**Subject:** RE: COG - Caddo Work Plan

Ike,

The remediation proposal for the Caddo Fed 6 release is approved with the following stipulations:

--The BLM will require confirmation sampling of the bottom of the excavation prior to closure.

**In such an event that future issues with contaminants are encountered, the operator will be asked to address the situation until contaminant issues are fully addressed. In addition, BLM approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws/regulations.**

Subject RE: COG - Caddo Work Plan

Ike,

The remediation proposal for the Caddo Fed 6 release is approved as submitted. Like approval by BLM is required as may be applicable.

COG is advised that OCD approval does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

OCD tracking number for this incident is: **2RP-442**

If you have any questions or concerns, please contact me.
