Re: Application for Central Tank Battery
State #1 Well and State B #1 Well
~~East Townsend~~ ^{W.C.} Field (DB 56-4)
Lea County, ^New Mexico

Gentlemen:

Townsend W.C. Pool

Application is hereby made for exception to New Mexico Oil Conservation Commission Rule No. 309 (a) to permit the production of oil from two separate State oil and gas leases, all acreage therein being contiguous, into a common tank battery.

1-165-35E

During the latter part of July 1956, Austral Oil Exploration Company Incorporated completed the State #1 well which is located in Section 1, T16S, R35E, on the east side of the ~~Townsend~~ Field, Lea County, New Mexico. This well is located on State of New Mexico Lease No. E-9117. This well was drilled on the site of the Lea County (Lovington) Airport, which is now being constructed. We have erected a tank battery and are producing the well. At the present time we are drilling our State B #1 well, also in Section 1, on the adjoining State Lease No. E-9116 and desire to use the existing oil storage facility as a common tank battery for both State owned leases. We in particular make this application for a common tank battery in order to eliminate the necessity of erecting an additional tank battery on the airport site and thereby eliminating one hazard to airport traffic.

We are by copy of this letter advising the New Mexico State Land Commissioner, of our request for a common tank battery and are requesting that the State Land Commissioner advise your office by letter of their approval to comingle oil from these two leases. Attached is a photostatic print of a wire received from the State Land Commission which states that the two leases are dedicated to a common beneficiary.

The State #1 Well is producing from casing perforations 10,546-10,576 feet and 10,600-10,630 feet in the Wolfcamp formation and it is anticipated that our State B #1 well will also be completed in the Wolfcamp formation. No more than eight wells will be produced into the common tank battery and adequate facilities will be provided for accurately determining the production from each well at reasonable intervals. This we intend to accomplish by erecting a test separator.

Page 2 -

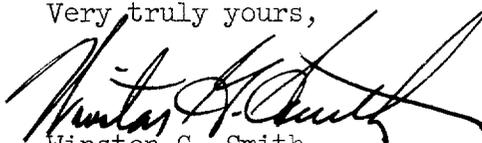

We are notifying the following offset operators by registered mail of our application and intent to comingle oil from separate leases. Copies of each of these letters are enclosed.

- a. Cabot Carbon Company, Pampa Texas
- b. Texas Pacific Coal and Oil Company, Fort Worth, Texas
- c. American Liberty Oil Company, Dallas, Texas

Attached is a plat of location for these two leases and wells. Austral Oil Exploration Company Incorporated leases are shown in yellow.

I hereby certify that the facts herein stated are true and correct to the best of my knowledge and belief.

Very truly yours,

Winston G. Smith
Division Engineer

Re: Application for Central Tank Battery
State #1 Well (State Lease E-9117)
State B #1 Well (State Lease E-9116)
Section 1, T16S, R35E
Lea County, New Mexico

Attention: Mr. E. S. Walker

Gentlemen:

Austral Oil Exploration Company Incorporated is making application to the New Mexico Oil Conservation Commission for an exception to Rule 309 (a) "Central Tank Battery" in order to comingle in a common tank battery production from our State #1 well (State lease E-9117) and our State B #1 well (State Lease E-9116). These two wells are located on the site of the Lea County Airport. We have erected one tank battery to serve our State #1 well which is now producing. Use of this one tank battery for both leases will eliminate the necessity of an additional tank battery and thereby eliminate one hazard to airport traffic.

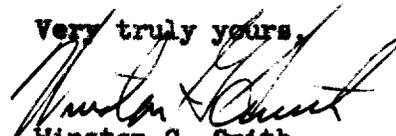

Adequate facilities will be provided for accurately determining the production from each well at reasonable intervals.

We are enclosing a copy of our letter of application to the New Mexico Oil Conservation Commission for your information.

Attached is a photostatic print of a wire received from your office which states that the two leases are dedicated to a common beneficiary. Also attached is a plat which shows the location of these two leases and wells. Austral Oil Exploration Company Incorporated leases are shown in yellow.

We respectfully request that your office approve our proposed comingling of oil from these separate state owned leases. Also may we request that your office advise the New Mexico Oil Conservation Commission of your approval by letter with a copy to our office.

Very truly yours,

Winston G. Smith
Division Engineer

Gentlemen:

Permission is hereby granted to commingle oil produced from State #1 Well (State Lease E-9117) and State B #1 Well (State Lease E-9116) located in Section 1, T-16S, R-35E, Lea County, New Mexico. This acreage in both leases will be credited to C. P. & R.

When reporting production on our Production and Royalty Statements Form SLO-111-A please combine production on the SLO showing both lease numbers.

Very sincerely yours,

E. S. WALKER
