Amendment  
Administrative Order CTB-73

Attention: Mr. J. G. Blevins, Jr.

Gentlemen:

O  
Reference is made to your application dated October 29, 1964, wherein you request an amendment to Administrative Order CTB-73 to include in the commingling authority contained in that order your State of New Mexico "R" (NCT-4) Lease consisting of 77.72 acres, being the N/2 NW/4 of Section 7, Township 18 South, Range 35 East, Vacuum Grayburg-San Andres Pool, Lea County, New Mexico.

P  
Y  
Administrative Order CTB-73, dated December 8, 1961, provides for the commingling of twenty-five of your State of New Mexico Leases in Townships 17 and 18 South, Ranges 34 and 35 East, Vacuum Grayburg-San Andres Pool, Lea County, New Mexico, allocating the production to each of the individual leases having the same beneficiary account on the basis of periodic well tests, followed by commingling of two separate beneficiary accounts after separately metering each of said accounts prior to such commingling. Administrative Order CTB-73 was amended March 4, 1963, to include in the commingling authority your State of New Mexico "T" (NCT-4) Lease in Section 28, Township 17 South, Range 34 East.

It is our understanding that under your present proposal your State of New Mexico "R" (NCT-4) Lease will be commingled with State of New Mexico "R" (NCT-1) and "AB" Leases. Ownership of the three leases is common throughout and allocation of the production to each of the leases will therefore be made on the basis of periodic well tests.

Administrative Order CTB-73 is hereby amended to include your State of New Mexico "R" (NCT-4) Lease.

Very truly yours,

L. Porter, Jr.  
Secretary-Director

Re: Application for Addition to Present  
Commingled installation, TEXACO Inc.,  
Vacuum Pool Consolidation and State  
of New Mexico "R" NCT-4 Leases,  
Vacuum (San Andres) Pool, Lea County,  
New Mexico

ATTENTION: Mr. A. L. Porter, Jr.

Gentlemen:

In accordance with New Mexico Oil Conservation Commission Rule 309 (b) TEXACO Inc. hereby makes application for administrative approval of an exception to Rule 309 (A) to permit commingling operations to be conducted on the State of New Mexico "R" (NCT-4) Lease. On December 8, 1961, the New Mexico Oil Conservation Commission granted TEXACO Inc. administrative approval to commingle 25 leases in the Vacuum (San Andres) Pool, Lea County, New Mexico. At this time it is desirous to commingle the State of New Mexico "R" (NCT-4) Lease with the aforementioned consolidated battery, in support of which is stated the following:

1. TEXACO Inc. is the operator of the State of New Mexico "R" (NCT-4) Lease, consisting of 77.72 acres, being the N/2 of NW/4 of Section 7, Township 18 South, Range 35 East, Lea County, New Mexico. Attached is a plat showing the location of all wells on this lease and the pool from which they are producing.

2. The expected daily liquid hydrocarbon production from the State of New Mexico "R" (NCT-4) Lease is 37 barrels of oil and that from the consolidated facility is approximately 2600 barrels of oil.

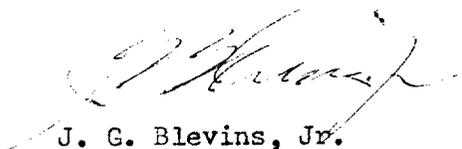

3. Working interest and royalty interest are common on all of the subject leases, however some of the leases have separate beneficiary accounts. These beneficiary accounts consist of Common School (CS) and Military Institute (MI). Permission was granted previously to commingle leases having the same beneficiary accounts based on production tests, then commingle the two

beneficiary accounts together after properly metering each account by the use of temperature compensated P. D. Meters with non-reset counters and vapor-proof samplers. The State of New Mexico "R" (NCT-4) Lease is common school beneficiary and it is proposed to commingle its production with the State of New Mexico "R" (NCT-1) and "AB" Leases which are also common school beneficiaries, refer attached plat. The production will then be metered through the present installation at a point down stream where the CS and MI beneficiaries are commingled.

4. Royalty interest in the subject lease is common and is held in part by the State of New Mexico and a copy of this application is being sent this date to the State Land Office, Box 1148, Santa Fe, New Mexico, requesting their approval in writing of the proposed installation. Immediately upon receipt of this approval, it will be forwarded to the Commission.

In view of the facts recited in this application, it is respectfully requested that administrative approval of an exception to Rule 309 (a) be granted TEXACO Inc. to permit commingling into a common tank battery from the State of New Mexico "R" (NCT04) Lease and the previously commingled leases, in the Vacuum (San Andres) Pool and from all wells which may be completed in this reservoir in the future.

Yours very truly,

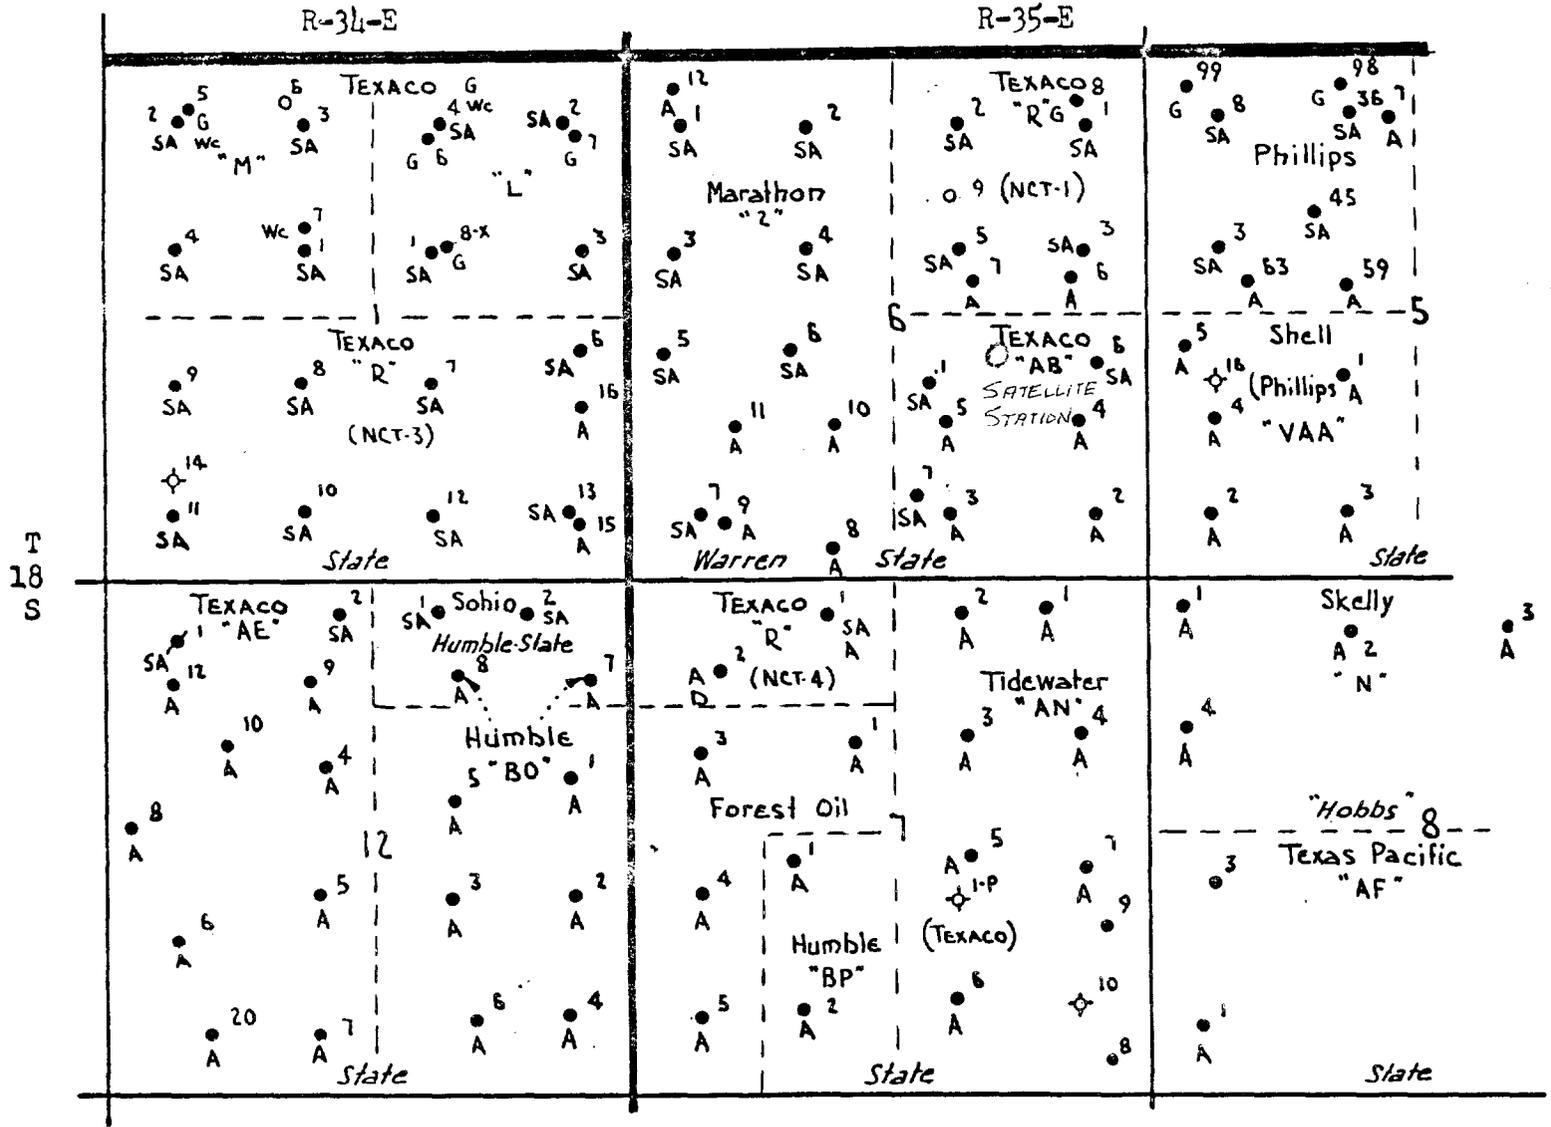

J. G. Blevins, Jr.  
Assistant District Superintendent

Re: E. S. Johnson, Jr.

In re: Application for addition to  
Lanningla Tract, hereby approved  
for production of oil and gas from  
the same located in the State of New  
Mexico in the (T-1-1) Secum (San  
Juan) Public Land County, N.M.

Comment:

In reply to your letter of November 25, 1964, you requested diagrams,  
and other pertinent information regarding the above described request.  
After a careful examination, we find that we can approve your request, since  
there will be no loss of revenue to the State, and since the different  
institutions will be metered prior to commencing.

This approval is given however, with the understanding that the Commissioner of Public Lands reserves the right to withdraw this approval  
at any time should a loss of revenue occur in any of the above mentioned institutions.

Very truly yours,

E. S. JOHNNY WALKER,  
Commissioner of Public Lands

Re: Application for Addition to Commingle  
Previously Approved Installation of  
Production from Vacuum Pool and State  
of New Mexico "R" (NCT-4) Vacuum  
(San Andres) Pool, Lea County,  
New Mexico

Gentlemen:

TEXACO Inc. respectfully submits the information requested by your letter, dated November 13, 1964, above reference. The Area Plat indicates the respective metering satellite stations to which each pertinent well is connected. Production of each royalty beneficiary, Common Schools or Military Institute, is separately metered prior to being routed to the central battery gathering system. This production is measured by temperature compensated meters, details of which may be seen on the "Schematic-Typical Satellite Station".

Your request for this information is appreciated and should more be desired TEXACO will willingly furnish it.

Yours very truly,

J. G. Blevins, Jr.  
Assistant District Superintendent

Amendment  
Administrative Order CTB-73

Gentlemen:

Reference is made to Mr. H. N. Wade's letter of December 17, 1962, wherein he requested an amendment to Administrative Order CTB-73 which order authorized the commingling of Vacuum San Andres Pool production from 25 State of New Mexico leases in Townships 17 and 18 South, Ranges 34 and 35 East, NMPM, Lea County, New Mexico. Mr. Wade's request was for authority to commingle Vacuum San Andres production from your State of New Mexico "T" Lease comprising the NW/4 of Section 28, Township 17 South, Range 34 East with your State of New Mexico "D" Lease comprising the NE/4 of Section 32, Township 17 South, Range 34 East and then to commingle this production with the production from the remainder of the leases. It is our understanding that the ownership of the State of New Mexico "T" Lease and the State of New Mexico "D" Lease is identical throughout.

Administrative Order CTB-73 is hereby amended to include your State of New Mexico "T" NCT-4 Lease in the commingling authority authorized therein.

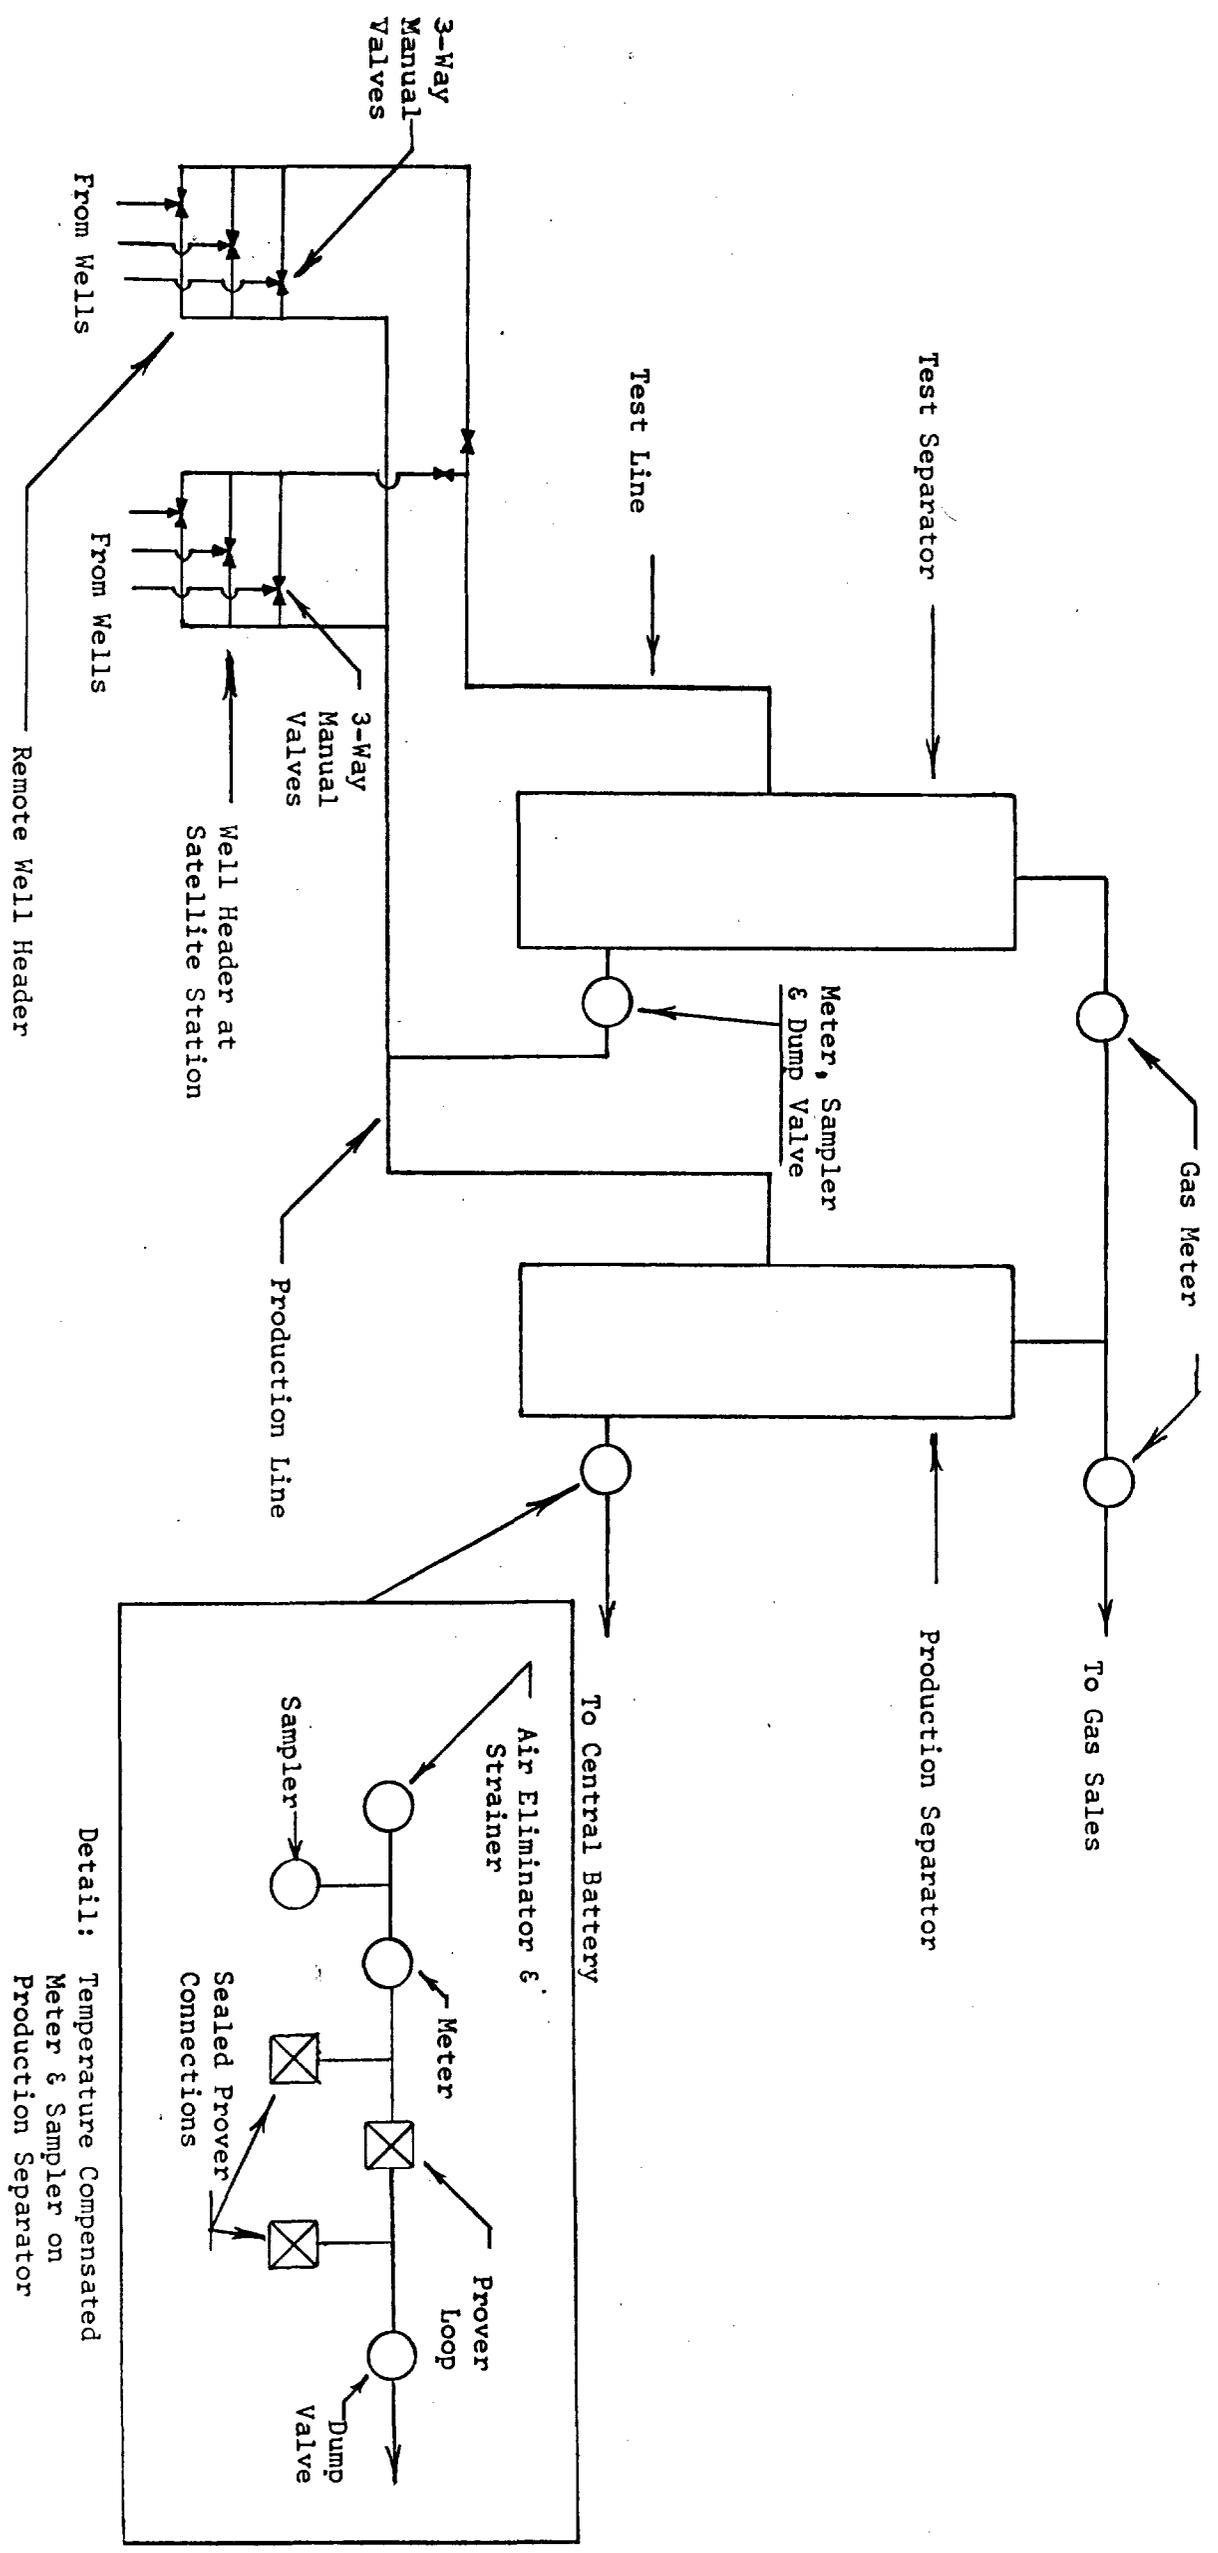

Very truly yours,

A. L. PORTER, Jr.,
