Gentlemen:

Rule 309 of the Commission Rules and Regulations permits the Secretary-Director to grant administrative approval for the commingling of production from separate State leases under certain conditions. One such condition is that the owners of adjoining oil and gas leases have consented in writing to the commingling or in lieu thereof that such offset operators have been notified and no objection has been received within twenty days.

In view of the fact that your application fails to mention whether or not offset operators have been notified, I am returning it so that this data may be included.

Enclosed is a copy of Order No. R-1172 which amended Rule 309.

Very truly yours,

OLIVER E. PAYNE
