Strawn Oil Production
Plains Unit
Lea County, New Mexico

Mr. A. L. Porter, Jr.
Secretary Director
New Mexico Oil Conservation Commission
P. O. Box 871
Santa Fe, New Mexico

Dear Sir:

Please refer to our letter of February 19, 1964, File: VES-94-400-986.510.1, regarding our request for administrative approval to commingle Strawn oil production from Plains Unit Wells No. 2, 3X, 4X and 5.

We have now received approval from the United States Geological Survey to meter and commingle this production and we are attaching a copy of their approval for your information.

We will appreciate your advising us as soon as possible regarding our application.

Yours very truly,

V. E. Staley
Area Superintendent

Attention: Mr. V. E. Staley

Gentlemen:

Your letter of February 18, 1964, requests approval to commingle the Strawn oil production from Plains unit wells Nos. 2, 4-X (lease New Mexico 0175774), 3-X, and 5 (lease Las Cruces 065710) after the oil from each has been metered separately.

The method of measuring and handling the oil production from the wells, as outlined in your letter and described in your application to New Mexico Oil Conservation Commission, is hereby approved.

You are requested to notify our Hobbs office when the installation is completed so that a field inspection of the system can be made.

Sincerely yours,

CARL C. TRAYWICK
Acting Oil and Gas Supervisor

Administrative Order CTB-115

Gentlemen:

Reference is made to your application dated February 17, 1964, for administrative approval of an exception to Rule 309-A of the Commission Rules and Regulations to permit the commingling of Lusk-Strawn Oil Pool production from your Plains Unit Wells Nos. 2, 3-X, 4-X, and 5 pending the inclusion of these wells in a Participating Area for Strawn production. It is our understanding that the oil production from each well having a difference in ownership will be separately measured prior to commingling. It is our further understanding from a reading of Section 11, PARTICIPATION AFTER DISCOVERY, of the Unit Agreement for the Development and Operation of the Plains Unit Area that the Initial Participating Area is effective on the date of completion of a well capable of producing unitized substances in paying quantities. Further, that any extension of said Participating Area would be effective the first of the month in which is obtained the knowledge or information upon which such extension is predicated.

Under the authority granted me pursuant to Rule 309-B, Pan American Petroleum Corporation is hereby authorized to commingle the above-described production as proposed, subject to the provisions of the Commission "Manual for the Installation and Operation of Commingling Facilities."

Very truly yours,

A. L. PORTER, Jr.
Secretary-Director

Mr. A. L. Porter, Jr.
Secretary Director
New Mexico Oil Conservation Commission
P. O. Box 871
Santa Fe, New Mexico

Dear Sir:

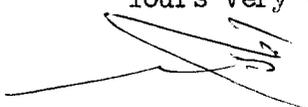

On February 17, 1964, we forwarded you our application for administrative approval to commingle Strawn oil production from Plains Unit Wells No. 2, 3X, 4X and 5.

In order to avoid the twenty day waiting period, we have now received written consent from each of the interest owners and the purchaser to allow commingling of production from these wells. Copies are attached for your file. The United States Geological Survey has advised verbally that they will approve the installation and will notify you in writing in the next few days.

Wells No. 4X and 5 are now drilling below 10,500 feet and 11,600 feet, respectively, and we anticipate production will be obtained within the next ten days. If administrative approval for our application can be expedited we will be able to avoid the expense of installing two additional tank batteries and it will be appreciated if you will advise us by collect telegram if you approve.

Your assistance in this matter will be greatly appreciated.

Yours very truly,

V. E. Staley
Area Superintendent
