If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*
The injection pump at the water flood station went down. The stock tank overflowed into the lined berm at the facility.

Describe Area Affected and Cleanup Action Taken.*
The affected area was the berm at the water flood station. The berm at the water flood station is lined. A vacuum truck was brought to the facility and the released fluids were recovered. The impacted material located with-in the berm was excavated and placed on a liner. The removed material will be transported to an NMOCD approved Solid Waste disposal facility.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
