Latitude 32 50.348      Longitude 104 04.981

#### NATURE OF RELEASE

Type of Release	Oil and Water	Volume of Release	645bbls	Volume Recovered	630bbls
Source of Release	Heater Treater	Date and Hour of Occurrence	04/07/2010	Date and Hour of Discovery	04/07/2010 7:00 a.m.
Was Immediate Notice Given?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Mike Bratcher - OCD			
By Whom?		Date and Hour	04/07/2010 5:41 p.m.		
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			

If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*

A water leg broke on the heater treater. The water leg was immediately repaired.

Describe Area Affected and Cleanup Action Taken.\*

Initially 645bbls of fluid was released and most of the fluid stayed inside the tank battery walls. The tank battery is lined with 40 mil plastic. A vacuum truck recovered 630bbls of fluid. There was some overspray that went onto the pad and covered a 60'x60' area. Also, the overspray went into the pasture measuring a 300'x60' area. A 10'x20' area in the pasture had fluid on the ground. All standing fluid has been recovered. The battery pad has been scraped. One-call protocol will be made by dirt contractor before removing any contaminated soil prior to soil sampling by Tetra Tech.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

**Subject:** GJ #210 Battery Spill

On 4-7-10 at 7:00am, a water leg broke on the heater treater at the GJ #210 Battery. A total of 645 bbls of oil and water was released and a total of 630 bbls recovered. Most of the fluid stayed in the dike which is lined with 40 mil plastic. 130 bbls went outside the dike. A 60' X 60' area of the pad was covered with fluid. A 10' X 20' area of the pasture was covered with fluid. Overspray covered an area of pasture measuring 300' X 60'. All standing fluid has been recovered. The battery pad will be scraped of all contaminated soil. Legal description and GPS coordinates below:
