Describe Cause of Problem and Remedial Action Taken.*
This leak was caused by a rotted rubber on a hugger clamp. The leak has been repaired and the line is back in service.

Describe Area Affected and Cleanup Action Taken.*
The spill area is primarily in the pasture; no clean up action has been taken. 420 bbls recovered was taken directly from the culvert, limiting the environmental impact to an area of 20'x 75'.

Tetra Tech will sample the spill site area to delineate any possible contamination from the release and we will present a remediation work plan to the NMOCD/BLM for your approval prior to any significant remediation work.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
