NATURE OF RELEASE

Type of Release Soil	Volume of Release 10.00 bbl/event	Volume Recovered 8.00 bbl/event
Source of Release Condensate Tank	Date and Hour of Occurrence 10/05/2009 6:00AM	Date and Hour of Discovery 10/05/2009 9:00AM
Was Immediate Notice Given? <input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not Required	If YES, To Whom?	
By Whom?	Date and Hour	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

On October 5, 2009 at 9:00 AM the condensate tank at the Burton Flats Booster was reported to be overflowing into its secondary containment. According to operations personnel the level gauge for the tank was not reporting a level. When environmental arrived approximately 10 bbls of oil and water had overflowed into the condensate tank secondary containment.

Describe Area Affected and Cleanup Action Taken.*

Operations supervisors were notified by the site operator and two vacuum trucks were dispatched to the site. When they arrived 30 bbls of condensate and water were pumped out of the tanks to lower the levels and stop the spill. The estimated 10 bbls of condensate/slop oil in the secondary containment was vacuumed out with an estimated 2 bbls remaining in saturated soil within the secondary containment. Management was notified by email and cell phone with the recommendation to cleanout the containment and repair the malfunctioned level gauge.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

RE: Spill at Burton Flats Booster
Section N32.5195, W104.1507
Eddy County, New Mexico

Dear Mr. Bratcher:

Enclosed is an initial C-141 report on a spill that occurred inside the secondary containment at the above referenced facility. No offsite impacts occurred. DCP has begun the contracting services necessary to remove the affected soil and gravel. DCP will characterize the soil generated from the excavation activity for disposal. DCP expects to dispose of the material at Controlled Recovery, Inc. (CRI) in Hobbs, New Mexico.

If you have any questions, please contact me at 432-620-4207.

Sincerely,
DCP Midstream, LP
