**Subject:** Electra Federal 5-flowline spill map  
**Attachments:** Electra Federal 5-flowline spill map-110310.jpg

Attached is the spill map of the Electra Federal 5 flowline spill. Spill map is approximate since pipeline construction has blurred the original spill boundaries. An older spill consisting of a large area of pooled oil without vegetation with secondary runoff from that pool runs west-northwest of the Electra spill site. The northern tail of the Electra flowline spill intrudes upon the western remnants of the older spill. I did not map the boundaries of this older spill due to time lost during the Electra onsite with the Ferguson Pipeline crew. I will have to return to the site and pick it up at a later date. I mention it here because the two spills overlap.
