Describe Area Affected and Cleanup Action Taken.* An approximate area of 20' X 6'. No oil or produced water to recover. Based on previous remedial actions taken on releases with surrounding wells, the release area will be blended/tilled and nitrogen fertilizer will be incorporated into the soils of the release area. Depth to Ground Water: >100' (approximately 184'), Wellhead Protection Area: No, Distance to Surface Water Body: >1000', SITE RANKING IS 0. Based on remediation actions, site ranking (based on depth to ground water greater than 100'), Yates Petroleum Corporation requests closure.		
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
