ADMINISTRATIVE APPLICATION CHECKLIST

THIS CHECKLIST IS MANDATORY FOR ALL ADMINISTRATIVE APPLICATIONS FOR EXCEPTIONS TO DIVISION RULES AND REGULATIONS WHICH REQUIRE PROCESSING AT THE DIVISION LEVEL IN SANTA FE

Application Acronyms:

[NSL-Non-Standard Location] [NSP-Non-Standard Proration Unit] [SD-Simultaneous Dedication]
 [DHC-Downhole Commingling] [CTB-Lease Commingling] [PLC-Pool/Lease Commingling]
 [PC-Pool Commingling] [OLS - Off-Lease Storage] [OLM-Off-Lease Measurement]
 [WFX-Waterflood Expansion] [PMX-Pressure Maintenance Expansion]
 [SWD-Salt Water Disposal] [IPI-Injection Pressure Increase]
 [EOR-Qualified Enhanced Oil Recovery Certification] [PPR-Positive Production Response]

[1] TYPE OF APPLICATION - Check Those Which Apply for [A]

- [A] Location - Spacing Unit - Simultaneous Dedication
 NSL NSP SD

Check One Only for [B] or [C]

- [B] Commingling - Storage - Measurement
 DHC CTB PLC PC OLS OLM

- [C] Injection - Disposal - Pressure Increase - Enhanced Oil Recovery
 WFX PMX SWD IPI EOR PPR

- [D] Other: Specify _____

[2] NOTIFICATION REQUIRED TO: - Check Those Which Apply, or Does Not Apply

- [A] Working, Royalty or Overriding Royalty Interest Owners
 [B] Offset Operators, Leaseholders or Surface Owner
 [C] Application is One Which Requires Published Legal Notice
 [D] Notification and/or Concurrent Approval by BLM or SLO
U.S. Bureau of Land Management - Commissioner of Public Lands, State Land Office
 [E] For all of the above, Proof of Notification or Publication is Attached, and/or,
 [F] Waivers are Attached

[3] SUBMIT ACCURATE AND COMPLETE INFORMATION REQUIRED TO PROCESS THE TYPE OF APPLICATION INDICATED ABOVE.

[4] CERTIFICATION: I hereby certify that the information submitted with this application for administrative approval is **accurate** and **complete** to the best of my knowledge. I also understand that **no action** will be taken on this application until the required information and notifications are submitted to the Division.

Note: Statement must be completed by an individual with managerial and/or supervisory capacity.

Attention: Mr. Daniel Sanchez, Acting Division Director

HAND DELIVERED

Re: Application for Increased Injection Pressure
Quantum Resources Management, LLC
Cone Jalmat Yates Pool Unit Waterflood Project
Jalmat (Tansill-Yates-Seven Rivers) Oil & Gas Pool (33820)
Lea County, New Mexico

Dear Mr. Sanchez,

Quantum Resources Management, LLC (“Quantum”) as current operator of the Cone Jalmat Yates Pool Unit Waterflood Project, located in portions of Sections 13, 23, 24, 25 and 36, Township 22 South, Range 35 East, NMPM, Lea County, New Mexico, hereby requests administrative approval to increase the surface injection pressure on a unit-wide basis for all injection wells within the unit area.

Waterflood operations within the Cone Jalmat Yates Pool Unit (“CJYPU”) were initially approved by Division Order No. R-2495 dated June 11, 1963. Waterflood operations have been ongoing since that time. Additional injection wells within the unit area have subsequently been added and permitted by Division Orders No. WFX-180, WFX-206, WFX-324 and WFX-853. During the late 1990’s, a program of infill drilling and waterflood expansion commenced within the CJYPU. There are currently twenty-one active or permitted injection wells within the unit area.

The currently authorized surface injection pressure for the newer permitted wells is approximately 740 psi. It should also be noted that Division Orders No. R-2495, WFX-180, WFX-206 and WFX-324 do not specify a maximum surface injection pressure. It is our understanding that prior to 1980, the Division did not impose a maximum surface injection pressure on permitted injection wells.

During January-February, 2011, Quantum conducted nine step rate tests on injection wells at various locations across the CJYPU area. The wells and their locations were chosen so as to obtain a representative sample of all injection wells within the unit area. The step rate tests generally indicate fracture pressures ranging from 700-1264 psi. Step rate tests conducted on the CJYPU Wells No. 304 and 110 indicate fracture pressures in the 700-800 psi range. These two particular tests appear to be anomalies since they indicate fracture pressures at or below the Division’s conservative pressure allowable gradient of 0.2 psi/ft. Also, the results of these two tests are not consistent with

Quantum Resources Management, LLC
Request for Surface Injection Pressure Increase
Cone Jalmat Yates Pool Unit WF Project
Lea County, New Mexico

the results of the seven other tests conducted within the unit area. If these two tests are not considered, the average fracture pressure that was determined in the remaining seven wells was 1105 psi. **Consequently, Quantum hereby requests authority to increase the surface injection pressure on a unit-wide basis within the CJYPU to 1,100 psi.** The proposed pressure increase represents a conservative pressure gradient of approximately 0.29 psi/ft. Approval of the proposed pressure increase will allow Quantum to effectively and efficiently conduct secondary recovery operations within the CJYPU, thereby increasing the recovery of hydrocarbons from the Jalmat (Tansill-Yates-Seven Rivers) Oil & Gas Pool. Also, Quantum believes that the proposed surface injection pressure will not fracture the injection formation or confining strata, and will therefore protect fresh water resources within the unit area.

Please note that in late 2010, the Division authorized a unit-wide pressure increase to 1,400 psi within Quantum's Jalmat Field Yates Sand Unit Waterflood Project (See Order No. IPI-388 dated 12/27/2010). This secondary recovery project is adjacent to Quantum's CJYPU.

Attached is a table showing a list of the injection wells within the CJYPU, along with its API No., well location, currently authorized surface injection pressure, and test results on those wells recently tested.

Also attached is a map of the CJYPU showing the location of the injection wells within the unit area, as well as the location of the recently-tested injection wells.

Also attached is a graphical presentation of the step rate tests conducted.

If you should have any questions, please contact me at (505) 690-9453.

Sincerely,

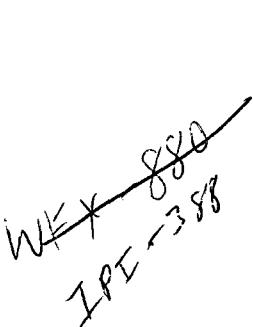

Mr. David Catanach
