ADMINISTRATIVE APPLICATION CHECKLIST

NOV 16 A 10:21
Cont. Wallace #1
30-025-07145-

THIS CHECKLIST IS MANDATORY FOR ALL ADMINISTRATIVE APPLICATIONS FOR EXCEPTIONS TO DIVISION RULES AND REGULATIONS WHICH REQUIRE PROCESSING AT THE DIVISION LEVEL IN SANTA FE

Application Acronyms:

- [NSL-Non-Standard Location] [NSP-Non-Standard Proration Unit] [SD-Simultaneous Dedication]
- [DHC-Downhole Commingling] [CTB-Lease Commingling] [PLC-Pool/Lease Commingling]
- [PC-Pool Commingling] [OLS - Off-Lease Storage] [OLM-Off-Lease Measurement]
- [WFX-Waterflood Expansion] [PMX-Pressure Maintenance Expansion]
- [SWD-Salt Water Disposal] [IPI-Injection Pressure Increase]
- [EOR-Qualified Enhanced Oil Recovery Certification] [PPR-Positive Production Response]

- [1] **TYPE OF APPLICATION** - Check Those Which Apply for [A]
- [A] Location - Spacing Unit - Simultaneous Dedication
 NSL NSP SD
- Check One Only for [B] or [C]
- [B] Commingling - Storage - Measurement
 DHC CTB PLC PC OLS OLM
- [C] Injection - Disposal - Pressure Increase - Enhanced Oil Recovery
 WFX PMX SWD IPI EOR PPR
- [D] Other: Specify _____

Cancelled 11/16/09

3 dif. owners/operators in the past 2 years.

- [2] **NOTIFICATION REQUIRED TO:** - Check Those Which Apply, or Does Not Apply
- [A] Working, Royalty or Overriding Royalty Interest Owners
- [B] Offset Operators, Leaseholders or Surface Owner
- [C] Application is One Which Requires Published Legal Notice
- [D] Notification and/or Concurrent Approval by BLM or SLO
U.S. Bureau of Land Management - Commissioner of Public Lands, State Land Office
- [E] For all of the above, Proof of Notification or Publication is Attached, and/or,
- [F] Waivers are Attached

[3] **SUBMIT ACCURATE AND COMPLETE INFORMATION REQUIRED TO PROCESS THE TYPE OF APPLICATION INDICATED ABOVE.**

[4] **CERTIFICATION:** I hereby certify that the information submitted with this application for administrative approval is **accurate** and **complete** to the best of my knowledge. I also understand that **no action** will be taken on this application until the required information and notifications are submitted to the Division.

Note: Statement must be completed by an individual with managerial and/or supervisory capacity.

APPLICATION FOR AUTHORIZATION TO INJECT

I. PURPOSE : _____ Secondary Recovery _____ Pressure Maintenance _____ Disposal _____ Storage
Application qualifies for administrative approval? _____ Yes _____ No

II. OPERATOR: CELERO ENERGY II, LP

ADDRESS : 400 W. Illinois, Ste. 1601 Midland TX 79701

CONTACT PARTY : Lisa Hunt PHONE : (432)686-1883

III. WELL DATA: Complete the data required on the reverse side of this form for each well processed for injection.
Additional sheets may be attached if necessary.

IV. Is this an expansion of an existing project? _____ Yes No
If yes, give the Division order number authorizing the project _____

V. Attach a map that identifies all wells and leases within two miles of any-proposed injection well with a one-half mile radius circle drawn around each proposed injection well. This circle identifies the well's area of review.

VI. Attach a tabulation of data on all wells of public record within the area of review which penetrate the proposed injection zone. Such data shall include a description of each well's type, construction, date drilled, location, depth, record of completion, and a schematic of any plugged well illustrating all plugging detail.

VII. Attach data on the proposed operation, including:

1. Proposed average and maximum daily rate and volume of fluids to be injected;
2. Whether the system is open or closed;
3. Proposed average and maximum injection pressure;
4. Sources and an appropriate analysis of injection fluid and compatibility with the receiving formation if other than reinjected produced water; and
5. If injection is for disposal purposes into a zone not productive of oil or gas at or within one mile of the proposed well, attach a chemical analysis of the disposal zone formation water (may be measured or inferred from existing literature, studies, nearby wells, etc.).

*VIII. Attach appropriate geological data on the injection zone including appropriate lithologic detail, geological name, thickness, and depth. Give the geologic name, and depth to bottom of all underground sources of drinking water (aquifers containing waters with total dissolved solids concentrations of 10,000 mg/l or less) overlying the proposed injection zone as well as any such sources known to be immediately underlying the injection interval.

IX. Describe the proposed stimulation program, if any.

*X. Attach appropriate logging and test data on the well. (If well logs have been filed with the Division, they need not be resubmitted.)

*XI. Attach a chemical analysis of fresh water from two or more fresh water wells (if available and producing) within one mile of any injection or disposal well showing location of wells and dates samples were taken.

XII. Applicants for disposal wells must make an affirmative statement that they have examined available geologic and engineering data and find no evidence of open faults or any other hydrologic connection between the disposal zone and any underground source of drinking water.

XIII. Applicants must complete the 'Proof of Notice' section on the reverse side of this form.

XIV. Certification: I hereby certify that the information submitted with this application is true and correct to the best of my knowledge and belief.

NAME: Lisa Hunt TITLE: Regulatory Analyst

SIGNATURE: *Lisa Hunt* DATE: 10/08/2009

E-MAIL ADDRESS: LHunt@celeroenergy.com

* If the information required under Sections VI, VII, X, and XI above has been previously submitted, it need not be resubmitted. Please show the date and circumstance of the earlier submittal: _____

III. WELL DATA

A. The following well data must be submitted for each injection well covered by this application. The data must be both in tabular and schematic form and shall include:

- (1) Lease name; Well No.; Location by Section, Township, and Range; and footage location within the section.
- (2) Each casing string used with its size, setting depth, sacks of cement used, hole size, top of cement, and how such top was determined.
- (3) A description of the tubing to be used including its size, lining material, and setting depth.
- (4) The name, model, and setting depth of the packer used or a description of any other seal system or assembly used.

Division District Offices have supplies of Well Data Sheets which may be used or which may be used as models for this purpose. Applicants for several identical wells may submit a "typical data sheet" rather than submitting the data for each well.

B. The following must be submitted for each injection well covered by this application. All items must be addressed for the initial well. Responses for additional wells need be shown only when different. Information shown on schematics need not be repeated.

- (1) The name of the injection formation and, if applicable, the field or pool name.
- (2) The injection interval and whether it is perforated or open-hole.
- (3) State if the well was drilled for injection or, if not, the original purpose of the well.
- (4) Give the depths of any other perforated intervals and detail on the sacks of cement or bridge plugs used to seal off such perforations.
- (5) Give the depth to and name of the next higher and next lower oil or gas zone in the area of the well, if any.

XIV. PROOF OF NOTICE

All applicants must furnish proof that a copy of the application has been furnished, by certified or registered mail, to the owner of the surface of the land on which the well is to be located and to each leasehold operator within one-half mile of the well location.

Where an application is subject to administrative approval, a proof of publication must be submitted. Such proof shall consist of a copy of the legal advertisement which was published in the county in which the well is located. The contents of such advertisement must include:

- (1) The name, address, phone number, and contact party for the applicant;
- (2) The intended purpose of the injection well; with the exact location of single wells or the Section, Township, and Range location of multiple wells;
- (3) The formation name and depth with expected maximum injection rates and pressures; and
- (4) A notation that interested parties must file objections or requests for hearing with the Oil Conservation Division, 1220 South St. Francis Dr., Santa Fe, NM 87505 within 15 days.

NO ACTION WILL BE TAKEN ON THE APPLICATION UNTIL PROPER PROOF OF NOTICE HAS BEEN SUBMITTED.

NOTICE: Surface owners or offset operators must file any objections or requests for hearing of administrative applications within 15 days from the date this application was mailed to them.

Additional Data

1. Is This a new well drilled for injection? _____ Yes No _____

If no, for what purpose was the well originally drilled? Oil producer from the Devonian formation
Subsequently plugged and abandoned in 1967.

2. Name of the Injected Formation: Devonian

3. Name of Field or Pool (if applicable): Gladiola, Devonian

4. Has the well ever been perforated in any other zone(s)? List all such perforated intervals and give plugging detail, i.e. sacks of cement or plug(s) used. See wellbore diagrams

5. Give the name and depths of any oil or gas zones underlying or overlying the proposed injected zone in this area: _____

Gladiola-Wolfcamp Pool-9,500' and Gladiola-Mississippian Pool-11,380' are located within one mile of the

Continental Wallace #1. However, neither of these pools are located within the SW/4 of Section 6.

Application for Authorization to Inject

- VI. Attached is a tabulation of all wells of public record that fall within the ½ mile radius of the Continental Wallace #1. This investigation has shown that this well has a good cement seal around the csg shoe and will therefore prevent the upward migration of the disposed water into any potable water zone.
- VII. The proposed average daily injection rate for the subject well is 12,000 BWPD; the maximum daily injection rate is 15,000 BWPD. This is a closed system. Proposed average pressure is 2400 psig and maximum pressure is 2400 psig. Only produced water will be injected in the proposed well.
- VIII. Gladiola-Devonian formation lithology is Limestone and Dolomite. Gross formation thickness is approximately 800'. The overlying source of drinking water is the Ogallala at a maximum depth of 65'. Water analysis on two wells within 1 mile of the Continental Wallace #1 are attached along w/supporting evidence for the depth of the Ogallala.
- IX. The well will be stimulated with 5000 gals of 15% HCL.
- X. Log and test data is on file with the Division.
- XI. Water analysis on two wells within 1 mile are attached.
- XII. Celero Energy II has examined the available geologic and engineering data and can find no evidence of open faults or any other hydrologic connection between the disposal zone and any underground source of drinking water.
- XIII. The required "Proof of Notice" is attached.

Miscellaneous - The Continental-Wallace #1 will be a replacement disposal well for the M. M. Harris #2 SWD which will be plugged and abandoned because it was recently junked due to mechanical reasons. The Subject well will dispose of the produced water from 4, currently shut-in wells which normally produce a combined 100 BOPD with 12000 BPD of formation water. It is not practical to place the Continental-Wallace #1 on production in lieu of using it as a disposal well because a prior operator has apparently tried it without success. Although it was re-entered in 2005 and reportedly tested in February, 2006, at 41 BOPD with 3085 BWPD by Platinum Exploration, Inc., there is not any reported production after the re-entry. Furthermore, we do not have any evidence that production facilities were set and that the well was actually produced after it was re-entered. To the best of our knowledge, the well was shut in until Celero Energy II, LP, acquired it in August, 2008

Re: Application for Authorization to Inject
Continental Wallace #1
UL N; Sec 6-T12S-R38E
660' FSL & 2310' FWL
Lea County, New Mexico

Celero Energy II, LP has submitted the enclosed application to the New Mexico Oil Conservation Division requesting authority to inject water into the above well.

The New Mexico Oil Conservation Division requires that we notify leasehold operators and certain mineral interest owners within one-half mile of the proposed injection well by furnishing them with a copy of our Application to Inject which is attached.

If you have any objections, please notify the New Mexico Oil Conservation Division in writing at the following address:

New Mexico Oil Conservation Division
1220 South St. Francis
Santa Fe, NM 87505

If any questions arise concerning this matter, please contact M. W. Metz with Celero Energy at 432/686-1883, ext 122.

Sincerely,

Lisa Hunt
Regulatory Analyst

Re: Application for Authorization to
Inject Wallace # 1 UL N; Sec 6-T12S-R38E
660' FSL & 2310' FWL
Lea County, New Mexico

Greetings:

Mr. Richard M. Kendrick, III, Trustee, has requested that I respond to the notice regarding the referenced water injection plan.

Pending further information, Mr. Kendrick opposes the referenced water injection plan. Mr Kendrick believes:

- (1) The field should be unitized if water is to be injected into the formation.
- (2) If the field is not unitized, the water injection plan will water out his wells sooner than would occur under normal circumstances.
- (3) A water injection plan without unitization and proper management of the formation, will cause the total recovery from the field to be less than through primary production.

Mr. Kendrick respectfully requests that the water injection plan either be abandoned or the field be unitized to maximize production from the formation.

Very truly yours,

Attorney at Law

Subject: Disposal application from Celero Energy II, LP: Continental Wallace #1 30-025-07145 Devonian Disposal

Hello Lisa Hunt:

The protesting party has retracted its protest and I reviewed this application today. After reviewing, I have some mostly routine questions, please do your best to answer:

- a. Please send a list of formation tops from surface to an estimate of the base of the Devonian. ✓
- b. The 025-07162 well has some exposed casing below a plug and above a cement top – which formation is this and is anything threatened by this in case the casing is rotten? ✓
- c. Please let me know who the Fee surface owner is and if they were notified. ✓
- d. You notified many people. In order to keep it organized, we have been asking applicants to identify separately owned tracts which are wholly or partially inside the ½ mile AOR circle and identify the parties in those tracts who you notified because they control the minerals (operators, lessees or mineral owners). ✓
- e. You have applied to use the existing completion in this well for disposal even though you show some “active” or “inactive (not plugged)” wells in the AOR. Have you considered drilling out to use a bit lower interval in the Devonian (which would be then below the actively produced interval) for disposal? I know this well was tested as mostly wet recently, but the interval being proposed for disposal is probably correlative with the offsetting producing wells in this Pool. Current instructions I am operating on, is that if an operator applies for disposal into an interval that is being produced within the nearby acreage, the application should be considered at a hearing. This does not mean the application is denied – but it would be considered only after an examiner heard testimony at a hearing from an engineer as to the effect (good or bad) of the disposal on the reservoir and on nearby production. ✓
- f. Please send current well bore diagrams (only essential details) of the 4 non-plugged wells in the AOR. ✓
 - a. Send current producing rates and/or a quick decline plot on these wells.
 - b. Do you intend to use the inactive well as a monitor well to see if pressure reaches it and raises the fluid level? Or why hasn't it been plugged? ✓
- g. Since there was a lot of work on the subject well to re-enter and the well is very old and the cement top is reported as near the intermediate casing shoe, any permit would require a new CBL to be run prior to installing injection tubing. ✓

The big issue is that Celero Energy II LP has too many wells listed as “inactive” and also has 3 single well bonds to post with Dorothy Phillips – so the Rule 5.9 issues prevent any disposal permit to be issued until those issues are addressed. Please work with Daniel Sanchez, Gail MacQuesten, and Dorothy Phillips of this Santa Fe office to work out something. ✓

Thank You,

William V. Jones PE

Re: Celero Energy II, L.P.
Supplemental Information
Form C-108, Continental Wallace No. 1
Unit N, Section 6, T-12 South, R-38 East,
Lea County, New Mexico

H AND DELIVERED

Dear Mr. Jones,

Pursuant to your E-mail request dated December 11, 2009, enclosed please find supplemental information regarding Celero Energy II, L.P.'s request to convert the Continental Wallace Well No. 1 to a disposal well in the Devonian formation.

If you need additional information, please contact me at (505) 690-9453.

Sincerely,

A handwritten signature in black ink, appearing to read "David Catanach". The signature is fluid and cursive, with a long horizontal stroke at the end.

David Catanach
Agent for Celero Energy II, L.P.

Xc: OCD-Hobbs
Mr. Mike Metza

Supplemental Information
Celero Energy II, L.P.
Continental Wallace No. 1

Item No. 1. Formation tops obtained from the Gamma Ray/Neutron Log run on the Continental Wallace Well No. 1 on May 24, 1957.

<u>Formation</u>	<u>Formation Top</u>
Anhydrite	2,224'
Yates	3,042'
Queen	3,807'
San Andres	4,416'
Glorieta	5,862'
Abo	7,130'
Wolfcamp	9,115'
Pennsylvanian	9,770'
Mississippian	11,380'
Devonian	12,019'

Item No. 2. The PA'd Z. Taylor Well No. 3 (API No. 30-025-07162) has exposed casing below a plug and above a cement top (Estimated Interval: 9,550'-10,770'). This interval is within the Wolfcamp and Pennsylvanian formations. The Wolfcamp formation did produce in this area, and was actually tested, albeit unsuccessfully, in a number of wells in the ½ mile area of review. The Pennsylvanian formation was also tested, and Celero is unaware of any successful Pennsylvanian completion in this area. A check of Division records shows that the Continental Wallace No. 1 is at the northwestern edge of the Gladiola-Wolfcamp Pool, in an area outside the current pool boundary. Also, Division records do not show the presence of any Pennsylvanian pools in this area. Based upon Celero's experience with operating Devonian disposal wells in this area, it is our belief that no injected fluid will enter these formations via the open portion of this wellbore. Injection into these Devonian disposal wells occurs at pressure, however, when the wells are shut-in, they generally go on vacuum. It is further our belief that in the unlikely event that injected fluid enters these formations via the open portion of this wellbore, no oil and gas reserves will be threatened. Attached is a schematic diagram of the Z. Taylor Well No. 3.

Item No. 3. The fee surface owner at the wellsite:

.Kinsolving & Kinsolving
c/o Mr. Dean Kinsolving
P.O. Box 325
Tatum, New Mexico 88267

Celero has had numerous discussions with Mr. Kinsolving regarding the layout of the facilities and the payment of damages. Mr. Kinsolving was provided notice of this application.

Item No. 4. Attached is a map and tabular data that identifies operators, leasehold owners, and/or mineral interest owners within the ½ mile area of review notice area.

Item No. 5. For the reasons set out below, Celero would prefer to utilize the existing perforations in the Continental Wallace No. 1:

- 1) During July-August, 2005 Platinum Exploration, Inc, the previous operator of the Continental Wallace No. 1, attempted to clean out the well to total depth and had considerable difficulty milling through the perforations from 12,023'-12,034' (See attached Sundry Notice);
- 2) The Gladiola-Devonian Field is currently producing at an average oil cut of approximately 1%;
- 3) The Devonian producing interval in this area is a moderately strong water drive reservoir;
- 4) A considerable amount of water has already been injected into the Devonian interval. It is estimated that within a 1 ½ mile radius of Continental Wallace No. 1, a minimum of 44 million barrels of water has been injected into this formation. This amount is likely much higher since the injected volumes for two Rice Engineering commercial disposal wells, the Gladiola SWD "H" No. 5 and the Gladiola SWD "F" No. 7, are not available. (See attached summary of disposal wells in this area);
- 5) By Order No. SWD-943, the OCD authorized Saber Resources, Inc., to inject into the Devonian formation through the open-hole interval from 12,025'-12,700 feet in its Newmont Well No. 1 (API No. 30-025-07154) located in Unit K of Section 7, T-12 South, R-38 East. The actual injection interval in the well was 12,025'-12,200'. This well injected 7.7 million barrels of water into this interval;
- 6) Due to the fact that injection of water into the Devonian formation in this area is generally on vacuum, it is unlikely that injection of water into this upper portion of the Devonian interval in the Continental Wallace No. 1 will have any adverse affect on wells that are currently producing from the same correlative interval.

Item No. 6. Attached are wellbore diagrams, decline curves, and tabular production data for the following-described 4 non-plugged wells within the AOR.

Celero Energy II, L.P.

V. V . Wallace No. 3 (API No. 30-025-07148) Unit H, Section 6, T-12S, R-38E
2009 Average Production: 17 BOPD, 11 MCFGPD, 2,983 BWPD

Celero Energy II, L.P.

Clovis Kendrick No. 1 (API No. 30-025-07152) Unit I, Section 6, T-12S, R-38E
2009 Average Production: 0 BOPD, 0 MCFGPD, 0 BWPD

Celero Energy II, L.P.

Clovis Kendrick No. 2 (API No. 30-025-07153) Unit P, Section 6, T-12S, R-38E
2009 Average Production: 34 BOPD, 0 MCFGPD, 4400 BWPD

Pride Energy Company
Marigold Unit No. 2 (API No. 30-025-32859) Unit B, Section 7, T-12S, R-38E
2009 Average Production: 0.6 BOPD, 0 MCFGPD, 0.5 BWPD

The disposition of the Clovis Kendrick No. 1 depends in part on whether or not the application to convert the Continental Wallace No. 1 to a disposal well is approved. If unsuccessful in permitting the Continental Wallace No. 1 as an SWD well, Celero may attempt to instead permit the Clovis Kendrick No. 1 as an SWD well. The well is currently completed and represents a potential asset. In all likelihood, the Clovis Kendrick No. 1 will be plugged if the Continental Wallace No. 1 is permitted as a disposal well because Celero still will not have the disposal capacity to produce the well.

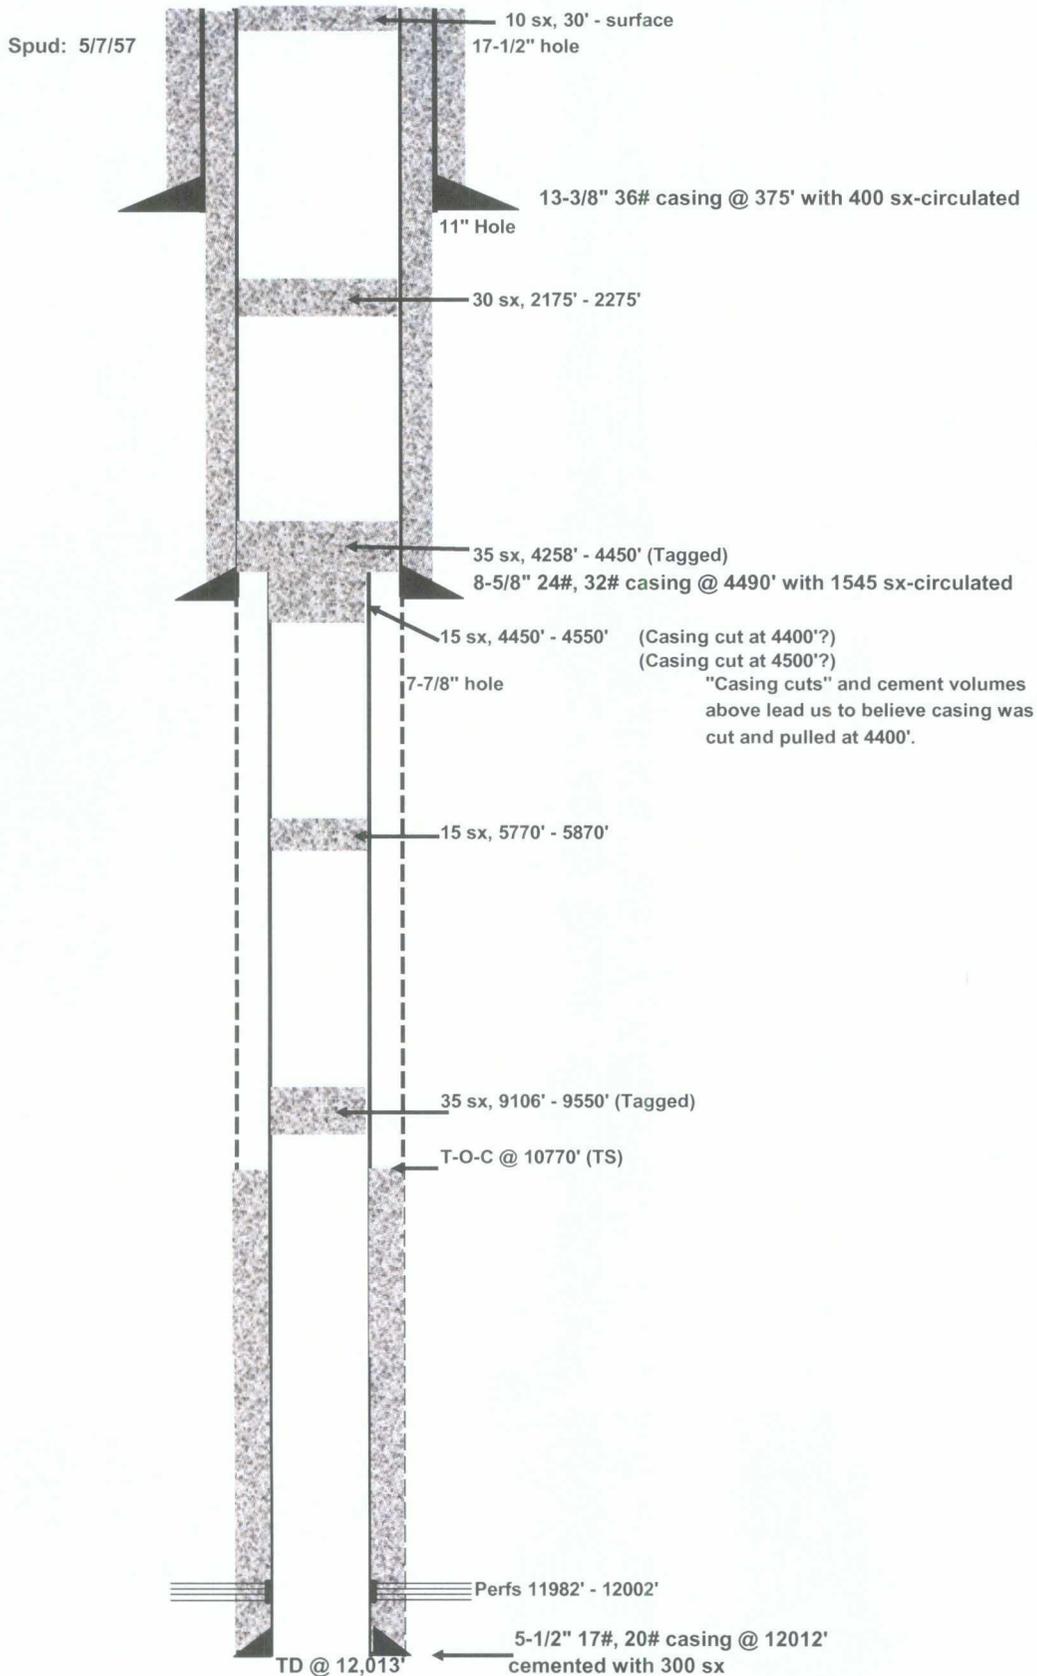

Item No. 7. Celero does not object to running a CBL on the Continental Wallace No. 1, nor does Celero have any objection to affect any repairs on the well the log might indicate are necessary.

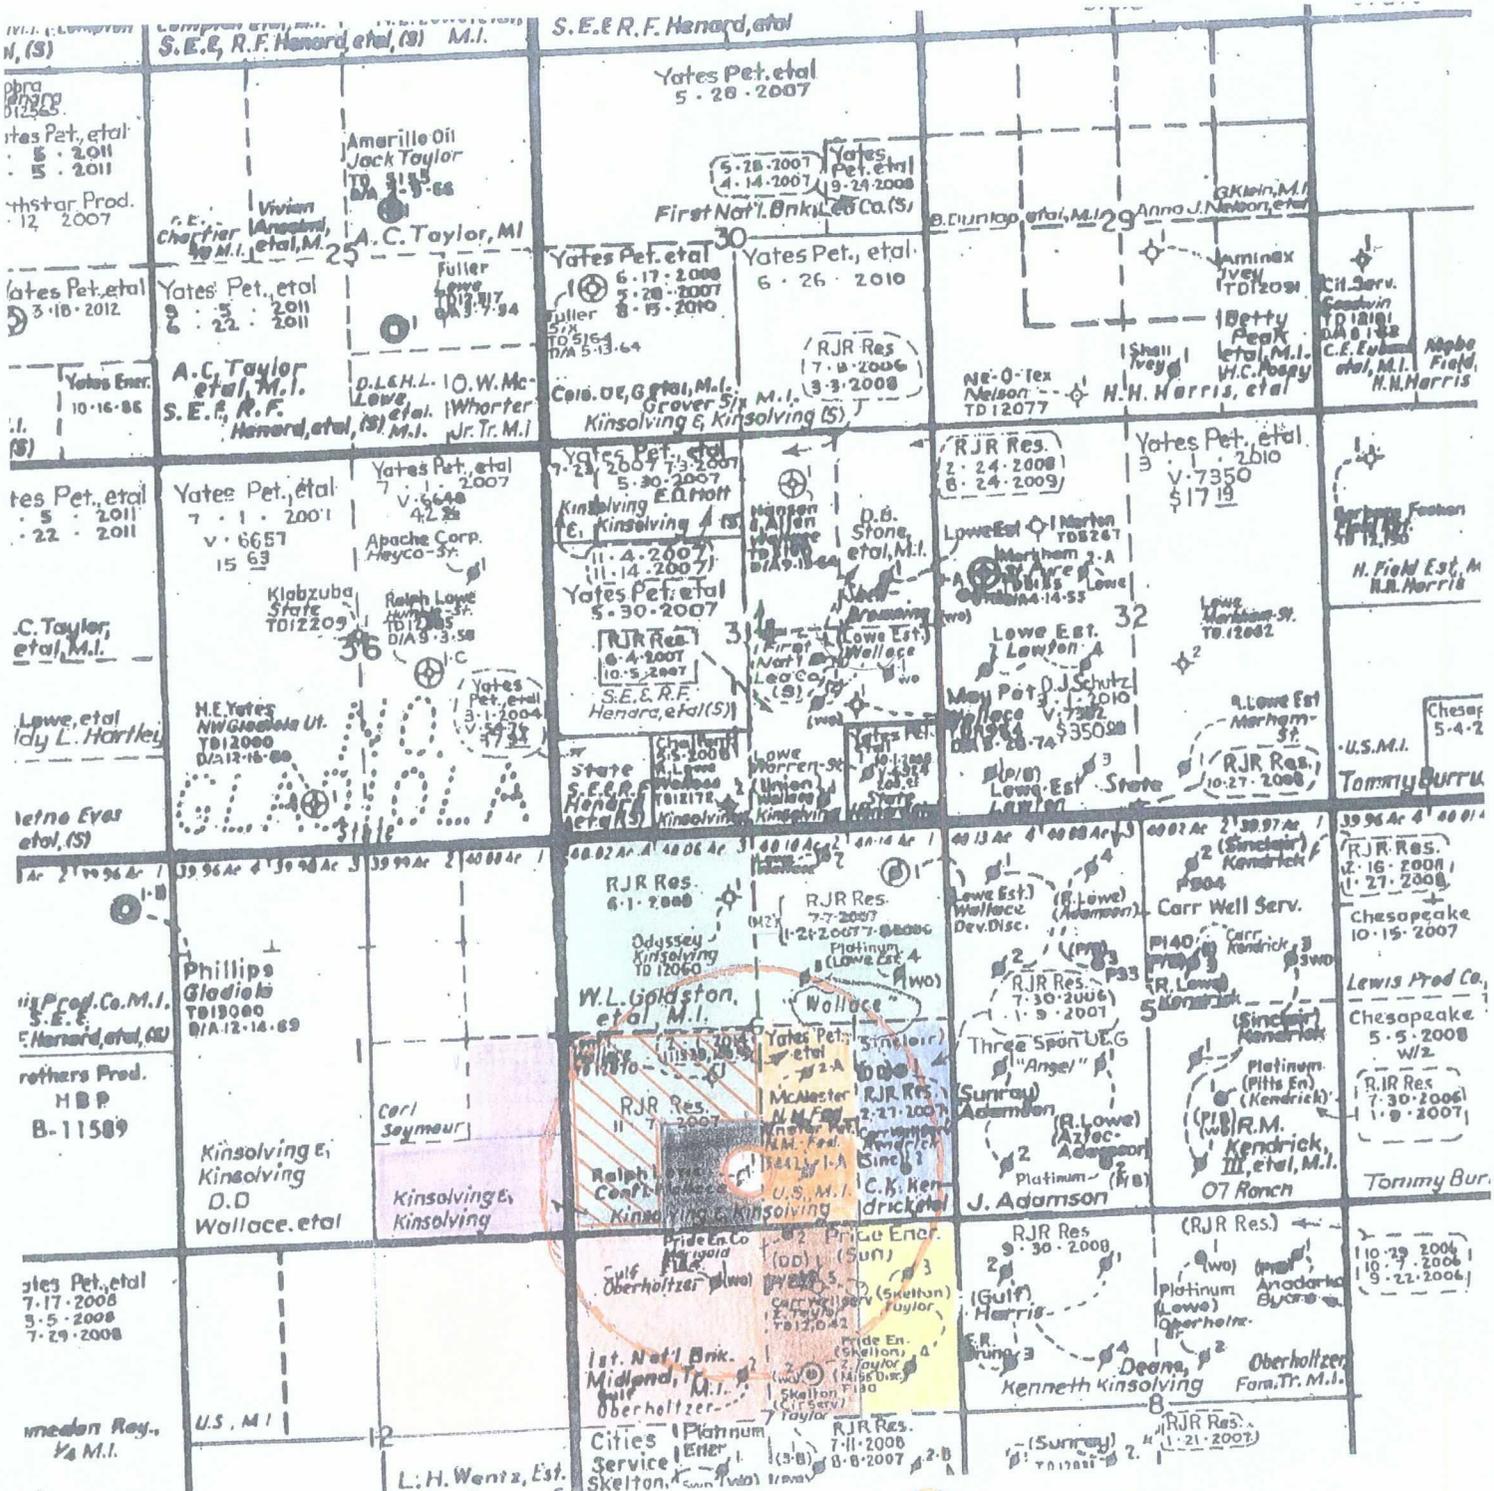

Item No. 8. Celero is currently negotiating a new agreed compliance order with Mr. Daniel Sanchez and Mr. Sonny Swazo. On January 6, 2010 Mr. David Catanach, agent for Celero, attended a meeting with Mr. Sanchez and Mr. Suazo. In that meeting, OCD agreed in principle to the new ACO proposed by Celero. In addition, attached are sundry notices for the Shelton Well No. 6 (API No. 30-025-05133) and the Glad State Well No. 1 (API No. 30-025-07125) that will be filed with the Hobbs OCD on Friday, January 8th. These wells will be TA'd on Monday, January 11th. Once these wells are TA'd Celero will be below the inactive well limit for obtaining a permit.

Pre-Ongard #3 660' FNL & 660' FEL of Sec. 7, T12S, R38E Unit "A"

**Celero Energy II, L.P.
SWD-Application
Continental Wallace No. 1
Offset Devonian SWD Wells**

- # 1 Celero Energy II, L.P.
Continental Wallace No. 1 (API No. 30-025-07145)
660' FSL & 2310' FWL (N) Section 6, T-12 South, R-38 East,
Proposed Injection Interval: Devonian--12,023'-12,041'
- #2 Purvis Oil Corporation
Gladiola SWD "H" No. 5 (API No. 30-025-07141)
1980' FNL & 660' FEL (H) Section 5, T-12 South, R-38 East,
Actual Injection Interval: Devonian—12,219'-12,464' Open Hole
Well PA'd 2/7/1994
(Well was converted to a commercial disposal well in the Devonian formation in 1960. Well was operated as such until it was PA'd in 1994. Celero was unable to locate records that would indicate that amount of cumulative injection into this well. Last injection rate was 34,122 BWPM in 1994. Extrapolated cumulative injection based upon longevity and last monthly rate equals 14 million barrels of water injected.)
- #3 Saber Resources, LLC
Newmont No. 1 (API No. 30-025-07154)
1980' FSL & 1980' FWL (K) Section 7, T-12 South, R-38 East,
Permit Number: SWD-943, SWD-943-A Permit Date: 10/7/2004, 5/5/2005
Permitted Injection Interval: Devonian—12,025'-12,700 Open Hole
Actual Injection Interval: Devonian—12,025'-12,200'
PA'd 8/4/2008
Cumulative Injection: 7,705,982 BW
- #4 Celero Energy II, L.P.
M M Harris No. 2 (API No. 30-025-07168)
660' FNL & 660' FWL (D) Section 8, T-12 South, R-38 East,
Permit Number: SWD-991 Permit Date: 8/29/2005
Permitted Injection Interval: Devonian—12,100'-12,800'
Actual Injection Interval: Devonian—12,158'-12,716' OH
Cumulative Injection: 6,438,429 BW
- #5 Celero Energy II, L.P.
Lawton State No. 3 (API No. 30-025-07124)
660' FSL & 1980' FWL (N) Section 32, T-11 South, R-38 East,
Permit Number: SWD-1000 Permit Date: 10/26/2005
Permitted Injection Interval: Devonian—12,125'-12,800'
Actual Injection Interval: Devonian—12,125'-12,290'
Cumulative Injection: 4,036,972 BW
- #6 Rice Engineering
Gladiola SWD "F" No. 7 (API No. 30-025-07165)
1980' FNL & 2310' FWL (F) Section 7, T-12 South, R-38 East,
Permit Number: R-1412 Permit Date: 6/5/1959
Permitted Injection Interval: Devonian—12,206'-12,400'
Actual Injection Interval: Devonian—12,212'-12,495'
Cumulative Injection: **Estimated 11,000,000 BW**
