**Re: Exception to Rule 309-A
to Permit Commingling of
Production from Two Separate
Leases and to Use a Common
Power Oil Supply for Artificial
Lift**

Gentlemen:

The applicant, The Atlantic Refining Company, requests exception to Rule 309-A to permit commingling of production from two separate leases, from the same common source of supply, in a common tank battery. Also, applicant requests permission to use a common power oil supply for artificial lift when needed.

The applicant is the operator of the Graham and Corbin Leases which consist of the SE $\frac{1}{4}$ of Section 15, Township 15 South, Range 38 East, Lea County, New Mexico. The proposed battery will be located on the Graham Lease.

Attached is a schematic drawing of the proposed tank battery for these leases with the additional equipment for artificial lift. The oil from each lease will be treated and metered prior to commingling in the stock tanks. The commingled production will be measured and shipped to the pipeline by automatic custody transfer system. When artificial lift is required, the oil from each lease will be treated and metered prior to commingling in the power oil tank. The commingled production from the power oil tank will be

The New Mexico Conservation Commission

Albuquerque

October 12, 1944

Enclosed are returned to each lease as provided in the lease agreement the installation and the method of measurement. The lease agreement is also enclosed for the lease owner's information.

All persons owning an interest in the surface leased are being notified by registered mail as per attached list.

The proposed installation will permit the lease owner to make tests of individual wells and will neither cause waste nor impair absolute oil rights.

Yours very truly

ONE ATLANTIC ELECTRIC CO. BLDG.
