MUTUAL 3-3168

Mr. Dan Nutter
New Mexico Oil Conservation Commission
Post Office Box 871
Santa Fe, New Mexico

Dear Mr. Nutter:

I am enclosing a copy of letter that I received from Mr. Ted Bilberry today, in which he points out that we need the approval of the New Mexico Oil Conservation Commission to comingle oil produced from State Lease OG 499 with oil produced from State Lease OG 961. We enclose a schematic diagram showing the lease that we wish to designate the Sam Boren and Major & Giebel Oils - Humble State CC lease. It would consist of the SW/4 of Section 34 (OG 961) and the W 3/4 of the N/2 Section 34 (OG 499). We have completed the Sam Boren and Major & Giebel Humble State 3-CC well and the 5-CC well and wish your approval to produce these in a common battery to be located near the 4-CC well as shown on the enclosed plat.

We will appreciate your approval of this request and should you require additional information, please call us collect.

Yours very truly

Jack
R. O. Major

Midland, Texas

Gentlemen:

On January 8, 1965, we approved a request for you for permission to commingle production from your State leases OG-499 and OG-961.

Permission for commingling must also be approved by the Oil Conservation Commission; therefore, your installation is illegal inasmuch as you have not received their approval.

Your request should be accompanied by a plat showing wells involved and a schematic diagram showing your tank battery, lines and meters, etc. This should be done as soon as possible and should be addressed to Mr. Dan Nutter of the New Mexico Oil Conservation Commission.

Very truly yours,

GUYTON B. HAYS,
Commissioner of Public Lands
