or facility. The EME SWD System is owned by a consortium of oil producers, System Parties, who provide all operating capital on a percentage ownership/usage basis.

Thank you for your work with these projects.

Sincerely,

L. Peter Galusky, Jr. Ph.D.
Principal

RE: Remediation Termination Request for the Rice Operating Company's

EME C-16(1) Leak Site

Unit Letter C, Section 16, T20S, R37E, NMPM, Lea County, New Mexico

Remediation Plan (1R-476) Termination

Dear Mr. Conder:

The New Mexico Oil Conservation Division (OCD) has received Rice Operating Company's report and request to close the above-referenced site (dated July 10, 2009). The report is acceptable to the OCD. However, the material used to plug the groundwater monitoring wells and recovery well must be a cement grout with 1% to 3% bentonite. Please submit to the OCD a final plugging report within one year of receipt of this notice.

The above-referenced report, submitted in accordance with 19.15.29 NMAC [Section 19 of (Part 29; formally, Rule 116)], indicates that Rice Operating Company has met the requirements of 19.15.29 NMAC; therefore, the OCD approves the report and hereby notifies you that the remediation plan (1R-476) is terminated in accordance with 19.15.29 NMAC.

Please be advised that OCD approval of this report does not relieve the owner/operator of responsibility should operations pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the owner/operator of responsibility for compliance with any OCD, federal, state, or local laws and/or regulations.

If you have any questions regarding this matter, please contact me at 505-476-3489.

Edward J. Hansen

RE: Remediation Termination Request for the Rice Operating Company's

EME C-16(2) Leak Site

Unit Letter C, Section 16, T20S, R37E, NMPM, Lea County, New Mexico

Remediation Plan (1R-477) Termination

Dear Mr. Conder:

The New Mexico Oil Conservation Division (OCD) has received Rice Operating Company's report and request to close the above-referenced site (dated July 10, 2009). The report is acceptable to the OCD. However, the material used to plug the groundwater monitoring wells and recovery well must be a cement grout with 1% to 3% bentonite. Please submit to the OCD a final plugging report within one year of receipt of this notice.

The above-referenced report, submitted in accordance with 19.15.29 NMAC [Section 19 of (Part 29: formally, Rule 116)], indicates that Rice Operating Company has met the requirements of 19.15.29 NMAC; therefore, the OCD approves the report and hereby notifies you that the remediation plan (1R-477) is terminated in accordance with 19.15.29 NMAC.

Please be advised that OCD approval of this report does not relieve the owner/operator of responsibility should operations pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the owner/operator of responsibility for compliance with any OCD, federal, state, or local laws and/or regulations.

If you have any questions regarding this matter, please contact me at 505-476-3489.
