**MARALEX RESOURCES, INC.'S
APPLICATION FOR ADMINISTRATIVE APPROVAL
FOR SURFACE COMMINGLING
GRACIA FEDERAL 8-L NO. 1 WELL (API No. 30-045-28809) and the
ONEDA NO. 1E WELL (API No. 30-045-34145)**

Maralex Resources, Inc. (OGRID No. 013998) intends to install a gas line from the Oneda No. 1E well in Unit L of Sec. 8, T26N, R11W and terminating at a field compressor site and Central Delivery Point (CDP) at the Gracia Federal 8-L No. 1 (8-L), also located in Unit L of Sec. 8, T26N, R11W. Both wells are dedicated to the W/2 of Section 8. Maralex Resources, Inc. is the operator of both wells. The layout of the facilities and mineral ownership of the dedicated acreage is shown on the schematic attached as Exhibit "A". Due to the diversified mineral ownership and the fact that the Oneda 1E will produce from the Basin Dakota (Pool No. 71599) while the 8-L is producing from the Basin Fruitland Coal (Pool No. 71629), in accordance with New Mexico Oil Conservation Division Rule 309-B.4, we are submitting this application for approval of the allocation of the production as outlined on the attached method.

In order to facilitate the most economic gas production levels from each well as well as increasing the total reserves recovered, compression is required. To be cost effective, efforts are being made to utilize a single compressor for both wells. This effort will produce a commingled gas stream delivered to the transmission company through a single sales meter. No commingling of liquids will occur.

Our intention is to allocate the gas sales and production volumes for each well based on a separate allocation meter on the Oneda No. 1E and the sales meter set at the outlet of the compressor located on the 8-L location. The monthly calculations to be used for the volume allocation are shown on Exhibit "B" attached hereto.

For purposes of revenue settlement, additional calculations based on the heat content of the individual gas streams (MMbtu) will be performed in order to facilitate proper credits being given the wells. A gas analysis will be obtained on a quarterly basis at approximately the same time as the transmission company samples the CDP. The monthly calculations to be used for revenue allocation are shown on Exhibit "C" attached to this application. The revenue allocation will affect working interest owners Pro NM Energy, Inc., XTO Energy, Inc. and Martin Proyect who all have an interest in the 8-L. Pro NM Energy, Inc. is the only working interest owner in the Oneda No. 1E well. The royalty and overriding royalty interest owners have identical interest in each of the wells.

The Bureau of Land Management, Enterprise Field Services and all interest owners in the leases are being advised of this application. Pursuant to New Mexico Oil Conservation Division Rule 309-B.4, we are asking for their concurrence to the allocation methods
