Re: Request for Exception to Rule 309-A to
Permit the Commingling of Production
in a Common Tank Battery from Harry
Leonard "H" and "I" Leases, Section
33-24S-38E, Dollarhide Drinkard Pool,
Lea County, New Mexico

Gentlemen:

Gulf Oil Corporation requests administrative approval for exception to Rule 309-A to permit commingling of production in a common tank battery from Harry Leonard "H" and Harry Leonard "I" Leases, Section 33-24S-38E, Dollarhide Drinkard Pool, Lea County, New Mexico. In support of this request, attached is a plat of the above two leases showing location of wells and formation names, schematic diagram of the tank battery, and communitization agreements for each lease which shows ownership is common throughout. Production into this tank battery is from the Drinkard formation on each lease. Wells are tested by shutting down well which is not being tested.

Oil production from these leases will be allocated to wells based on production tests and monthly producing days. This allocation will be reported monthly by filing the required C-115 report.

Yours very truly,

H. F. Swannack

WHEREAS, the parties hereto desire to communitize their respective interests in the above described oil and gas leases in order to form one tract or unit described as follows:

SE1/4 and Lot 2 of Section 33, Township 24 South, Range 38 East, containing 67.24 acres, more or less; and

formations as an entirety, with the understanding that such oil, gas or casinghead gas produced from the communitized tract shall be allocated among the leaseholds comprising said tract in the proportion that the acreage interest of each leasehold bears to the entire acreage interest committed hereto. Each party hereto reserves the right to take its allocated proportion of the communitized production in kind. The royalty and overriding royalties payable on the production so allocated to the lands comprising the leaseholds and the rentals provided for in said leases shall be determined and paid on the basis respectively prescribed in the individual leases. There shall be no obligation on the leasees to offset any producing well or wells on separate component tracts into which said communitized tract is now or may hereafter be divided, nor shall said leasees be required to separately measure oil, gas or casinghead gas by reason of the diverse ownership of said substances in and under said tract, but leasees shall not be released from their obligation to protect said communitized tracts from drainage of oil, gas and casinghead gas from any well or wells which may be drilled offsetting said tract. Payment of rentals under the terms of the leases hereinabove mentioned and described shall not be affected by this agreement, except as provided for under the terms and provisions of said leases or as may herein be otherwise provided.
