Vertical and horizontal delineation samples will be taken and analysis run for TPH, BTEX and Chlorides once all contaminated material has been removed. Depth to Ground Water: <100' (approx. 210' per New Mexico Office of the State Engineer); Wellhead Protection Area: No; Distance to Surface Water Body: <100'; SITE RANKING IS 0. Based on site ground water quality and enclosed analytical results.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
