A vacuum truck was called out to pick up free fluid. Emergency one call was put in and contaminated soil was excavated. Site will be delineated and remediated according to NM guidelines.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations

Dear Sirs:

Please find enclosed the C-141 initial report for a spill which occurred at our BDT State S site. The spill of 78.4 barrels of hydrocarbon and 8.7 barrels of produced water occurred on March 20, 2010. The site will be delineated and remediated according to the New Mexico guidelines.

If you have any questions or need additional information, please contact Shelby Pennington at (432)596-4211, extension 14.

Sincerely,

Toni L. Collier
