Ute Mountain Ute #105: Non-Standard Location

Location: 1635' FSL & 2230' FEL
SE/4 Sec 22, T32N-R14W, San Juan County, NM

The Application for Permit to Drill for the Ute Mountain Ute #105 has been approved by the Bureau of Land Management and the New Mexico Oil Conservation Division with a stipulation for non-standard location approval. The well is located 1635' FSL & 2230' FEL. The location is non-standard due to topography and archaeological issues. Per NMOCD location requirements, the well is less than 660' to the outer boundary of the quarter section. The permitted location is 410' from the west ¼ section line. Therefore, the UMU #105 will need a Non-Standard Location approval.

Operators Affected:

None.

Subject: Ute Mountain Ute Well No. 105; NSL Application

Dear Ms. Smith

We are in receipt of the referenced application for approval of a non-standard gas well location.

However, the application does not provide any information about notice given to offsetting operators or owners of this application. OCD Rule 15.13 [19.15.15.13 MMAC] requires that an application for NSL approval include a list of "affected persons" to whom notice has been given of the application (Subsection B of Rule 15.13) and a statement that notices have been given as required (Subsection C).

Please provide evidence of notice to the operator or working interest owners in the SW/4 of Section 22. If Huntington owns 100% of the operating rights in the SW/4 of Section 22, or if ownership of that tract is identical to the SE/4 of Section 22, please so advise us.

Sincerely
David K. Brooks

David,

Huntington Energy is the offset operator. The SW/4 and SE/4 of Sec 22 have the same ownership – identical tract ownership.

Thank you!
