New Mexico Oil Conservation Commission
P.O. Box 871
Santa Fe, New Mexico

Attention: Mr. A. L. Porter, Jr.

Gentlemen:

My letter of July 28, 1958, requested administrative approval for the dedication of 80 acres to the Petro-Atlas Inc. Atlas "A" #1 and Atlas "A" #2. Atlas "A" #2 is located 660' FSI and 660' FWL of Section 35-25N-10W, San Juan County, New Mexico. Atlas "A" #1 is located 1980' FWL and 1980' FWL of Section 34-25N-10W, San Juan County, New Mexico. In Mr. William J. Cooley's letter of August 1, 1958, we were notified that administrative approval could not be granted. Mr. Cooley did, however, point out that an application for hearing in the subject matter could be filed.

Atlas "A" #1 was completed August 10, 1958, in the Lower Gallup Sand, pumping 216 bopd. Atlas "A" #2 is now pumping free oil. As soon as a test is obtained on Atlas "A" #2, it is planned to file an application for hearing, requesting 80 acre proration units for the subject wells.

At this time, however, administrative approval is requested for the assignment of temporary proration units for the Petro-Atlas Inc. Atlas "A" #1 and Atlas "A" #2. Atlas "A" #1 is producing from the Lower Gallup Sand perforated intervals 5323-5334, 5337-5342, and 5350-5378. Atlas "A" #2 is producing from the Lower Gallup Sand perforated intervals 5327-5346 and 5361-79.

In the event that additional information is required concerning the above request, this will be furnished upon request. Your early consideration of our request will be greatly appreciated.

Anticipation of hearing

Very truly yours,

NBG:n
