Repaired flow line | stabilized area, began hauling contamination

Describe Area Affected and Cleanup Action Taken.\*

area 100x150 south of well.  
Excavated contaminated soil, hauled to Doom Lt. sampled area OCT  
approved backfilling. Area was backfilled + leveled.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

RE: Smith & Marrs  
Knight #14 Spill  
RP 2419

Mr. Leking:

Smith and Marrs has completed the remediation of the Knight #14 spill. All contaminated soil, 1752 cu. yds. was hauled to Doom Landfarm for disposal. After excavation, the area was sampled and approved by you for backfilling.

The area has been backfilled and leveled using soil from Doom Ranch.

Find enclosed analytical, photos and final C-141.

If you have any questions, please call.

Sincerely,

A handwritten signature in black ink that reads "Eddie W. Seay". The signature is written in a cursive style with a long, sweeping underline that extends to the right.
