If a Watercourse was Impacted. Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

The threads on the swedge at the water transfer pump broke off due to corrosion. The old swedge has been replaced with a heavy duty plastic coated swedge.

Describe Area Affected and Cleanup Action Taken.*

Initially 55bbbs of produced water was released from the water transfer pump and all fluid was contained inside the facility dike walls. We were able to recover 50bbbs with a vacuum truck. The dimensions of the spill areas were a 20' x 20' area to the north of the pump and a 4' x 40' area to the south of the pump. (The closest well location to the release is the Electra Federal #31, API# 30-015-36467, Unit B, Sec10-T17S-R30E, Eddy County, NM, 1170' FNL 2310' FEL). Tetra Tech will sample the spill site area to delineate any possible contamination from the release and we will present a remediation work plan to the NMOCD / BLM for approval prior to any significant remediation work.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
