Gentlemen:

Gulf Oil Corporation herewith makes application for an exception to Rule 309 of the Rules and Regulations of the New Mexico Oil Conservation Commission, requesting permission to commingle the production of oil from separate state oil and gas leases, the acreage therein being contiguous. - (1) The separate state leases are dedicated to a common beneficiary.
- (2) The wells are producing from a common source of supply.
- (3) No more than eight units will produce into a common tank battery, and adequate facilities will be provided for accurately determining production from each well at reasonable intervals.
- (4) All owners of adjoining oil and gas leases have been notified by registered mail of our intention to so commingle production from the above named leases.
- (5) Attached hereto, and made a part of this application, is a letter from the State Land Commissioner approving the commingling of oil from the two separate state leases.

Therefore Gulf Oil Corporation respectfully requests the Secretary-Director of the New Mexico Oil Conservation Commis-

Attached is a waiver from Magnolia Petroleum Company to any objection to Gulf's application for exception to Rule 309 as pertains to Gulf's Lea State "CL" and Lea State "R" (NCT-A) Leases in the Anderson Ranch-Devonian Pool of Lea County. As stated in my letter of February 11, 1958 this is the only waiver that was outstanding from adjoining operators.

Therefore, will you please process Gulf's application granting us permission to produce the oil from these two separate leases into a common battery.
